There is every evidence that there will be a decided improvement in the business outlook of Independence the coming season. TOLD IN SIDE-HEADS.

The Masked Ball.—The masked ball given under the auspices of the Independence Athletic Club on the 22d, instant was a most successful and brilliant affair. It was by odds the social event of the season. The music by Prof. Sebring's orchestra was a most pleasant and entertaining feature of the entertainment. At an early hour in the evening the stage was crowded with spectators and a number found seats in the ball room and up in the gallery. The merry maskers did not appear until about 9 o'clock. They came in pairs and arrayed in all sorts of costumes, unique, grotesque, fancy and plain. The Indian chief, clown, knight templar, prince and princess, the Gypsy queen, fairy queen, sailor boy, and other characters too numerous to mention, were represented. The grand march around the hall lasted for some 40 or 50 minutes and was quite interesting. The ladies looked most bewitching in their rare and unique costumes. The spectators enjoyed themselves trying to guess the personality of the maskers. It was comparatively easy to recognize some, but the identity of others was completely concealed by their skillfully arranged costume. At a given signal the masks were dropped and then the merry dance was on. It was a beautiful sight to see all those gayly costumed dancers whirling in the graceful evolutions of the maizy waltz to the rythme of music. The evening passed off most pleasantly and everyone present voted the affair a most brilliant success. The committee, Messrs. Babbitt, Hayes, Burch and Clodfelter deserve much praise for the very successful manner in which they managed the affair. The total receipts of the evening were $65.25, the net receipts $30.90.

Does Dairying Pay?—The Salem Statesman quotes the following facts and figures from Geo. W. Weeks, an enterprising farmer and Dairyman of of Howell prairie, Marion county, Oregon: "A report of his dairy for the past year shows the following results: Amount of butter sold 3,137 pounds, at $810.50; amount of cream sold 367 gallons at $267.77; total receipts, $1,078.27 Number of cows milked, 10 old cows, 11 months, 110; 8 heifers, 6 months, 48; total number months, 158; average number cows per month, 124. As one gallon separator cream will equal two pounds of butter then the cream reduced to butter equals 734 pounds. During all this time two families used butter and cream amounting to six pounds per week, or 312 pounds per year, which should be added to the above figures. The skim milk is fed to the pigs and used to raise young calves. This herd is of common graded cows, which have, by careful feeding and breeding been brought up to a high milking standard. In fact feeding is largely responsible for the results. The expenditures are feed and help figured as follows—actual results being the author of the following figures: Cost of feed per day, per cow, 10c: help per month, per cow, $1.80; or a total of $836." The above statement is incontrovitible evidence that intelligent dairying will pay in this country, given a fair local market and a steady demand from abroad for the products of the dairy.

A Big Beet Story.—Dr. H. B. Stanley writes a facetious letter from San Miguel, Cal., to the Dallas Transcript. He takes the ENTERPRISE to task for hinting that his Lakeport beet yarn was a little out of the ordinary. The doctor says that he has visited one of Claus Speckles beet sugar factories and witnessed some marvelous sights. We give the following specimen brick of the doctor's Manchausen abilities as a story teller: "We reached the works just in time to see the teams come from the fields with loads of roots. There were 27 of the wagons each having six horses hitched thereto. Only the running gears of the wagons were used, the beets being piled on like great saw logs. Before running the beets between the rollers they were quartered with circular saws and lifted to their places with derricks. * * * Say Mr. Enterprise I think you had better travel a little. There are lots of big things in this world besides beets." Yes, we quite agree with the doctor, "there are lots of big things in this world besides beets."

A Pioneer of 1846.—Mrs. Ruth Pugh, wife of Ashbury Pugh, died of hemorrhage of the brain in Spokane on the 25, instant. Mrs. Pugh was an Oregon immigrant of 1846. She and her husband first selected a homestead in Washington county, but in 1851 the family moved to Linn county, and in 1881 moved to the Spokane country. Her husband survives her at the ripe age of 79 years. The couple celebrated their golden wedding last May. The ranks of the Oregon pioneers are fast becoming decimated and within a few years there will be none to respond to the roll call.

The Final Struggle.—The Oregonian legislative correspondent says: "At the time the ballot was completed Dolph had received 30 votes and McBride 42. The first one to change his vote was representative Smith of Polk, then Templeton, then Bridges. This this made McBride 45, the number necessary to a choice. Several members then clamoring for recognition and asking that their votes be changed, Paxton jumped upon the desk and moved that the votes of all republican members be counted for McBride. The motion was carried, and President Simon so ordered it."

"Ben Hur."—The famous book will be magnificently illustrated with stereoptican by lime light, in Independence March 12. Don't fail to see it.

A Worthy Example.—There is no buster man in town than Grandpa Clodfelter. Athough he has passed his 70th mile stone on life's journey each day he finds something for his busy hands to do. What an example of industry and usefulness this grand old gentleman is setting to many of our young men if they would only consider the lesson and profit thereby. It was just such men as Grandpa Clodfelter who made this country what it is today.

Governor Lord's vetoes have the merit of brevity.
