

PHILIPPINE FORESTS.

The forests of the Philippines are thought to contain about 500 species, more than 400 being now known. There are 87 species of palms, 22 of the oak family, including two live oaks, and nine conifers, with only one true pine—the last named growing in a dense forest above a height of 4000 feet in the island of Luzon. At least 50 species are valuable. One of the most important is the Yang-Yang tree, yielding a much-prized oil; but others furnish coconuts, gutta-percha, varnish, many dye woods, and some fine hard woods. A system of forestry has existed 35 years.

Between 20,000,000 and 40,000,000 acres of government lands have been cared for by about 65 foresters and 100 subordinates, and the regulations have been on the most scientific European model. With usual Spanish laxity in administration, however, chief attention has been given to collecting licenses.

HAD NONE FOR THE PRIEST.

At one of the railway-construction works in the vicinity of this city a Roman Catholic clergyman takes a great interest in the members of his flock who are engaged at the cutting. On Saturday he saw one of them entering a licensed liquor house, and hailed him, but Pat simply looked and walked in. Waiting till he came out, the reverend gentleman accosted him thus: "Pat, didn't you hear me calling?" "Yes, your reverence, I did, but I had only the price of one."—Glasgow Evening Times.

The Southern Pacific railroad is abreast of the times with electric headlights for its engines. By merely touching a button the engineer sets the light into play. Each light is of 2000-candle power. It lights the track half a mile ahead only of the engine while the oil light threw a faint light a few hundred feet in front of the cowcatcher. Anything on the track can be seen sixteen telegraph poles ahead of the engine, far enough away so that the train could be brought to a halt before it reached the object, even if under full speed. The engines are being provided with the apparatus as fast as it can be supplied.

A Kansas woman who felt her self called upon to reform the world, or part of it, walked into a saloon at Wichita the other day, smashed an expensive mirror and threw a stone through a three hundred dollar painting of "Cleopatra at her bath." She must have had a grudge at the saloon-keeper, though she forbore to heap personal indignity upon him. It is not stated whether Cleopatra, or the fact of her taking a bath, caused the Kansas woman to heave a stone through the work of art.

The Russian government gets in touch with the rest of the world by commencing the Gregorian computation of time with the new year. It had been using the Julian-Greek calendar which gave the year 365 days and 6 hours, and had got behind the rest of the world twelve days on account of the extra eleven minutes and fourteen seconds allowed each year by the common calendar.

It was not a happy new year for Chicago firemen. Thirty-five fire alarms called them out, and frozen clothing and ice-lined ladders and buildings hampered the firemen in their work and made it dangerous.

There will be no question about the party responsibility of the Oregon legislature, soon to meet at Salem. The Republicans have fifty-six votes to thirty-four of an opposition.

Chicago takes time to hold a pet dog and cat show. Angry mothers at a baby show will not compare in rage with the cat and dog exhibitors who fail to get blue ribbons for their pets.

The nimble penny is in demand these days. The United States mint at Philadelphia is manufacturing eight-hundred thousand a day, yet cannot catch up with the demand.

Seattle has met with a great loss in the burning of the public library, with a total loss of the twenty-five thousand volumes contained therein.

Clerking

Looks more attractive than housework for a woman, but it is also even more exhausting. The work is often done under high pressure, and the brightness of the eyes and the faded cheeks of the clerical woman are evidence of nervousness rather than health. If this is true under most favorable conditions, what shall be said of those who suffer from womanly diseases, and who endure headache, backache and other pains day after day? No sick woman should neglect the means of cure for womanly diseases offered in Doctor Pierce's Favorite Prescription. It regulates the periods, dries enfeebling humors, heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well.

A heart overflowing with gratitude, as well as a sense of duty, urges me to write to you and tell you of my wonderful recovery," says Miss Corinne C. Hoak, Orangeburg, Orangeburg Co., South Carolina. "By the use of Dr. Pierce's Favorite Prescription I am entirely a new being compared with the poor miserable sufferer who wrote you four months ago. I remark to my parents almost every day that it seems almost an impossibility for medicine to do a person so much good. During the whole summer I could scarcely keep up to walk about the house, and yesterday I walked four miles and felt better from my exercise. I now weigh 125 pounds. Mine was a complicated case of female disease in its worst form."

Doctor Pierce's Pleasant Pellets cure biliousness.

CHRISTIAN REVIVAL.—The revival at the Christian church continues with interest. A good crowd was out last night and Rev. Lindsay's sermon was enjoyed by all. At the close of the service four persons were baptized, making nine since the meeting commenced.

BIG-HEAD CHILDREN

with long thin necks—you see them in every school—want Scott's emulsion of cod-liver oil, to build up their poor little shrunken scrawny bodies.

School will be of no use to them. Something will carry them off.

They have no play in them. There is no fun in playing, when everybody else can run faster, jump further, turn round quicker, and keep on longer.

Big head is no harm; let the body be big too.

NEW BUILDING.—West Bros, the livery and feed stable men, are making preparations to erect a new stable building 34x50 feet on Williams street adjoining their present buildings next to the alley. The small building occupying that place is being torn down today and the work of erecting the new building will commence immediately. It will be a frame structure but will be built substantially.

SINGER AGENCY.—Eugene has been made a general distributing office for the Singer Sewing Machine Co for the southern part of the state. D. B. Zeh has been placed in charge. He will occupy one of the rooms in the new Cherry block, Williams street near Sixth. Portland and San Francisco are the only other offices of that class on the coast.

O. B. Hollis, of Spokane, is here visiting with his parents, Mr and Mrs J. W. Hollis, on East Eighth street, for a week. Mr Hollis is interested in mining. This is his first visit to his old home for nine years.

Junction City Items.

The Mother's Favorite.

Chamberlain's Cough Remedy is the mother's favorite. It is pleasant and safe for children to take and always cures. It is intended especially for coughs, colds, croup and whooping cough, and is the best medicine made for these diseases. There is not the least danger in giving it to children for it contains no opium or other injurious drug and may be given as confidently to a babe as to an adult. For sale at W. L. DeLano's drug store.

TELEPHONE CHANGE.—Irene Applegate has resigned her position in the Eugene telephone office, the resignation to take effect January 16th. Sina Orrell will take charge of the office at that time. Miss Applegate has made many friends by her prompt and courteous discharge of the duties of the onerous and confining position. She has held the place about a year, and feels that she deserves a rest. Miss Orrell comes from Cottage Grove, but has been living in Eugene during the winter.

SNOW ON THE MOHAWK.—M. F. Stafford, of Mohawk, was in town today and called at this office. Mr Stafford says there are two or three inches of snow in his vicinity. It snowed all day there Tuesday. It seems strange that there is snow all around Eugene and none here.

Dr. Jordan, President of Stanford University, Here.

Daily Guard January 3

Dr. David Starr Jordan, president of Stanford University, arrived in Eugene on the southbound train this afternoon on his way to California. He stopped off here to visit Dr. Strong and the University, and will leave on tonight's train for Palo Alto. Dr. Jordan was met at the train by Dr. Strong and a few other members of the faculty of the University of Oregon and driven to Dr. Strong's residence, where he will be entertained at dinner this evening.

Something New

Just published by the Southern Pacific Co is a pamphlet on the resources of Western Oregon, which includes an excellent map of the state, and contains information on climate, lands, education, etc., existing industries and their capabilities. Attention is also directed to such new fields for energy or capital as promise fair return. This publication fills a need long experienced by Oregonians, in replying to eastern friends. Copies may be had of local agent Southern Pacific Co, or from C. H. Markham, G. P. A., Portland, Or.
