General Miles has returned from his trip around the world; the administration is yearning for more worlds to send him around.

Congressman Littlefield says there are 800 trusts in this country. It must be the masses and not classes who are forming trusts, after all.

A Chicago soap manufacturer has managed to fail for four hundred thousand, with assets but half that amount. He must be about as slick as his business.

The Mississippi at Memphis is two feet higher than ever before known—39 feet. The weather bureau predicts forty feet. The previous record flood, 1897, marked 37.3 feet.

Quay must think it pretty tough that a gentleman connected with the Senate cannot be allowed to oblige his friends with a little favor like the creation of two or three new states.

An Iowa woman gets fifteen years in the penitentiary for perjury committed in the trial of her husband for murder. If there is any excuse for perjury probably the poor woman had it.

And now the lady director of physical training at Wellesley College, for girls only, coe'ends that the prevailing fad for basket ball is working incalculable harm among the girls who play.

Lester Belding, in Portland jail under sentence to hang by the neck till dead Friday, March 27, has professed religion and been baptized. He has much need of it. It was a most brutal murder—he killed his wife—and there is not the least hope of executive clemency.

WHY WE ARE AGENTS

Here Are Some of the Convincing Facts That Caused us to Take the Agency for the Fulton Compounds, the First Things Known that Cure Chronic Kidney Diseases.

First, let it be distinctly understood that every one of the cases below had been diagnosed by one or more physicians as chronic and incurable; second, note the certainty of the results as shown by the recovery also of the friends they told who were similarly afflicted with supposed incurable kidney diseases.

N. W. Spaulding, President Spaulding Saw Co., San Francisco, had a recovery in his own family and told several others who recovered.

Adolph Wenke, capitalist, San Francisco, recovered himself and told two friends who recovered.

Dr. Carl D. Ziele, pioneer druggist, 322 Pacific street, San Francisco, recovered himself and gave it to more than a dozen patients who recovered.

Charles Engelke, editor of the German paper, San Francisco, recovered himself and told it to a number who recovered, one of them being Charles F. Wacker, the sixth street merchant.

R. M. Wood, editor Wine and Spirit Review, recovered himself and told it to several who recovered, among them being an old-school physician.

Edward Short of the San Francisco Call recovered, also three of his friends, viz: William Martin, Captain Hubbard of the Honolulu route and William Hawkins of the U. S. Quartermaster's Department of San Francisco.

John A. Phelps of the Hotel Kepeller, San Francisco, and two of his friends, etc. etc.

The kidneys are the sewers that strain the poisons out of the system. We can stand the derangement for a short while, but when the interference becomes chronic (permanent), as first explained by Bright, it is only a question of how long before death will ensue. It is then called Bright's Disease and incurable. All kidney troubles develop into this form about the 6th to 10th month. The above cases were incurable by all other known means. People having kidney disease should begin at first with the only known thing that will cure it if it has reached the serious stage. Fulton's Renal Compound for Bright's and Kidney Diseases, $1; for Diabetes, $1.50. John J. Fulton Co., 636 Washington street, San Francisco, sole compounders. Send for pamphlet. We are the exclusive agents for this city.

TWO STANDARDS OF MORALITY

Sunday's Oregonian has this about Dr. Collinge, apostle of "psychic vibration," under arrest and bonds in Portland for seduction:

The intricacy of the female mind was demonstrated once more yesterday morning, when a continuous stream of recent converts to the new cult called at Dr. Collinge's offices in the Abington building. Their avowed intention, as expressed to the elevator boy, was to comfort and console the humiliated apostle. From all classes of society apparently came the disciples of the amatory doctor. Matron and maid of all degrees of pulchritude, were there; and in all the vibratory sisterhood the young mother at the Good Samaritan Hospital had no friend. "Hussy" was the most charitable definition of her heard.

So goes the world. The deceiver basks in smiles and sunshine. His victim—well for her the gates of hope and joy are closed. It is not right—not just? Of course not; but it is so just the same.

