Soldiers Believe Japanese Use Magnet in Battle.

Say It Draws Strength from the Russians--Cannot Be Convinced Different by Officers.

St. Petersburg, April 2.—Siberian papers report a legend to the effect that the Japanese possess a magnet which they use in time of battle to draw strength from their foes. This has profoundly impressed the Russian troops. The military authorities to counteract the belief called soldiers from the ranks and had them hold magnets to see if a magnet caused weakness. The soldiers could not be convinced, stating that the Japanese magnets were different.

TRIED TO STEAL HIS MISTRESS

Berlin, April 2.—Lieut. Mattasich Keglitch today made another unsuccessful attempt to rescue his mistress, Princess Louise of Coburg, from a mad house near Coswig Saxony, where she has been incarcerated some time, though perfectly sane.

The princess is held in the asylum under orders from her husband, Prince Phillip, and with the connivance of the Princess' father, King Leopold, of Belgium, and the Kings of Austria and Saxony. The lieutenant's scheme was betrayed to the police in a similar manner in 1902.

Further that the Russians are falling back beyond the Yalu river.

COTTAGE GROVE THIEVES CAUGHT

Albany Officer Captured Two Men Wanted for Larceny.

U. G. Walker, of Cottage Grove, a special officer, came to Albany Thursday for the purpose of taking back to that city two hobos arrested here Wednesday night. The men are wanted for the stealing of a quantity of furniture from a dwelling house in Cottage Grove. They lived in a house there for about six weeks and when ready to leave took the personal property in the house to store and sold it, and it is on this charge they are to be taken back to be tried.

The two fellows came down the line in a freight car Wednesday evening. A request had been received to look out for a couple of men answering their description before they arrived. When their train reached this city they left their side-door sleeper and went down town. After passing through the city they again boarded their car when they were arrested. Officer Catlin, who had been looking for the men, found their car and discovered that the seal of the door was broken. Investigating, he discovered evidence of recent occupation, and he followed the train through the city, expecting that the former occupants of the car would again board their car, also the officer waiting for them.

The Cottage Grove officer is certain that he has the right men, and it is likely that they will not be able to do mischief again for a time. The officer left for home with his prisoners yesterday.—Albany Herald.

Officer Walker brought the two men to Eugene from Cottage Grove this morning and they were placed in the county jail to await trial in the circuit court next June. Their names are George Williams and Charles Lee.

A "STRINGER" ACROSS THE SKY

A rather unusual phenomenon was observed in the otherwise clear sky last night about eleven o'clock. Stretching from the zenith southwesterly a streak as of a breadth of milky silk crossed the sky, dividing into two streamers in the southeast.

An Arizona man said the phenomenon was common there and that a strip across the sky was locally designated there as a "stringer." It was a very pretty sight in the clear moonlight night, without another cloud in the sky.

MALARIA

Germ Infected Air.

Malaria is not confined exclusively to the swamps and marshy regions of the country, but wherever there is bad air this insidious foe to health is found. Poisonous vapors and gases from sewers, and the musty air of damp cellars are laden with the germs of this miserable disease, which are breathed into the lungs and taken up by the blood and transmitted to every part of the body. Then you begin to feel out of sorts without ever suspecting the cause. No energy or appetite, dull headaches, sleepy and tired and completely fagged out from the slightest exertion, are some of the deplorable effects of this enfeebling malady. As the disease progresses and the blood becomes more deeply poisoned, boils and abscesses and dark or yellow spots appear upon the skin. When the poison is left to ferment and the microbes and germs to multiply in the blood, Liver and Kidney troubles and other serious complications often arise. As Malaria begins and develops in the blood, the treatment to be effective must begin there too. S. S. S. destroys the germs and poisons and purifies the polluted blood, and under its tonic effect the debilitated constitution rapidly recuperates and the system is soon clear of all signs of this depressing disease. S. S. S. is a guaranteed purely vegetable remedy, mild, pleasant and harmless. Write us if you want medical advice or any special information about your case. This will cost you nothing.

KESWICK TRAIN ROBBERY

Redding, Cal., April 1.—A hundred men heavily armed are securing the woods of the river near Keswick and Redding, searching for the four train robbers who held up the Southern Pacific passenger train last night and killed Wells & Fargo Co.'s messenger. They blew the express car to pieces. The men had horses staked east of the Keswick bridge and mounted them to escape.

Freeman Raymond was taking water when the holdup occurred. He was compelled to get down, and he, with two of the crew and one tramp, lined up by the side of the train. Brake-man above refused to line up, when one of the robbers smashed him on the head with his rifle, making a bad wound. The robbers got no booty, the dynamic destroying everything. Pieces of paper and coin money torn and twisted were picked up at a great distance from the car.

Expressman O'Neill was not given a chance for his life. As soon as the door was opened he was killed. The passengers hid everything of value, though panic stricken.

The sheriff's posse got on the trail of the robbers this morning, and are now following it east. The robbers camped at Copley all day yesterday. The posse has a good description of the robbers. The people are determined to hang the robbers if caught. Poses are forming hourly.

St. Petersburg, April 1.—Vicerey Alexieff arrived at Port Arthur from Mukden Thursday and was received by Admiral Makroff and other officials. The party visited the ships in the harbor and inspected the repairs in progress on vessels damaged during the bombardment. Prof. Yuzovitch, a Russian teacher at the Tokio university, has arrived and testifies to the kindness of the Japanese. Students followed him to the station and entreated him to remain. At that time the Japanese public believed that Port Arthur would be within 48 hours and the Japanese army would capture it now in the night, thus bringing the war to a close.
