to start for home, Messrs. Barrick and Dickson, with considerable trepidation, climbed aboard the steamer which plys between the Coos Bay country and Portland. It was the first venture of the doctor upon the briny deep. It was a little rough and he experienced all the acute sensations of a man who is ready to ascend the pearly throne but who cannot make the plunge. When the craft arrived in Portland the dental man's spirits were subdued to a degree where even "Dinty" Moore would have dared to pick upon him. Mr. Dickson stood the run like a seasoned sailor. They arrived in Portland Saturday afternoon, or 27 hours after the embarkation at Marshfield. Messrs. Barrick and Dickson state that the convention was a highly successful affair, but that it requires something more than a webfoot to feel right at home in Coos Bay during the rainy season.

Willard E. Craven Hardware had an unusual stove sale one day this week. They sold two ranges and six heating stoves.

Consider the Quality of the Piano First Then the Price

When buying, there are many people who think more of the price of an article than of the quality. Really, quality should be the first consideration, especially when buying a Piano.

A good Piano cannot be made to sell at the very low prices offered by some dealers. Such an instrument will not "stand up"—before long the keys stick, the woodwork warps and it sounds tinny. The purchase proves a waste of money. If quality were considered first the price might be a little more, but in the end the Piano would be well worth the money expended, giving service and pleasure for many years.

A reliable Piano House will only offer dependable quality; the prices, however, will cover a wide range, and, with convenient payment terms, make it easy to buy a really good Piano.

Dealers in Steinway and Other Pianos, Pianolas and Duo Art Pianos, Aeolian Player Pianos, Player Rolls, Etc.
