ACTIVITY AT BLUE RIVER

H. B. Greve, who is interested in several Blue River mining properties, was in Eugene today on his way to Portland, where he will spend the winter. He left the mines early yesterday morning and arrived here late last night. At the time he left the snow was more than a foot deep at the Lucky Boy mine and ranging from two to three feet deep on the highest points.

TREASURE MILL STARTS.
Mr. Greve stated to a Guard reporter during an interview at noon today that the fine new 100-ton capacity mill at C. H. Park's Treasure mine was to have begun dropping stamps today. Everything was in readiness for operations when he left, and thousands of tons of ore have been waiting on the dump for a long time. The Treasure plant is said to be one of the most up-to-date and complete on the coast.

ACCIDENT AT GREAT NORTHERN.
An accident happened at the Great Northern mine the other day, Mr. Greve says, that will put the Huntington mill out of business for perhaps several weeks. A big iron casting fell on a portion of the machinery, disabling it. New parts have been sent for. The stamp mill will pound away just the same.

CANDIANI'S PROPERTY.
Work is now being resumed on Dr. C. I. Candiani's property. The saw-mill is in operation and work on the 350-foot tunnel is going on. E. Poehlin is superintendent of operations at this property.

AS WORKED EIGHT YEARS.
Mr. Greve, who has been interested in Blue River properties for the past eight years, says he has some very good claims and expressed the belief that he would soon begin to realize something substantial from them as a reward for his persistent efforts. He usually spends the summers and autumns at the mines and the winter in Portland. While in the metropolis at different times he has been instrumental in attracting capitalists to the Blue River district.

LUMBER SCHOONER BELLA A WRECK

The schooner Bella, plying between the Siuslaw river and San Francisco, ran ashore about six miles south of the mouth of the Siuslaw at 5 o'clock Sunday morning during a terrific storm and is now being pounded to pieces by the huge breakers, which roll high above the vessel's decks.

The Bella was on the way up from San Francisco to Lad Lumber at Acme. The entire voyage had been a perilous one on account of the storm, which raged continually from the time the vessel passed through the Golden Gate. Everything went well, however, until early Sunday morning, when the wind with increased fury made it almost impossible to manage the craft. All hands were on deck working like Trojans to keep the vessel in her right course. Suddenly and without warning there was a terrific crash. The staunch little schooner tumbled from stem to stern and came to an abrupt standstill. She had run onto the submerged rocks near the shore. The crew found that a great

hole had been torn in the bottom of the hull and realized that there was no hope of saving the vessel in the storm that was raging. Getting the few belongings together the crew crept the small boats and put through the breakers for shore. After many narrow escapes from being swamped the boats reached land safely.

Reports from Florence this forenoon stated that the vessel would be complete wreck and that the cargo had already gone to pieces.

The Bella was owned by William Kyle & Sons, the well known merchants and shippers of Florence. She was a 3-masted schooner of about 100 tons burden. She had been engaged in the lumber carrying trade between the Siuslaw and San Francisco for several years and was one of the best known little vessels on the coast.

The schooner was carrying a cargo of general merchandise of Florence and Acme merchants. The goods will be a total loss.

ROMA BLAIR'S PRESENCE OF MIND

The following from the Portland Journal is about a former Eugene girl:

With a presence of mind rarely seen in one so young, 15-year-old Roma Blair, who collided with a burglar on taking a lamp and going into the hallway of her home after hearing a noise at 4 o'clock this morning, pretended that she believed his mission to be to see her brother; and escorting him to the door gracefully bowed him out. Then she flew to her father's bedroom and told him that a thief had just left the house and he had better call the police.

"I was asleep," said the little girl when telling her story to Chief Gritzmacher, "but the noise made by somebody coming down stairs awakened me. I lighted a lamp and went into the hallway. As I did so a man peeped up to me and told me not to be frightened, but to keep quiet. I realized he was a burglar, but saw it would not do to let him know I thought so.

"Then I asked him if he had come

to see my brother, and when he said he had I wanted to know when my brother would be down. He was pretty soon. I asked him if he would go now and on his saying he would I opened the door and let him out. He ran down the steps and I called father."

THE LAKE CREEK SALMON HATCHERY

Joe Simmons, superintendent of the state salmon hatchery on Lake Creek, reports that up to November 29 they had taken 1,700,000 Chinook salmon eggs and expect to get at least 2,000,000 Chinook eggs. In addition to this they expect to get as many more silverside salmon eggs, making a total of 4,000,000 eggs for this season.

The work already accomplished by far the best that has been done by the Siuslaw any season since artificial propagation has been established and shows the wisdom of establishing a permanent hatchery.—Florence West.
