SEVERE ATTACK OF GRIP. Cured by One Bottle of Chamberlain's Cough Remedy.

"When I had an attack of the grip last winter (the second one) I actually cured myself with one bottle of Chamberlain's Cough Remedy," says Frank W. Perry, editor of the Enterprise, Shortsville, N. Y. "This is the honest truth. I at times kept from coughing myself to pieces by taking a teaspoonful of this remedy, and when the coughing spell would come on at night I would take a dose and it seemed that in the briefest interval the cough would pass off and I would go to sleep perfectly free from cough and its accompanying pains. To say that the remedy acted as a most agreeable surprise is putting it very mildly. I had no idea that it would or could knock out the grip, simply because I had never tried it for such a purpose, but it did, and it seemed with the second attack of coughing the remedy caused it to not only be of less duration but the pains were far less severe and I had not used the contents of one bottle before Mr. Grip had bid me adieu." If You Ask Ten Men

What is the most important part of a buggy? nine of the ten will tell you **the wheels.** The wheels of our buggies were made to stand long ago. They are made of good hickory, screwed rims, steel rims, bolted between every spoke. Now about the other man. He may say "fifth wheel," "springs," "top" or "shafts;" but it is doubtful if he says the body. Why? Because a body seldom comes all to pieces and leaves him in the middle of the road. At the same time if any man who has used a buggy will answer the following questions he will see how important and desirable a good body is. Were your legs ever cramped in a long ride? Our buggies have plenty of leg room. Is the back of your buggy high enough? Ours are very high. Did you ever have a corner open? Ours are secured by a corner iron. Did you ever have a seat riser break loose? Ours are screwed to heavy oak strips 5 inches wide and 12 inches long. These are only a few of the many good features of our buggies. We have them from \$50 to \$100. Every one sold on a year's guarantee. Come in and see them.

Danger of Colds and Grip.

The greatest danger from colds and grip is their resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for these diseases we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that it is a certain preventive of that dangerous disease. It will cure a cold or an attack of the grip in less time than any other treatment. It is pleasant and safe to take. For sale by Kirkland Drug Co.
