CIRCULATING LIBRARY.

We have set aside a nice list of the very best copyrighted books from our regular stock of \$1.50 bindings, and are going to give the people of Independence and Polk county a chance to read all of these popular authors for the small sum of 25 cents per book. This is a chance of a life-time for those who do not feel able to purchase those at the price of \$1.35.

A BIG UNDERTAKING.

This being a big undertaking for a small town and we will require the very strictest observance of our contract.

THE CONTRACT.

The following is the sum and substance of the contract and must be signed and complied with by each and every person taking out a book:

For the privilege of being able to read your copyrighted books I deposit the sum of \$1, which gives me the use of the book for the sum of 25 cents. And I agree to pay the sum of \$1.35 if the book is damaged while in my possession. I also agree to pay the sum of 25 cents per week for each week or part thereof the book is kept over the three limit. Six days constitute a week. For those who prefer to furnish security by having a friend who is a property holder sign the card for them instead of depositing the \$1 we have furnished the following clause: "I agree to settle the following contract if for any reason the above signer should fail so to do." The rental fee of 25 cents for the book must be paid before the book leaves the store.

Marlin

32 Cal. High-Pressure Smokeless IN MODEL 1893

WE are prepared to furnish our full line of Model '93 rifles, solid and take-down, for the new .32 Caliber HIGH PRESSURE SMOKELESS cartridge. This size uses a 165-grain bullet and has a velocity of over 2,000 feet per second, making it the most powerful cartridge made for an American rifle, with the exception of the .30-40 U. S. Army. It is sufficiently deadly for any game known in North America. Another great advantage is that the barrels are bored and rifled (but not chambered) exactly the same as the regular .32-40 Marlin, one turn in 16 inches. This makes the use of black powder and lead bullets a satisfactory and convenient as in a regular black powder rifle. This size is the first high-pressure arm developed in this country for a caliber larger than .30, and the first to use a slow enough twist to give best results with black powder ammunition. Prices same as .30-30 MARLIN. 120-page catalog of rifles, shotguns, ammunition, etc., cover in 10 colors, mailed for three stamps.
