TO BE KEPT IN MIND.

Let every person who has some slight disorder of the stomach keep this in mind: What hurts the stomach hurts the whole body and every part of it. The body is sustained by food when digested and converted into nutrition. But when the stomach and other organs of digestion and nutrition are diseased the food eaten cannot be properly digested, the nutrition of the body fails, with the natural result of weakness. Hence the loss of flesh, the run-down condition, the "weak" heart, sluggish liver, "weak' kidneys and other diseases which are direct result of the diseased condition of the stomach.
