The novelty of modern Medical, Chemical, and Pharmaceutical science. No use of any longer taking the large, repulsive, and nauseous pills, composed of cheap, crude, and bulky ingrelients, when we can, by a careful application of chemical science, extract all the cathartic and other medicinal properties from the most valuable roots and herbs, and concentrate them into other medicinal properties from the most valuable roots and herbs, and concentrate them into a minute Granule, scarcely larger than a mustard seed, that can be readily swallowed by those of the most sensitive stemachs and fasticlious tastes. Each little Purpative Pellet represents, in a most concentrated form, as much cathartic power as is embodied in any of the large pills found for sale in Grug-shops. From their wonderful cathartic power, in comparison to their size, people who have not fried them are apt to suppose that they are harsh or drastic in effect; but such is not at all the case, the different active medicinal principles of which they are composed being so harmonized and modified, one by the others, as to produce a most scarching and thorough, yet gently and kindly operating, cathartic.

In explanation of the remedial power of my Purgative Pellets over sogreat a variety of diseases, I wish to say that their action spon the animal economy is universal, not a gland or tissue escaping their sanative impress. Age does not impair the properties of these Peliets. They are sugar-coated and inclosed in glass bottles, their virines being thereby preserved unimpaired for any length of time, in any climate, so that they are always fresh and reliable. This is not the case with those pills which are put up in cheap wooden or pasteboard boxes. Recolbect that for all diseases where a Laxative, Alterative, or Purgative, is indicated, these little Pellets will give the most perfect satisfaction to all who use them.
