A GLEAM OF HOPE.

Bradstreets says: The month of September closes with a rather better outlook in the industrial world than was apparent a week or 10 days ago. The reports as to the probability of a settlement of the anthracite coal strike which have been current for a couple of days seem to have a basis of fact and there is more than a likelihood that the most disturbing feature in the industrial situation for some time, is in process of elimination.

An encouraging feature in the iron and steel situation, is the number and character of foreign inquiries.

The demand for structural material continues steady and prices are firm. The fact that the tin plate scale remains unsettled produces but little effect. But little of significance is to be extracted from the movement of

Wheat has been somewhat irregular, and prices shift listlessly, being about where they were this time last week. Absence of foreign demand owing probably to larger Russian shipments, coupled with higher freights, tended to the unsettlement.

Spot cotton is up on the week, but the general market had fluctuated nervously, influenced on the one hand by heavy port receipts, and on the other by apparent famine conditions. In Paris there has recently been opened a special cemetery for dogs where the deceased canines can be buried with as much pomp and be marked by as pretentious a headstone as their late masters can afford. Along the front of the cemetery grounds a handsome stone wall has been erected, and within the entrance on either side are the house of the concierge and the office. Directly in front of one entering is a handsome marble monument. A heavy relief in the stone represents the dog bearing a child on his back, and commemorates the saving of a little one lost in the snow of St. Bernard pass whom a St. Bernard dog found and brought to a safe reinge.
