

### Chiropractic and Electro-Therapy

Disease is caused by pressure upon nervous tissue and when this pressure is relieved normal function is re-established.

Nature working through a normally adjusted body has power to heal disease, no matter what nature. A body set right mechanically will speedily bring itself back to the standard nature has set for it.

Warts and moles removed by electricity, the safe way.

**DR. H. W. BEALE**

Campbell Bldg. Independence

retary of the Oak Point community club. These officers brought with them the constitution and bylaws of the Oak Point club with the view of strengthening the laws of the Woman's club by adding the good points from Oak Point. The chairman of the finance committee, Mrs. Chester Slepser gave an interesting outline of the work to be done by her committee. Mrs. Nissen, president of the club reported a call for clothing for the Near East relief. Those who wish to give may place their gifts on their front porch Saturday, October 28 to be called for. Contributions of canned fruit for the Louise home will be received at the Baptist church Monday afternoon, October 30.

#### WHAT WE NEED

Citizens of Lebanon and vicinity are no different from those of other communities when it comes to wondering what the world needs most to put it back in the groove it ought to be running in, says the Express. But usually in finding the cause for conditions we complain about we go too far from home. An ordinary St. Paul newspaper man has discovered this, and we believe our people will agree with him when he says that most of the things this country needs can be found and applied at home. Listen to the way he sizes up the nations needs.

What this country needs is not a new birth of freedom, but the old fashioned lower \$2 berth.

What this country needs isn't more liberty, but fewer people who take liberties with our liberty.

What this country needs is not a job for every man but a real man for every job.

What this country needs isn't get more taxes from the people, but for the people to get more from their taxes.

What this country needs is not more miles of territory, but more miles to the galton.

What this country needs is more tractors and less detractors.

What this country needs isn't more young men making speed, but more young men planting the right kind of seeds.

What this country needs is more paint on the old place and less paint on the young face.

What this country needs isn't a lower rate of interest on money, but a higher interest in work.

### CAMERA TO RECORD WINNER

Method of Timing Race is Declared to Be Beyond All Possibility of Error.

The moving-picture camera is to be put to a new use; it is to time exactly the runners in a race.

When two competitors come in very close together it is extremely difficult for the umpire to say which was first, and often two men are so near that the result is declared a dead-heat. In all cases probably one of the men is a fraction in front of the other, but the eye is unable to note such minute differences.

Now a clock is to be erected at the winning post, and as the winners come in they will be photographed with a kinema-camera, which will time their arrival to the hundredth part of a second. If the winner breaks the tape only one eighth of an inch in front of his nearest competitor the camera will note the fact.

The camera will be focussed simultaneously on the clock at the winning post and on a mirror reflecting the start of the race. Both clock and camera will be set working before the starter fires his pistol, and the flash of the pistol will be reflected in the mirror and recorded on the film with the time of the clock to a hundredth of a second.

This time can then be subtracted from the time of the finish, and the exact time of the race for each man arrived at.

There will now be very few dead-heat in running matches.

### CHINA'S WALL IS CRUMBLING

Wonderful Structure, Built 200 B. C., Believed, However, to Be Good for Many Centuries.

Recent visitors to the great wall of China, which is accessible at Nankow, forty miles from Peking, describe it as slowly crumbling. Many of the turrets which command its salient points as the wall climbs over the mountain tops are in ruins and tourists and natives alike wrench the stone blocks from the superstructure to throw into the valleys below. Yet it is maintained that the great structure, extending from Shanhaikuan on the sea almost to the borders of Tibet, has many centuries to live, although no efforts are made to preserve it.

Construction of the wall was begun 200 B. C. by Emperor Chih Huang-ti, a contemporary of Hannibal, who conceived this barrier to keep out the Tartars. At one time 700,000 criminals and prisoners of war were engaged in the work. The main part of the wall, however, was not undertaken until the seventh century, when, it is said, 1,000,000 workers were employed.

#### Blacksnakes Good for Golf.

Blacksnakes seeking a comfortable home, rent and taxes free, are invited to the golf links of the Coatesville County club, in Coatesville, Pa. Along the sides of the course underbrush has been permitted to grow thick, and tempting rock piles with full southern exposures have been placed to lure the snakes from adjacent lands. An educational campaign has been inaugurated among golfers with an aversion to reptiles in order that there may be no repetition of the deaths by violence which came to two of the organization's pets. Champions of the blacksnake declare that it is the most efficient natural enemy of the ground mole, which admittedly is the natural enemy of golf greens. Not only does the snake go right into the mole's borings and discourage that animal's operations, but it is alleged to kill off rattlers and copperheads. It is harmless to mankind, and is unlikely to appear suddenly to disconcert a player about to putt, for it works at night.—Exchange.

