

# SORES-ULCERS THE BLOOD DISEASED -SYSTEM DISORDERED

When a Sore or Ulcer is slow in healing it is the best evidence of a diseased condition of the blood and a disordered system. They show that the impurities, which should pass off through the natural channels of the system, are being retained in the system from some cause. The blood absorbing the waste matters becomes steeped in poison which finds an outlet through the Sore or Ulcer, keeping it inflamed, painful and festering. As the blood constantly discharges its impurities into these places, they eat deeper into the surrounding flesh and become growing larger and more offensive in spite of all the sufferer can do, until the entire health is affected. Washes, salves, powders and such treatment are desirable for the reason that they are cleansing and also help to relieve the pain, but they are in no way curative. The blood is filled with poison, and until it is removed the sore cannot heal. S. S. S. is the only cure for these evidences of impure blood. It goes down to the root of the trouble and cleanses the circulation of all poisons and impurities. S. S. S. enriches the blood and reinvigorates the different members of the body so that the impurities and waste matters can pass off as intended. Then the discharge ceases, the sore scabs over, new flesh is formed, and the place heals permanently. Ask for Sores and Ulcers and any medical advice you need without charge.

# SCHOOL BOARD LEVIES 7-MILL TAX

The annual meeting of the Eugene school board for the purpose of levying the district tax for the year 1905 was held in the courthouse last evening. After the usual discussion a 7-mill tax was voted.

Among other business transacted the board, upon motion of J. J. Walton, was authorized to use so much of the surplus money on hand during the coming year that they may deem advisable to purchase outstanding school bonds of the district or reserve it as a sinking fund to redeem the bonded indebtedness.

**CHAIRMAN'S REPORT.**  
The annual report of the chairman of the board, Mrs. C. M. Collier, was read as follows:

As chairman I make the following report for the school board:  
We have three full eight grade schools and two extra rooms fitted up for grade work in the basement of the high school building. These rooms are used for pupils in the second and third grades, who could not be accommodated in any of the other buildings.

We have twenty-six teachers employed in the grades at an expense of \$1211 per month. The whole number of pupils enrolled in the grade schools at the present date of 1914. There are eight teachers employed in the high school at an expense of \$176.50 per month. The number of pupils enrolled in the high school is 285, which with 1014 in the other schools makes a total enrollment in all schools of 1329.

The whole number of school children in the district as taken from the last enumeration list is 1884. It is to be regretted that there are so many children not in school who should be attending. We have taken pains to inform the parents and urge the importance of giving the children the benefit of the schools.

All the schools are in good condition and are doing good work. The Patterson building was repaired. The woodwork on the inside of the Central was also given a coat of paint, and a part of the basement in the Geary building fitted up for a lunch and recreation room in stormy weather.

Such repairs as seemed necessary have been made and the funds have been expended economically so that there will be a surplus at the end of the year. This surplus can be applied on the bonded indebtedness, buying up the bonds as they are available. The board, after hearing a report from the financial committee, and considering the estimated income and also the estimated expenditures for

**SOLD TURKEYS AT SEATTLE.**

E. Dodge, of Scobert & Dodge, has returned to Eugene from Seattle, where he disposed of 2500 turkeys to Seattle epicureans.

The birds taken to the sound country were all raised in Lane county and Mr. Dodge accompanied the shipment so as to be free from middlemen's profits and by this method he is enabled to pay Lane county poultry people the highest market price.  
Scobert & Dodge are also doing a big potato business, having leased a warehouse at McKee and Crabtree, two of the big potato districts of Oregon. They report that Lane county has raised the largest crop of tubers ever known and of the very best quality, showing that we have excellent potato ground. The firm informs us that they will make another big shipment just before the Christmas holidays.

## KICKED TO DEATH BY HORSES

Berrings Abbott, father-in-law of Professor Joseph Schafer, of the University of Oregon, late yesterday afternoon received injuries by being kicked and trampled by two horses from which he died at 9:15 o'clock last night.

Mr. Abbott and his wife have been residing with Professor and Mrs. Schafer. Mr. Abbott went to H. D. Wylie's barn, where Professor Schafer's cow was kept. He evidently frightened Mr. Wylie's team of horses in some manner, and they began kicking.

They struck him and knocked him under their feet. This further infuriated them and their kicks and plunges were kept up with increasing viciousness, all the while Mr. Abbott's prostrate form receiving blow after blow.

Mr. Wylie, Mrs. Abbott and Mrs. Senafer all heard the noise and ran to the barn. With difficulty they succeeded in getting Mr. Abbott from beneath the horses' feet and carried him to the house. Drs. D. A. Paine, W. Kuykendall and Geo. O'B. DeBar were called to attend the injuries. They found that the man's right leg had been broken in two places, his right arm broken, several ribs crushed in and his head badly bruised and cut. It was immediately apparent to the physicians that the injuries were fatal. After intense suffering Mr. Abbott died at 9:15 last night.

The deceased was a little past 75 years of age. Besides his wife he leaves the following children:

- Chas. Abbott, Phoenix, Arizona;
- Mrs. Thomas Stamford, Minneapolis;
- Miss Ida Abbott, Spokane;
- Mrs. Maud Lundy, Millet, S. D.;
- Mrs. Rose Millican, Aberdeen, S. D.;
- Mrs. Jos. Schafer, Eugene;
- Byron Abbott, North Dakota.

## ELECTRIFY PACIFIC COAST

The Portland Journal says: A \$50,000,000 corporation is forming in the East to enter the Pacific coast within the next few months for the purpose of acquiring and controlling the electrical power plants from Lower California to the Canadian boundary line, and developing the most stupendous enterprise of the sort in the world.

For more than a year representatives of powerful Eastern financial houses, believed to be the Clarks and Seligman, of Philadelphia, have visited Portland and other coast cities, keeping their identity covered and laying the foundation for the creation of the corporations. The project involves ultimately the acquisition of developed and undeveloped sites for electric energy aggregating 500,000 horsepower.

Large projects will be put through in California, and the \$50,000,000 concern will enter Oregon to absorb companies now operating independently, thus enabling it to secure a control of the entire industry of lighting and electric traction.
