A RICH NEW STRIKE IN THE NORTH FAIRVIEW

Herbert Leigh, secretary and general manager of the North Fairview Mining Co., operating in the Bohemia district Saturday received from the company's mine a number of samples of the finest ore ever taken out in the district, a new strike having just been made. No assay of the ore has yet been made but Mr. Leigh, who is a graduate assayer, estimates that it will run between \$25 and \$50 to the ton. He went to Portland Sunday, taking the ore with him, and will exhibit it to mining men there.

JOSEPH DEYULIO A HAPPY MAN

Junction City, Or., Aug. 13.—The happiest man in Oregon is Joseph Deyulio, who lives eight miles west of this place. Twenty years ago he was a resident of Campobasso, Repubblicani, Italy, where he was married to Maria Marengi. Leaving his bride a few months he shipped as a sailor to America to seek his fortune, after which he was to send for his wife.

After reaching the United States he went to work with the one idea in view of saving enough money to send for his wife. In a few months his wife wrote him of the arrival of a little dark-eyed daughter, who had come to bless their home when she reached America. In a few months Deyulio had saved enough money to bring his wife and baby to him. This he sent to her in Italy expecting she would come at once. His wife was living with his mother, who wished her son to return to Italy to live, and she thought if she could persuade her daughter-in-law to remain, her son would return. She borrowed the money sent to buy the tickets with and spent it for other things, hence the wife and babe had nothing to buy a ticket with to America.

She wrote Deyulio of this and he was so disgusted that he refused to send any more money, hence for 18 years they have been separated by the ocean. About two years ago Deyulio's mother died and his wife then wrote him it was her desire to come to this country. He, remembering his first experience in sending money, thought it the safest way to send her a ticket for herself and daughter. This he did, and after many delays in proving his American citizenship and his ability to care for them when they arrived in this country, he at last got them. They arrived here last week. His daughter, whom he had never seen, had married and was left a widow with one small babe, which she brought with her.

Deyulio has a farm of 80 acres of good land and it is well stocked with goats, sheep and cows.

FIRE ENGINE FOR CITY OF FLORENCE

The city council of Florence at the regular meeting last Monday evening voted to purchase a hand fire engine with 500 feet of hose and a cart, from A. G. Long, of Portland, for \$1300, delivered at Yaquina.

Wednesday evening while one of the donkey engines at the Hurd logging camp was being loaded on a scow at the mouth of Hades Creek preparatory to taking it up to Knowles Creek the scow in some way slipped back from the bank letting the engine into the river. A crew of men worked there nearly all night and succeeded in getting the engine back on the bank.

Mr. Gibson who operated the Hurd cannery last fall, arrived here from Portland the first of the week and is busy putting the cannery in order for business the coming season. This indicates that there is likely to be some competition for purchasing the fish caught on this stream this season, that ought to be of advantage to the fishermen. Wm. Kyle & Sons Co. will have their cannery and cold storage plant ready for business in a few days more. The two establishments will be in the market for fish, and the men ought to get better prices for their catch than is usually the case where the business is all in the hands of one individual.—The West.

Died

Aram Ulery, aged 68 years, died at his home near Leaburg Sunday, August 12, 1906, of heart trouble, after an illness of only a few days' duration. He had lived in the McKenzie valley a good many years. The funeral will be held Tuesday, with interment in the Leaburg cemetery.

BIG FIRE UP THE MOHAWK RIVER SATURDAY

Forest fires are burning in the vicinity of Mabel, above the Wendling mill on the Mohawk, and near the mouth of Winberry creek on Fall creek. Both are in the vicinity of Booth Kelly timber, but so far no great amount of damage is reported.

Both fires started about the same time Saturday evening. Within a few hours after the discovery a veritable army of men was fighting each and through their efforts the fires have been prevented from spreading to the green timber.

The fire up the Mohawk destroyed several hundred feet of logging road and chute belonging to Renninger & Button, but aside from this no damage has been done, as dead trees and underbrush have been the fuel for the flames. Reports from there today state that the fire is now in the open and is thought to be completely under control.

The Winberry fire is also reported to be under the control of the fighters and no green timber has been burned.

The excellent system of fire patrol maintained in this county by the Booth Kelly Co., the Weyerhaeuser and Wentworth timber concerns, the Southern Pacific Co. and others prevents any serious fires, such as are reported from the eastern end of Linn county, where at least one village has been wiped out and great damage done within the past three days. The system in Lane county is so well organized that within a very short time after a fire is discovered scores of men are on hand to stamp it out.

LOSS IS BIG.

