Ladies' Underwear

Heavy undergarments that served to good purpose during the unusually long drawn out winter are all together unsuited for this weather. Consequently our counters are thronged by seekers for lighter knit underwear. Our stock includes the standard makes in many varieties. The combination suits are so full of warm weather comfort that a great many will not consider anything else. Enough stock to quickly supply the multitude.

THE SILK SECTION

Looks good to summer shoppers. A great quantity of new things for summer wear. Silks that have come out late—designs and colorings direct from the loom. A number of new silks for shirt waist suits will make their first appearance this week, together with an immense variety of new novelties. Brand new patterns such as others stores sell for dollar yard.

BLOOD CELLS

Man is a millionaire many times over in the possession of blood cells. Woman is not quite so rich, for scientists have proven that the normal number of red blood cells in adult men is five million; in women four and a half million, to the square millimeter. The normal cell is not absolutely round in health, but, in disease, becomes extremely irregular in shape. Every one can be in perfect health and possess the millions of rich red blood corpuscles if they only know how to go about it. Dr. R. V. Pierce, consulting physician to the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y., advises every man and woman to prepare for a long life by observing nature's laws. In the first place, if your digestion is faulty, and the food you eat is not taken up by the blood and assimilated properly, you need a tonic and digestive corrector, something that will increase the red blood corpuscles; he believes in going about this in nature's own way. Years ago, in his active practice, he found that an extract of certain herbs and roots, put up without the use of alcohol, would put the liver, lungs and heart into fuller and more complete action. This medicine he called Dr. Pierce's Golden Medical Discovery. By assimilating the food eaten, it nourishes the blood, and, instead of the ill-shaped corpuscles, the person's blood takes on a rich red color and the corpuscles are more nearly round. Nervousness is only the cry of the starved nerves for food, and when the nerves are fed on rich red blood the person loses those irritable feelings, sleeps well at night and feels refreshed in the morning.

KNOWLEDGE IS POWER.

If you want to know about your body, read Dr. Pierce's Common Sense Medical Adviser, which can be had for the cost of mailing, 31 cents in one-cent stamps for the cloth-bound book, or 21 stamps for the paper-covered volume, 108 pages. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets cleanse the bowels and stimulate the sluggish liver.

Desperate Conditions in Russia.

The recent assassination of the governor of Finland is but one of many signs of the growing unrest of the people in the Russian empire. Similar signs are to be observed in Poland, in the Caucasus and in other parts of the czar's dominions. Industrial activities are being paralyzed. Thousands of workmen are being thrown out of employment. Because of the shrinkage in traffic the railroads are reducing their forces. The amount of goods shipped this year compared with last has decreased over one-third. Of this the New York Times says:

On the railway lines of European Russia and Poland alone it is computed that 60,000 men have been discharged during the last four months. The number of laborers and artisans throughout the empire thrown into idleness during the same period is estimated at from 300,000 to 400,000, the bulk of whom entertain little hope of finding remunerative employment until the end of the war. This army of unemployed is steadily increasing at the rate of at least 3,000 a day.

The war in the far east is not the only and not even the most serious proposition that Russia has to face. The frequent mutinies among those drafted for service, the mutterings of the unassimilated peoples of the outlying provinces, the growing distress in all parts of the empire, the brutally repressive measures adopted by Minister Fiehev in dealing with threatened uprisings, all point to an impending revolution which one or two severe defeats in Manchuria will almost certainly precipitate. The sins committed by the St. Petersburg government against the spirit of liberty and progress have piled up a retribution which cannot be escaped. The moral debt of an individual or a nation must be paid. Whether it comes in a year or is delayed till later, that land must in time become the scene of an internal conflict which will shake the world.

The advancement of the human race toward liberty will go forward, and any government that stands in the way of this silent but irresistible march invites its own destruction.

The navy department continues building battleships that will withstand any explosive and manufacturing explosives that no battleship can withstand.
