Tendency of the Times.

The tendency of medical science is toward preventive measures. The best thought of the world is being given to the subject. It is easier and better to prevent than to cure. It has been fully demonstrated that pneumonia, one of the most dangerous diseases that medical men have to contend with, can be prevented by the use of Chamberlain's Cough Remedy. Pneumonia always results from a cold or from an attack of influenza (grip) and it has been observed that this remedy counteracts any tendency of these diseases toward pneumonia. This has been fully proven in many thousands of cases in which this remedy has been used during the great prevalence of colds and grip in recent years, and can be relied upon with implicit confidence. Pneumonia often results from a slight cold when no danger is apprehended until it is suddenly discovered that there is fever and difficulty in breathing and pains in the chest, then it is announced that the patient has pneumonia. Be on the safe side and take Chamberlain's Cough Remedy as soon as the cold is contracted. It always cures. For sale by Kirkland Drug Co.

"The Poetry of the Orange."

It appeals to you, when the fruit hangs ripe and sweet on the tree late in February, or early in March. Then the blossoms break out and the trees are yellow with golden globes, and white with orange flowers. It may be that a flurry of snow has whitened the mountain tops, and then you have an artistic background for a tropical forest. The air is full of sunshine and heavy with fragrance as night comes on, and then, if the moon be shining, you may hear at midnight, through open windows, the song of the mocking bird in the scented grove, and it never seemed so melodious before.

An experience like this is possible any winter, and it is worth a
