Any-one finding a miserable-looking cat will please return the runaway to Mr Cherry and receive reward. He is unfortunately unable to give a full description or state the sex of the feline specimen. All he knows is that it was a cat.

MULTNOMAH WINS

But a Rank Decision Gave them the Game

MULTNOMAH 5; U. O. 0.

The Multnomah athletic club's football team arrived up from Portland on last night's train and were met by a number of students of the University. The team put up at the Hoffman House for the remainder of the night and the morning was spent in resting up for the game this afternoon.

Multnomah's men outweigh the Eugene men by 15 pounds to the man. Though the team has been well trained it is not as strong as it was last year. Kineald's field is in good condition for the game, the recent rains having made the ground softer than it was a year ago.

LANE COUNTY ENTERPRISE.

The Wilhelm Coal Mine Sold to the Cascade Coal Mining Company of Eugene.

At the first meeting of the Cascade Coal Mining Company held in Eugene Friday, November 1st, officers and board of directors were elected as follows: President, F M Wilkins; vice president, J E Simmons; secretary, J R Campbell; treasurer, R M Day; board of directors, Al Hampton, J M Wilhelm, Walter Griffin, J E Simmons, J R Campbell, F M Wilkins and R M Day. Manager at coal mine, J M Wilhelm.

The Cascade Coal Mining Company is the owner of a coal field situated near Cloverdale, twelve miles southeast from Eugene and three miles from Crowwell, the nearest point to the Southern Pacific railroad. Extensive development work has already been done on this coal mine. A thousand foot tunnel pierces the mountain in which the coal veins are located, showing a splendid vein at the end. The coal is thought by experts to be equal to the best anthracite, having been tested in many blacksmith forges with complete satisfaction. There is also a shaft one hundred feet in depth that has been sunk with the intention of making a connection with the inner end of the tunnel, four hundred feet below the surface at that point. It is the intention of the company to continue the shaft to a connection with the tunnel, for ventilating and working purposes.

The public is to be given an opportunity to secure an interest in this promising enterprise, which will certainly bring good returns to all investors, besides being a great benefit to this county and state. A limited number of shares will be placed on the market, the board of directors having made an order for the sale of 50,000 shares at 25 cents a share. There are no salaries officers, and this money will be used for further development work and it being thought that this amount will be sufficient to complete preliminary work, placing the mine on a working and paying basis. No more stock will be sold further than the development work requires, and mining experts are of the opinion that the mine has nearly arrived at the point where it may be worked with a profit.

RESIST TO RUM.—T L Gilliam has 4,500,000 feet of sawlogs now ready to run on his 10,000 foot contract to the Booth-Kelly Lumber Co, at his camp on the Upper Mokhawk. He has a force of timbermen cutting logs. The logs will be run to the Coburg mill as soon as the rains begin and raise the Mokhawk to a sufficient height.

WILHELM COAL MINE

Company Incorporated to Develop It.

BEAR CRESWELL.

For a number of years it has been known that coal exists in more or less quantities on the Wilhelm place on Bear creek, near Creswell, and the owners of the place from time to time have done considerable development work on the prospects, enough to show that the coal is there in paying quantities.

For some time past capitalists have been interested in the property with the result that a company has been organized and incorporated for the further development and working of the mine. The company is known as the Cascade Coal Mining Co, and the articles of incorporation show that the capital stock is \$1,000,000 divided into 1,000,000 shares of \$1 each. The principal office is Eugene and the names attached to the articles of incorporation are J M Wilhelm, H E Wilhelm and J R Campbell, but several other Eugene and Portland people are interested in the company.

We understand that work will be commenced on the mine in a very short time.

Miss Smith was assisted in entertaining by her sister, Miss Grace, and Miss Gertrude Longmore.

The Woodmen of the World were given a surprise last evening at their meeting place in I O O F temple by the Women of Woodcraft. They invaded the lodge room in a body and carried the place by storm. THE HOLD UP.—Ashland Tidings: "The detectives and officials are still actively engaged searching for the robbers who held up No 26 at Cottage Grove last week. A Yale professor has been in Colorado spending time by demonstrating that the tail of an adder may be grafted onto a rattlesnake. Wouldn't it be more profitable for the professor to try to discover some means of exterminating potato bugs?
