Eddy & Carbray

Some Reasons Why
International 8-16 Tractors
Please Their Owners:

The 8-16 is well adapted for hard work such as plowing, and will do continuous work for long days, hot days, and day and night during the rush season.

It has a speed for every job, and is one of the most serviceable belt machines made.

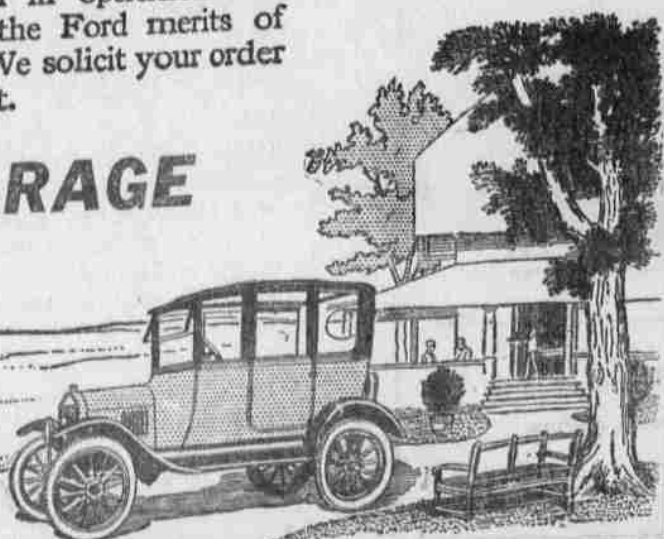

The patent kerosene carburetor makes it possible to use low priced fuels. The saving in cost as compared with a gasoline tractor is so great that it will practically pay for itself in about 3000 hours of work. This fact alone should not escape the attention of any one who is going to purchase a tractor. Place your order while the supply is available.