Since the above was written and set up the Guard learns from a number of Eugene people who have just returned from a fishing trip up the Mohawk that the fire there is much more serious than was at first reported. Renninger & Button's log chute, which was 4000 feet long and which was recently built at a cost of nearly \$4000, has been almost entirely destroyed. It had been in use only three days. The firm had 15,000,000 feet of logs yarded in that vicinity and the fire has spread over them, entailing a big loss, the amount being hard to estimate, but it is thought to be in the neighborhood of \$7000.

The fire started near 12 o'clock Saturday night, supposedly from one of the donkey engines, but the engineer states that before quitting work he put out every spark of fire. The alarm was given and soon a large number of men from the Wendling and Highland mills were on the scene doing their best to stay the flames, but with little success.

The Eugene men say it was about the worst fire they ever saw. The roar of the flames could be heard several miles and heat felt hundreds of yards. The loss on the logs falls on Renninger & Button, as they had not yet delivered them to the mills.

DEATH OF ROBERT MOODY CHAPMAN

Robert Moody Chapman was born in Jefferson, Maine, on January 21, 1835, and died at Florence, Oregon, at 1:30 p. m. on August 8, 1906, of heart failure.

Mr. Chapman was married on October 25, 1884, to Susanna M. Brown, who survives him. To them were born two children, George and Flossie, both of whom reside with their parents.

Funeral services were held Thursday, being conducted by Rev. L. R. Bond, and the remains were laid to rest in the Masonic cemetery. Members of the G. A. R. and a large company of friends were present to pay the last tribute of respect to the departed.

Mr. Chapman was highly respected and esteemed in the community where he has resided for the past three years.—Florence West.

Born

At Hecceta Head, Lane county, to Mr. and Mrs. Wm. McCrae, a son.

The Pleasant Hill baseball team defeated a team made up of employees of the Springfield sawmill on the Springfield grounds Sunday afternoon by the score of 8 to 4. A good-sized crowd was in attendance. While the game was not as scientific as the big games played there the stunts pulled off by both teams were exciting and interesting.

EUGENE'S CITY WATER IS NOW PRONOUNCED ABSOLUTELY PURE

Dr. J. W. Harris, county health officer, about the first of the present month sent four samples of water, obtained from the city mains in as many different places, to the state board of health at Portland for analysis, to ascertain whether or not the water now being pumped through the new filters is contaminated. This morning he received the following letter written by the state bacteriologist to the state health officer:

Portland, Or., August 13, 1906. Dr. Robert C. Yenney, State Health Officer, Portland, Or.

Dear Sir:—The examination of the specimen of water from Eugene sent by Dr. Harris shows no contamination. There was an absolute failure to produce gas or even growth in fermentation tubes. Plates inoculated with varying quantities of the water failed to develop a single colony on any one.

This result is most remarkable and I fear an error somewhere before the water arrived here. It would be well to know just how this water was collected. Even the purest water usually shows some growth.

Very truly yours,

RALPH MATSON,

Bacteriologist of the Board.

Contained in the foregoing letter is the most gratifying piece of news received by the people of Eugene for a long time. They have been awaiting an official report on the water since the filters have been placed in operation with much anxiety, and now that the state board of health has pro-

nounced the water absolutely pure and without a trace of contamination they will rest satisfied and now believe that the Willamette Valley Co., the new owners of the city water system, have endeavored to and have kept faith with the people in their promise to furnish pure water.

Dr. Harris took the water just analyzed by the state bacteriologist from four different faucets, direct from the mains, as follows: At his own residence on Ferry street, between East Eleventh and East Twelfth; at the residence of J. A. McMahon on the corner of East Thirteenth and Oak streets; at the residence of Z. A. Davis at the corner of East Thirteenth and Mill streets, and at Linn's drug store on Willamette street. These places are widely separated and the water was taken from each on the same day, showing purity in all parts of the system.

The Guard recently and on two different occasions gave publicity to the fact that frequent analyses of the city water made at the request of the company after the filters had been installed proved it to be pure and fit to drink, but the people naturally desired an official analysis and an official report and would not be satisfied with anything short of that. The Guard is very glad to be the first to acquaint them with the result of the state health board's investigation of the water and as gratified to know that its predictions that the company would keep faith with the people in this regard have been proven correct.

VETERANS ARE INFIRM FROM OLD AGE

Minneapolis, Aug. 14.—The business sessions of the G. A. R. encampment opened today, the hall being filled with tottering veterans seeking old comrades. Many of them express the sentiment that this should be the last encampment, on account of the infirmities of the old soldiers. The railroad congestion is being relieved.

