**Value Received in Prescriptions**

A prescription may be poor in two ways. It may be put up all right, but the drugs and chemicals used may be stale, or "off standard." Or the ingredients may be exactly right, and yet the full effects be nullified because it is poorly compounded, or put up carelessly. In such case, no matter how low the charge, you don't get value received, which is the essential part of the transaction. When sickness comes, consider well the reputation of the druggist to whom you take your prescription. One thing we perhaps need not add, if you bring it to us you are sure to get value received every time.