#### Oil From Palm Tree.

Coconut nut oil, which is obtained from the fruit of a variety of palm tree that grows in Central and South America, has been examined by the Department of Agriculture. It resembles coconut oil and can replace it for many purposes. The supply of these nuts is almost unlimited and several firms are now attempting to establish the manufacture of the oil on a commercial basis.

Although during the war there was a scarcity of fats and oils in some countries, it seems that there are plenty of sources from which to obtain them in this country and many other parts of the world.

#### Seeds as Source of Wealth.

Although there are a number of productive sources of vegetable oils used in the arts and in the manufacture of food products, investigations by the United States Department of Agriculture indicate that valuable edible oils may be obtained in paying quantities from waste products and from seeds, such as the sunflower, not yet grown to any great extent in this country. At the present time the principal sources of vegetable oils are flaxseed, cottonseed, soy beans, corn germ, peanuts, palm, rape seed, tungnuts, mustard seed, sesame, castor beans and olives.

#### Numbering German Students' Hair.

Professors who according to a dispatch from Berlin recently counted the hairs on the heads of an entire class of men and women in Munich university, must have been endowed with remarkable patience. The arduous research disclosed that the men had from 40,000 to 50,000 hairs; the women from 60,000 to 70,000. Counting at the rate of one hair a second, it would take one professor more than 19 hours to number 70,000.

### City High School

ECONOMICS DEPARTMENT ENROLLMENT IS HEAVY

The home economics department consists of two branches—domestic science, or cooking, and domestic art, or sewing.

There are 11 girls enrolled in the domestic science class. These students have already learned the fundamentals of cooking and dietetics, and are ready for more advanced work. The kitchen is being remodeled and new tables are being built. As soon as this is completed, the cafeteria will be opened. The girls of the domestic science class will serve a hot lunch at noon to all students desiring to remain for the noon hour. This serves the double purpose of providing good food for the students and of making the domestic science department self supporting. Flower boxes have been made for the dining room and this room will be made as attractive as possible.

The domestic art class is very large this year, 23 girls being enrolled in first year sewing. The girls are looking forward to the course in millinery which will be given during the spring.

#### HIGH SCHOOL NOTES

Floyd Brazier, who has been out of school for two weeks on account of farm work, has returned to his school duties.

Pictures were taken of the freshmen, sophomore, junior, senior and agricultural classes several days ago. The pictures are quite successful and finished in two sizes. Many of the students have purchased these pictures for their school scrap books.

The class games will begin Wednesday evening. There will be two games on the opening night. Each class thinks it is going to win, except the freshmen, who are figuring on three walloping and it is expected they will get them. The spirit of class rivalry is running high, so fast, snappy, exciting games are assured. Other games will be played Thursday and Friday.

One day last week we were honored with a talk from Theodore Leavitt, the evangelist at the Christian church. His topic was "Spiritual

## The Newest Things IN Gifts That Last

Beauty and usefulness are two things of prime importance in a successful gift. To have an article which is a delight to the eye, and which can be used, makes any one happy. And when the article is an enduring one, its success as a gift is complete.

Our new fall stocks in Jewelry, Silverware and Novelties of enduring nature assure successful selection of gifts. So many very pretty designs are shown—the quality is so faultless—the price range so wide.

We like to have gift-seekers come in just to look around.

Nourishment." He asked the question how life may be sustained and made the answer by eating food for the body and food for the mind. He explained that good literature is very necessary to develop the mind and soul toward better things. He concluded his talk by stating four things to be remembered, which are: Know thyself, control thyself, trust thyself, and prove thyself.

### In The Churches

**Baptist Church**  
Were you one of the 100 happy, smiling folk at our Sunday school last Sunday? If not better come next Sunday. Bible school meets at 10 a. m., Art Justin is the superintendent. At 11 Rev. Proppe preaches. Our Young Peoples' society meets at 6:30 p. m. At 7:30 Rev. Proppe preaches. Our quartet will sing. Our orchestra will play. You will enjoy worshipping with us. You are welcome. Bring a friend.

**Presbyterian Bazaar Date**  
The ladies of the Presbyterian church will hold their annual bazaar

December 2. Extensive preparations are being made for the event.

**M. E. Church**  
Regular services on Sunday at the M. E. church at 11 a. m. and 7:30 p. m. with the pastor of the Falls City church occupying the pulpit.

#### NOTICE TO CREDITORS

Notice is hereby given that the undersigned has been duly appointed executrix of the estate of Frank W. Cole, deceased, by the County Court of the State of Oregon for Polk County, and has qualified. All persons having claims against the said estate are hereby notified to present the same, duly verified, together with the proper vouchers therefor, to the undersigned executrix at her residence near Buena Vista, Oregon, in said county, within six months from the date of this notice.
