

What Size Are They?

Are you getting the small size cigars? There is a big difference, for in the small sizes there is more profit for the dealer. We give our customers the very best sizes, because we have the hard trade to please.

Deafness Cannot be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Owing to a scarcity of grain sacks and by there being three

machines in this immediate vicinity, our warehouse men are kept on the jump in supplying the farmers with sacks.

We are reliably informed that the Girard flour mills will change hands on the 24th. This is to be regretted as the Girards have given good satisfaction, been strictly honest in all their transactions and it will be sometime, we believe, before the mill will again be in such hands.
