

WE HAVE TO SACRIFICE!

A Serious Problem

When we purchased our spring stock of gents furnishings we had no idea of taking the Peerless Clothing Co., stock. However the deal is closed and we are in possession. The addition of there stock to ours has simply doubled us up, we have too many goods. In our ware room at this writing, are 22 cases of new Spring goods which we can't open for lack of display room, and that isn't all; there are several shipments from different factories on the way here. There are times when a merchant can't consider profit. There are times when he is forced to sacrifice his profits to even up his stock.

We are in that position. We are forced to make this stock move. Hence this sale.
