BRIDGE NEEDED AT LOWELL CROSSING

Boy Addington Came Near Drowning
While Forging There Few Days
Ago - News of Lost Valley and
Upper Willamette

(Special Correspondence.)
Lost Valley, May 22.—Roy Addington, while returning from "Pine Openings" Saturday, came near being drowned while fording the river at the Lowell crossing. Logs have jammed below the ford and have caused a great deal of back water. Roy got into swimming water and in some way the wagon overturned, holding him under the box. Only by great presence of mind and clever diving was he able to escape. A good bridge is badly needed at this point. If the honorable county court of Lane county cannot see fit to give us a bridge they might at least be liberal enough to give us a good ferryboat and ferryman.
Mrs. Minnie Calkins, of Marcola, was in the valley the past week, visiting her mother, Mrs. James Parr. We understand that there has been a wedding in our vicinity. The contracting parties were Harry Calkins, an employee of Parvin & Cruzan Bros., and Miss Ida Cruzan, of Zion. E. A. Wagner visited at Creswell Sunday. Wonder why?
Fred Parker visited at Creswell Sunday. What can be the attraction for the boys?
Parvin & Cruzan Bros. have their mill running at its full capacity with a full crew.
E. C. Morgan was a visitor at our Sunday school Sunday, May 19.
Rev. Moon held divine services at the Dexter school house Sunday. Two young ladies were baptized after the services.
Chas. Pogue, of Rush Island, passed through enroute to Eugene May 18.

DEXTER ITEMS

(Special Correspondence.)
Dexter, May 22.—Plenty of rain. Oregon never falls at the proper time. Hannah Johnson returned Saturday from a week's visit to Mohawk. She has been very ill since, but is much improved again.
Quite a number attended the Sunday school convention last Saturday at Cloverdale. They report a very pleasant time.
Eighth grade examination was held Thursday and Friday at the

Dexter and Trent schools. The children reported the examination to be a pretty serious affair.
Charlie Chandler and family are gone to Eastern Oregon to make a visit to Mr. Chandler's parents, whom they have not seen for a number of years.

DEATH OF MRS. C. E. DELANEY IN ALBANY

Albany, Or., May 17.—Mrs. C. E. Delaney, an Oregon pioneer of 1852, died last night at the home of her daughter, Mrs. N. C. Steele, in East Albany. She was 84 years old. She leaves three children: W. S. Delaney, of Hoquiam, Wash.; T. E. Delaney, of Gilt Edge, Mont.; and Mrs. N. E. Steele, of Albany. She was a former resident of Coburg, Lane county.

NEW POTATOES ON MAY TWELFTH

Mrs. C. J. Barhite has the thanks of the Guard for some fine new potatoes—the first of the season—raised on their place in this city. They had new potatoes large enough for table use on May 12.

WHAT IS CATARRH?

Catarrh is an inflammation of the mucous membrane of the nose, throat and lungs, with many annoying symptoms. In this climate there are few who do not suffer from this disagreeable disease, often in a chronic and dangerous state.
The one scientific and common sense treatment is Hyomei, a combination of healing and germ-killing balsams, which is breathed through a special inhaler that comes with every outfit.
A complete Hyomei outfit costs but \$1, and Mr. Hull gives his personal guarantee with every package that the money will be refunded unless the treatment cures.

CEMETERY NOTICE.

All persons interested in the Oak Hill cemetery will please turn out May 25, the Saturday preceding Decoration Day, to clean up and do needed work.

THOMAS BAILEY,
DAVID R. HILL,
D. M. PURKESON.

PCNIC

Goshen, Or., May 25, 1907, at Ellis' Grove. Bring your dinner and stay all day. Baseball, band, merry-go-round, sports. Program in forenoon.

All your friends are interested in your features. Remember Simmons, the artist, at 437 Willamette street.

At Baker City "old man" Krumpke of Sumpter pleaded guilty to incest upon his own daughter and was sentenced to ten years in the penitentiary.

Oats—Per bushel, 40c.
Bran—Per ton, \$21.
Mixed feed—Per ton, \$22.
Shorts—Per ton, \$25.
Wheat—Per bu., 70@75c.

Portland Market Report.

Portland, Or., May 23.—"The 1907 hop crop of Oregon and Washington will be at least 20,000 bales less than that of last year," said one of the leading hop dealers of the city today, after an investigation covering several weeks of the condition of the hop fields of this state and Washington.

"The shortage may be even greater than that," he continued, "for the fields are getting far from the attitudinal they had heretofore. Cultivation in all parts of the hop districts of this state and Washington is slack this year and a good many fields have been plowed up and planted to other crops by disgusted ex-hoppers."