A fire in the Nicollet hotel this morning was extinguished after many were bruised, but none seriously hurt.

DEATH OF JOHN CONSER AT MILLERS

John Conser died at his home at Millers this morning. Two or three years ago he had a stroke of paralysis and has not been well since.

He was born in Knox county, Ill., Dec. 30, 1841, and came to Oregon when a boy in 1848, settling in Linn county, where he built up a splendid reputation as a man and citizen. He leaves a wife and two sons, Lester and Rockey, both living at home.

Mr. Conser was a member of a large family, many of whom are now living: Shan, Leo and Mrs. Mollie Thomas of Portland; George of Heppner, Mrs. Phoebe Watson of Chahalis, and Henry and Hope Conser of this county.—Albany Democrat

WARM WEATHER WILL HELP

Now Is the Time to Get Rid of Your Catarrh by Using Hyomei

Every one who is afflicted with catarrh should take advantage of the warm weather to get rid of this annoying and distressing disease, for the right treatment in August and September will give benefit much more quickly than in the winter and early spring.

The germ killing and health giving Hyomei when breathed in the summer months has an even more beneficial action than when used in the cooler weather. It is nature's own remedy for the cure of catarrh. It goes to the most remote air cells in the nose, throat and lungs, killing and driving from the system the catarrh germs.

Hyomei is the simplest, most pleasant and the only guaranteed cure for catarrh that has ever been discovered. It is sold at Hull's drug store under a guarantee to refund the money if it does not give complete satisfaction.

At this season of the year the first day's use of Hyomei will show a decided improvement in health and in a short time there will be no further trouble from catarrh. You take no risk in buying Hyomei. The complete outfit costs but \$1, extra bottles 50c and if after using you say it has not helped you, Mr. Hull will return your money.

TALL TIMOTHY, AS USUAL, IS AFTER BIG JOB

Portland, Aug. 13.—Ex-Governor T. T. Geer has entered the race for collector of customs. He has not been considered a candidate heretofore, but it is believed his chances are good. Both new senators are friendly to his appointment, which is not liable to be made until next year.

P. S. Malcolm, of Portland; J. M. Shelley, of Eugene, and G. A. Westgate, of Albany, are the other three candidates.

FOREST FIRES ARE STILL UNCONTROLLED

Albany, Or., Aug. 14.—The fire in the Santiam Mountains, after the rains yesterday, was checked somewhat, but today is burning as fiercely as ever. The flames have crossed the river into Linn county, and are burning in a fine stretch of timber. The fire is now ten miles from the point where it crossed the stream. This fire now threatens Hoover's sawmill, above Detroit, and is now traveling toward the summit of the Cascade Mountains.

Another fire has traveled up the Breitenbush river in the direction of Breitenbush Hot Springs. It has covered ten miles and burned over a wide area. Up to last night fully 70 square miles of timber has been destroyed, and the fire is again absolutely beyond control. Many camping parties in the mountains are returning, in haste, and others are believed to be cut off for the time being.

Cottage Grove Brevities

Ernest Parvance has resigned his position of electrician at the Oregon Securities Co. electric power plant, and will take a turn at living in town for a change.

The preparations for the new sawmill at the end of the O. & S. E. line are progressing rapidly. The railroad is pushing its work along, and at present is doing considerable blasting. The mill will be located on the Wm. George place and the owners hope to have it running within 60 days.

The Presbyterian church is giving its pastor, Rev. Grace, a month's vacation this month, in order that he may rest and enjoy himself. He will camp with his family out beyond the end of the O. & S. E. line. During his absence there will not be any preaching except as some supplies are present.—Leader.

The best disc plow is the Parlier & Orendorff Co.'s Canton Clipse 65 East Ninth street. dal3 #2t

Coburg Notes

Coburg, Aug. 14.—The funeral of Margaret Flynn, who died at Wendling Friday morning, was held at the residence of Hugo Hallin Saturday at two o'clock.

Mrs. F. H. Rosenberg and daughter

and Mabel were down from Wendling over Sunday. They were the guests of Mrs. Robertson.

Frank Skinner, brother of our worthy postmaster, is in Coburg again, after a year's absence. He has sold his ranch near Corvallis, and says Coburg looks good to him.

Miss Bettis is again at her post in

Sackett's store, after two weeks' rest. Mrs. John Gardiner is very sick with malarial fever. A consultation of doctors was held yesterday.

Makes children eat, sleep and grow. Makes mother strong and vigorous. Makes a healthy family. That's what Hollister's Rocky Mountain Tea does. Tea or tablets, 35 cents. Linn Drug Co.
