A drummer who recently came up through California this morning was telling of the heat he had experienced in that state. The figures were terrific, all up in the hundreds, as high as 221 in the shade, so hot that if one put one's hand out of a car window into the sun it would scorch it. At one hotel he wrote 27 letters with the temperature at 111 and then went back to San Francisco and spent a week in recuperating. He thought Oregon quite a relief.

TWO FARM HOUSES BURNED.

Those of James Carhan's on the McKenzie—Asa Slayter's on Blachley. Daily Guard, Aug 13. B F Finn, who arrived down from Gate Creek last night, informs the GUARD that the residence of James Carhan, about four miles above Leeburg on the McKenzie was destroyed by fire between 9 and 10 o'clock yesterday morning with all its contents. The fire caught from a defective fuse and had made such headway before it was discovered that it was impossible to save anything. While the house was a small one the furniture was valuable and the loss is a very heavy one for Mr Carhan, probably about \$500. The family dog ran under the building during the course of the fire and was burned to death. He was again a graduate student of the university of Chicago in 1899-1900, and a graduate student of Yale in 1900-'01. He was professor of mathematics at Russellville, Ky, in 1901-'02. UNIVERSITY SCHOOL OF MUSIC

In our columns appears the new advertisement of the University of Oregon and considerable space is devoted to the reorganized University School of Music. This is timely since it will appeal to many young men and women of musical tastes who are desirous of pursuing a college course where musical advantages may be obtained. Every worthy extension of activity in the educational field that the University makes brings it nearer to the position it should occupy in the state; the University is for all the people of the state. The regents have made it the best institution of its kind in the Northwest, and the attractiveness of the new courses offered by the School of Music can only have beneficial results. We understand that in general there will be two regular courses from which students may graduate—the diploma course and the degree course. The first seeks to develop an intelligent musical appreciation on the part of the student and make practical musicians, equipped for a good grade of musical work in their individual lines. The second course requires greater natural ability, longer time for its completion and seeks to graduate accomplished and talented musicians of more than usual excellence. While the terms for instruction will be a little higher than in the past, varying from three to five dollars per month for one lesson each week, these lessons will be given by teachers who have said from twenty to forty dollars a month for the same number of lessons and who are experienced instructors. Nowhere in the state can such musical instruction be obtained at such low rates and the Dean is continually receiving letters of inquiry regarding the School of Music. The prospect seems very promising. Philippine "Vets." COUNCIL BLUFFS, Ia, Aug 12.—Delegates to the annual reunion of the society of the army of the Philippines which opens tomorrow began to arrive today. Colorado has asked accommodations for 300 and a number of other states have promised big delegations. Generals Hale and Funston are expected tonight. General Jacob H Smith, now at his mother's home in Portsmouth, O, wired today that owing to illness he will be unable to attend the reunion. The town is being decorated with flags and bunting. Governor Cummins will deliver the welcoming address. Generals MacArthur and Lloyd Wheaton will respond. It is to be expected that Gen Irving Hale will be re-elected president. Gen Hale was the originator of the society. Portland, Or, is in the lead for securing the next reunion. A Railroad Scheme. PORTLAND, Aug 15.—President Melten, of the Northern Pacific, says the plans of his company for entering Portland involve the bridging of the Columbia and Willamette rivers and the boring of a tunnel through the backbone of the peninsula, all of which will cost about \$3,000,000. Northern Pacific trains will come down the Columbia and from Portland to Puget Sound, Union Pacific trains will pass over Northern Pacific tracks. Saved By Marriage. The Portland Journal of August 13 has this about a former Eugene girl: James McCauley, who was under arrest on the charge of living with May Carman without the formality of a wedding, yesterday side-stepped the charge against him by getting out a marriage license and having Judge Hogue perform the necessary ceremony. THE NEW COOS BAY RAILROAD

Chief Engineer Kinney Has Received His Orders to Locate the Line. PORTLAND, Or., Aug. 14.—Chief Engineer L D Kinney, of the Great Central Railroad last night gave out the statement that the transcontinental feature of the Coos Bay railroad had been accepted, and he had been directed to make the location of the line through to Salt Lake City. This acceptance he said, provides for the bonding of the road at \$16,000 a mile, involving in round numbers \$15,000,000. Kinney also announced that a railroad would be built to reach San Francisco and Portland along the coast. This will not be a part of his entire plan, but he says that it will be built by a capital friendly to the Coos Bay-Salt Lake City line. It is understood that it will be an extension of the California Northwestern which now reaches northward from San Francisco Bay to Ukiah a distance of 112 miles. Kinney states that he has been instructed to push the location of the line between Coos Bay and Salt Lake City with all possible speed. The work will be commenced on the Salt Lake City end first, and it is understood that the road will run across the southern end of the Great Salt Lake.

THE MCKENZIE HATCHERY

Daily Guard Aug 14. B F Finn, of Gate Creek, while in the city today, purchased of Mr Brighton the old "King flat" of 147 acres adjoining Mr Finn's place on the west. The state salmon hatchery, which is to be located on the McKenzie river and which has been talked of for a year or more past, will be built at the lower end of this place just purchased by Mr Finn. The place selected for the hatchery is an ideal one, in fact it is said to be the only feasible one on the river. Opposite the site is an island in the middle of the river on one side of which the many logs that are floated down the river can go and on the other side where the stream is deepest the work of propagating salmon can go on uninterrupted. Thousands of salmon have already been caught in the racks and it will be only a short time until the hatchery is built. A Damage Suit. The California and Oregon Land Co, which owns extensive tracts of timber land in Lane county, has commenced suit in the circuit court against J W Patrick for \$400 damages. The plaintiff claims the ownership of 160 acres of land in tp 20 r 3 e, and alleges said land is now in possession of the defendant who denies the plaintiff's right and title thereto and claims to hold said land. That by reason of the denial of the plaintiff's right and title in said premises and possession thereof by the defendant the plaintiff is damaged in the sum of \$500 and asks for restitution in the sum of \$400. E O Potter is attorney for the land company. Student Boarders.
