SUGGESTIONS FOR PURE WATER SUPPLY

C. J. Barhite, who lives on the corner of Clark and Jefferson streets, believes he has the solution of a pure water supply for this city. Mr. Barhite has a bored well encased that is 105 feet deep, the last few feet being through solid rock. This water is artesian in nature and rises to within a few feet of the surface. Mr. Barhite believes this supply is inexhaustible and is of the opinion that if the company would sink two twelve-inch pipes they would never be able to pump the wells dry. As an experiment Mr. Barhite is willing that the company test the supply of his well and states it is at liberty to do so free of cost. We believe this system might solve the present water question. Mr. Barhite states that the water from his well is absolutely pure and during the present epidemic is furnishing water to many and further, extends the use of the water from the well to any who will call for the same. J. C. McMahon thinks the water company should place its pumps somewhere between the Willamette and McKenzie rivers. Others think that deep wells in the hills south or southeast of Eugene would give good pure water, while others think a location in the vicinity of W. R. Walker's residence on the bottom between Eugene and Springfield would prove suitable.

WALTER LYON ON HON J. M. SHELLY

Walter Lyon, of the Independence Enterprise, has it in for Hon. J. M. Shelly, of this city. This is what he says:

There are too many sent to the Oregon legislature who get their political inspiration from the metropolis. From fifth story bricks, at wine dinners, poker table or belled up to the bar they look at their home county through the big end of a telescope and decide to become candidates. The suffrage of the people in the county which they condescend to honor with their presence occasionally is but a plaything for them. The votes of the horny-handed toilers from the cow counties of Eastern Oregon or the clod hoppers of the Willamette valley counties, when steamed up with punches, cocktails, whisky and benzine, are their personal property. The political trust at Portland is notified they will be in the next legislature. Their respective counties they carry in their vest pocket. The formality of election will be attended to when they get back home and the real politician will be with the Portland bunch in the legislature. The "cow counties" have had enough of such legislators.

Lions must have been out when he wrote the above. It is unjust. The insinuation that Mr. Shelly is a poker player or a whisky man is wrong. He is an ardent "prohi." Lions should not get too far away from home for his political comments.
