ERRATA.

There are readers who are never hap

pier, as mere readers, than when theylight upon a typographical error in their favorite author or journal, No beauty in the blemished page gives quite so much of a certain kind of satisfaction as the blemish itself, for that enables the reader to rise for moment superior to the writer, however learned, brilliant of graceful he may be. The reader seems to have the impression, more or less vague, that he is himself an exceedingly clever fellow, and straightway sends a note to the editor pointing out the error that was in his last issue. Every journalist knows this of note, and has dropped hundreds of such missives, half read, into his- waste paper basket, for it is only , people unfamiliar with types who think it worth their while to make an ado about an inverted letter or a misplaced comma.

Typographical.accuracy is impossible even in words slowly and carefully prepared; it is unreasonable to demand it in a newspaper, the writing and printing of which are mutually done in haste. The wonder is that there are so few mistakes. Let 'the reader reflect for a moment that every letter on this page is produced by a seperate See of metal so small that only the st skillful fingers can handle it dextrously. The slightest displacement of one of these slender strips of lead would inevitably cause a blunder, How easy it is to drop a type, or misplace it or dent it. Even after the proof-reader has corrected his proofsheet all these chances and a hundred others, are possible. In correcting one error in the types it is the commonest accident for the compositor to disar-

Then proof readers are mortal. There is nothing easier in this world, lying not excepted, than not to see a mis-print until . it is too late to amend it, and then the blunder that escaped the keenenest eyé always has the faculty of becoming the most prominent thing on the page. An author or proof-reader may revise and re-revise. and at the end find that he has over looked some serious flaw. This is true of books as well as newspapers. There has never yet been produced a volume of any considerable size, free from typo graphical blemishes,-Every Saturday.

THE OLD FASHIONED MOTHER

Thank God! some of us have oldfashioned mother. Not a woman of the period, enameled and painted, with her chignon, her curl and bustle, whose white jewelled hands never have failed fashioned, sweet-voiced mother with eyes in whose clear depths the love light shone, and brown hair, threaded with silver, lying smooth upon her faded cheeks. Those dear hands, worn with toil, gently guided our totfering steps in childhood and smoothed our pillow in sickness. Blessed is the memory of an old-fashioned mother. It floats to us now, like the beautiful of woodland blos

This is the land of patent medits terrible import, the words of fire sum thus lavished would have profited icines, and the supply, is according to

There are two specific causes for the ill-health of men. In the first place, every man is trying to get on in life. We begin when we are boys. No one is born to a place in society. Every one is told and feels that he must make ontripotence for an especial display of books in the house has saved many a for himself a place, and also, that he may ctep higher ap, he is continually aiming at a star rather than a tree, or often exhausts himself in seeking that which is still beyond him.

In the second place, the pleasures of men often injure them. The young man at college rows himself out of health, while the man of business mistakes excitement for pleasure. There must be something pungent and almost acrid about even the occupations of a day of leisure. There is no time in these days for one to sit in the sun and sint old songs.

Something more is charged upon women. In her devotion to fashion it is said that she renders herself unfit to ted tigers. Then, after one party is Wrecking Company, arrived in this become a mother. But how is it with overcome, the other, glorying in the city from a trip to Ecuador, to make men ? Has not indulgence as often ruined the father as fashion the mother ?

Miss MATTIE CAMPBELL, ASSISTANT TEACHER OF FIANO AND VOCAL MUSIC, AND TEACHER OF OUTAR.

THE LOCATION OF THE COL-LEGE IS CENTRAL, ACCESSIBLE AND BEAUTIFUL.

The rolling prairie on which it is situated is bounded by timber, bordered with a seriated fringe of towering firs, marking the course of the Lückinute, four miles south: the Wil-lametie, two miles east, and the Lacreole, six unles north; while the oak hills, with their dense foliage, rise, one above another, in soletin grandedr, to the main range, in full view, wenty miles, distant. The Cascade range, too, rising from the valley to the east, stretches away for ghty or one hundred miles to the snow-clad mimits of Mounts Hood, Jefferson, and the Three Sisters"--all in fair view from the Colege premises. The lofty range immediately west, breaks the sea-breeze, and gives, in this locality, only a gentle wind from the north or south. With a genial and bracing climate, a fertile soil, a popu-lation distinguished for industry and moral worth—and removed from the diversions and temptations of a city.—the surroundings are all roost favorable for health, virtue, and proficiency in every department of study. The College is under the care of a Board of Trustees, who will spare no parts to make it EQUAL TO THE DEMANDS OF THE AGE.

her the Living Oracles that she may know these duties and perform them. An unjust and injurious preference is frequently shown by parents in favor of their sons by giving to them all the advantages of a finished education, while, the daughters are stinted in knowledge and dwarfed in intellect. Apart from the unwise preference and positive wrong, there is a general evil growing out of this neglect of female education spreading its hurtful influence through society and appearing in the increasing cases of divorce and general infidelity in the country.

The smattering of literature, scarcely extended beyond a series of school readers, only prepares them to become enamored of the light and trashy literature found in novelettes and sensational journals, whose tendency is to vitiate the mind, corrupt the morals and disqualify the unfortunate victim for the practical duties of life. If it is objected, that many educated

nomen are leaving their appropriate sphere, laying aside their crown of modesty and overleaping the bounds of a true lady's appropriate sphere, the answer is, that they are only partially educated. treasuries in laying off splendid streets and gardens, in erecting magnificent buildings, monuments ,and statuary, and, above all, in collecting from all paintings and curiosities. Munich bonsts of having at leaste one public building in every style of architecture.

the three styles of ancient architecture. They are in white marble, and accordingly present in all respects the appearance of an ancient Grecian square. The Roman, the earlier and later Gothic, and Norman styles are all well represented. The Basilican church is perhaps the greatest masterpiece of that kind. There are also several Egyptian and Chinese structures. Of ancient Athens, another of the Arc of Constantine in Rome, and 'another a Norman structure of the sixteenth century.

THE FIRST ADVANCE .- "He gave the first offense, and he must make the first advance." No, sir; you are mistaken. It is his privilege to make the first advance if he chooses; but that is not the way that Jesus puts it. He says, "If thy brother sin against thee, go and teil him his fault." You must go to him, and not wait for him to come to you. You see, in every act of sinning against you, he has thrown himself under the power of Satan, and can not easily release himself. But you are yet free, and there is nothing to hinder you from going to him and trying to save him; that is, nothing but

yourself from this by going to him. At a juvenile party in Lowell, one little fellow rejoicing in the splendor of his new clothes, sidled up to another with the triumphant remark, "You ain't dressed as well as I am," "Well," inches in length, by five and a half in' retorted the other, " I can lick you width. It weighs only twenty grains, anyhow."

The wrincess of Wales has revovered from her rheumatism, and the 'Alex- shrouding of the sun and visible in the andria limp' is consequently no longer United States. "It will come off the thing in fashionable circles. Jnne, 1954.

A piece of" Iron paper," a thousand of which were required to make a layer an inch thick, was sent from this country to the International Exhibition at London in 1851. But English workmanyour own pride, and you are to save ship has attained a far more remarkable result, in the production of a sheet of

iron so thin that it requires four thousan'd eight hundred such, to make an inch in thickness. It is the thinest sheet iron ever rolled, and measures ten
