**Air-Tight Heaters**  
Base Heating Stoves for Wood  
The laws of health tell us to keep our feet warm and our head cool.  
Other Air-Tights force heat upwards to your head, and to the ceiling where it is not needed. Heat rises and never goes down of its own accord.  
The Sellmore forces heat down to your feet and to the floor where it is most needed. Then as it rises to the ceiling it warms the room uniformly, that is why they use less than one-half the fuel required by other Air-Tights.