THE CALIFORNIA PRUNE INDUSTRY.

A Frenchman planted a prune tree in California in 1870. It was the only prune tree in the State. All the prunes used in the United States at that time came from France. But now as the result of the prune tree that M. Pellar planted California every year ships enormous quantities of prunes not only to France but to all European countries.

The first orchard was planted in the Santa Clara Valley, just south of San Francisco, a region which is now the prune center of the state. It was ten acres in extent, and began to yield in 1875. In four years the trees produced $14,000 worth of fruit. In 1901 the state produced 150,000,000 pounds of prunes, and the total crop of the year just passed exceeded that of the preceding year by several thousand tons.

If put into 10-ton freight cars the California prune crop of 1902 would fill a train reaching from Chicago to Buffalo, six hundred miles.

Helena, Montana, has made a record. All kinds of gambling were closed down last week, the first time in the history of the town. Helena was founded in 1864, a gold discovery being responsible for the location of the town.

By dealing with your home merchants your money is kept in circulation at home, where you stand some show of getting a portion of it back again. But money sent out of the country never finds its way back again. The most prosperous towns and communities are those that prefer keeping their money in circulation at home, and such places rarely have occasion to complain of hard times.

While Mr. Roosevelt is riding his new found hobby of better treatment of the negro race—in the South, of course—he might look about him for a colored running mate in the next presidential election. Mr. Roosevelt's party doesn't nominate negroes where it has power and might elect them—in northern states. The love for the negro as an officeholder is confined exclusively to the South.

HOBOS HERDED OUT OF TOWN

(Daily Guard, March 17.)

Last night the officers visited the various box cars, barns and handy places where the pilgrims of the road are wont to congregate and spend the long hours of the night chilly night and roused the sleeping Willies from their enjoyment of slumbers in the hay and sawdust and gathered them tenderly in their arms and placed them in the city bastile where they passed the remainder of the night. There were ten hobos in the bunch.

Eugene has been somewhat troubled during the past few days with begging medicants who present various tales of woe at the doors and accost pedestrians on the streets with annoying persistence. It was thought best to gather them up, turn their backs toward the city and start them off. At the break of day the motley gang was ushered to the city limits and bade a fond farewell with instructions to skip Eugene in their travels.

FORGOT TO WHISPER.

One of the hobos has been making a plea for money on the grounds that he has asthma and can hardly talk above a whisper and wants to go to California for his health. He had a wheezing whisper and easily arroused sympathy. The man was found among the other mendicants last night so drunk that he could not walk without assistance. In his condition he entirely forgot to whisper and talked in his natural tone. He was told by Chief of Police Stiles that if he found him using that scheme again in Eugene he would start him down the street and kick him to the city limits. "I don't know of any ordinance to keep me from doing it," he added.

PREVENTS CRIME.

This method of dealing with the vagrant element, from whence nine-tenths of the crime comes, prevents the consummation of any schemes to rob or burglarize, and thereby prevents the commission of crimes in our well-behaved city. The police force deserves credit for their new ideas in this matter and we recommend other cities to adopt similar tactics.

Mr. and Mrs. Belknap are aged 80 and 81 years old respectively. Mr. Belknap is a pioneer of 1849.

A London motor cyclist drove his bicycle ten miles near London Saturday in thirteen minutes, less three seconds. How fast is that compared with Eugene street blocks? The block from the Matlock corner to the First National Bank, both inclusive, is three hundred and thirty-four feet. The bicycle went at a speed covering that distance in five seconds, and at that rate for ten miles.

The wind has been to the advantage of New Orleans in the flood situation for the past few days. It has been blowing down the river and out into the gulf instead of piling the waters up by blowing inshore and up-stream. It will be remembered that it was a heavy continuous wind that piled the waters of the Gulf of Mexico up on Galveston. A great force if steadily exerted.
