THE SPLIT LOG DRAG
Splendid Execution may be done on the country roads with the split-log drag as the rains let up a little

and the mud begins to dry. It is a cheap, effective tool that any farmer can make and use along his premises to good advantage. The unusually bad roads that have been prevalent in many localities in western Oregon and Washington the past few months should inspire fresh enthusiasm for road improvement. Where neither crushed rock nor gravel are available and the natural soil must be relied upon for making roads it must be worked while wet. Mid-summer Oregon dust can not be moulded into a good road.—Rural Spirit.

The continued wet weather is interfering quite seriously with planting operations in this vicinity.
