Impure Breath.

Among all the disagreeable consequences that follow the decay of the teeth, an impure breath must be the most mortifying and unpleasant to its possessor, and it is the most inexcusable and offensive in society; and yet this cause of it may easily be removed by cleansing your teeth daily with that justly popular dentifrice, fragrant SOZODONT. It purifies and sweetens the breath, cools and refreshes the mouth, and gives a pearl-like appearance to the teeth. Gentlemen who indulge in smoking should cleanse their teeth with SOZODONT, as it removes all unpleasant odors of the weed. Ask your druggists or it.

LITERARY REVOLUTION AND UNIVERSAL KNOWLEDGE.

An Encyclopedia of 20 Vols., over 16,000 Pages; 10 per cent more matter than any Encyclopedia ever before published in this country, and sold, handsomely and well bound, in cloth for \$10, in half morocco for \$15, and printed on fine heavy paper, wide margins, bound in half Russia, gilt top, for \$20—an enterprise so extraordinary that its success, beyond all precedent in book publishing, may be fairly claimed to inaugurate a Literary Revolution.

THE LIBRARY OF UNIVERSAL KNOWLEDGE is a reprint entire of the last (1879) Edinburgh edition of "Chambers's Encyclopedia," with about 40 per cent. of new matter added, upon topics of special interest to American readers, thus making it equal in character to any similar work, better than any other suited to the wants of the great majority of those who consult works of reference, and altogether the latest Encyclopedia in the field.

Special Discounts to all early subscribers, and extra discounts to clubs. Full particulars with descriptive catalogue of many other standard works equally low in price, sent free.

Leading principles of the American Book Exchange:

- I. Publish only books of real value. II. Work upon the basis of present cost of making books, about one-half what it was a few years ago. III. Sell to buyers direct, and save them the 50 to 60 per cent. commission commonly allowed to dealers. IV. The cost of books when made 10,000 at a time is but a fraction of the cost when made 500 at a time—adopt the low price and sell the large quantity. V. Use good type, paper, etc., do careful printing, and strong, neat binding, but avoid all "padding," fat and heavily-leaded type, spongy paper and gaudy binding, which are so commonly resorted to to make books appear large and fine, and which greatly add to their cost, but do not add to their value. VI. To make \$1 and a friend is better than to make \$5 and an enemy.