"For this condition of things the present low price is, of course, responsible. There is now a fairly strong demand in the East for hops at 5 to 7 cents a pound, and sales are being made daily at these figures, but there is very little free selling on the part of growers, for the producers are naturally averse to selling hops that cost ten cents for five. We have to tell them that five cents a pound is better than a total loss, and taking this view of the situation the growers are parting with their crop."

"The indications are that the 1906 crop will be disposed of before the arrival of the new crop. While it is yet early to estimate the size of the 1907 yield, it can be safely said that

California's product, as well as that of Oregon and Washington, will be below the average, and from all information at hand it looks as if the entire American hop product this year will be materially under the normal. Little will be known regarding the outlook in the hop growing centres of Europe before the middle of June."

First Wool Sales.

The first wool sales of the season in this state will be conducted today at Pendleton. A large amount of wool will be offered, and although sentiment has been against the sale of stock at any figure under the price obtained a year ago, it is thought that values offered will be satisfactory and the sales will be a good success. However, all over the country the wool growers are aroused over the subject of lower prices and combinations are being formed among producers on every side. The latest plan now before the growers is for them to organize a sort of national trust. Although plans for this organization have been talked of before, nothing definite in the scope of the association has yet been settled.

Some propose that all wool growers get together in their own states and organize a state association from which delegates will be sent for the formation of a national league. From what can be learned the national association would thus control practically every pound of wool in the country and its representatives would do the selling to the mills. Each wool producer would become a member of the local association by taking so much stock in the organization. It is stated by those that advocate a national selling association that a better price could be obtained than if small individual clips were offered by the growers. It is also stated that cheaper supplies could be purchased by the organization than by individuals, and complaints of all kinds would receive more attention if fathered by a state or national organization than by a lone grower.

Refrigerator Line to the North.

According to a circular received by various commission men the Northern Pacific Railroad will, on June 1, establish a regular semi-weekly refrigerator car service to Puget Sound cities—Tuesdays and Thursdays—which will do much to foster the butter, egg and perishable goods trade between this city and the sound. The service will start the first of the month and will continue until September 30. Shippers will be requested to make shipments of such perishable commodities in these cars. On other days freight will be loaded in box cars and the company will not accept any claims for damages resulting from weather conditions when loaded in box cars. The announcement of this service is received with favor by local jobbers.

Still Great Strawberry Scarcity.

There was another great scarcity of strawberries along the street this morning, and in consequence prices ruled high. For California Dollars,

the price was very firm at \$2.25 per 15-box crate, and for Oregon values ranged between 20 and 25 cents a box.

Apple market remains very firm, with fancy stock bringing as high as \$3 a box.
Market still shows scarcity of cabbage and price is firm at 3c.

Portland Quotations.

Creamery butter—20 @ 22 1/2c.
Eggs—17 1/2 @ 18c.
Chickens—13 1/4c.

Potatoes—\$2 per cwt.; new, 5 1/2c pound.
Onions—\$1.25 @ \$2 per cwt.
Chittim bark—5c per pound.

FOR STOMACH SUFFERERS

Mi-o-na is the one remedy for stomach troubles that publishes its formula; chemically pure bismuth subgallate, to allay any inflammation of the stomach and bowels; cerium oxalate, to strengthen the stomach nerves; sodium bi-carbonate, to neutralize the poisonous acids that the present in stomach troubles; and nux vomica, which restores vigor to the digestive organs and tones up the whole nervous system.

This combination of valuable remedies is found only in Mi-o-na stomach tablets, and it so rarely fails to strengthen the digestive system and cure even the worst forms of stomach trouble that Hull's drug store sells the remedy under a guarantee to refund the money unless it cures.

Monday, May 20, Grandma Mary Ramsey Wood, of Hillsboro, Or., celebrated her 120th birthday. As far as is known Mrs. Wood is the oldest living woman. A few days she had one of her accustomed sinking spells and it was feared the end was near, but she rallied, and today her health is apparently as good as it was 12 years ago. Many times her family of children, grandchildren and great-grandchildren have gathered about her bedside expecting the spark of life to fall, but each time her wonderful vitality has carried her through. Her memory is something wonderful.

A. M. Slayter, of Blachley, was in the city one day this week. He is looking for dairy cows and is anxious to purchase a number to add to his herd.

L. E. Meyer arrived from Florence enroute to Tacoma, where he expects to reside in the future.

Chiropractic is a Drugless System

and should not be confounded with massage, magnetic or hypnotic treatment, as it bears no resemblance to any of them. Chiropractic is not osteopathy, but reaches many diseases that osteopathy can not reach. Chiropractic is based upon these two principles:

First—Luxation of bones causes pressure on nerves.

Second—Pressure on nerves causes disease.

The Chiropractor's business is to take off the pressure. Our philosophy of taking off the pressure has the most rational claim upon all sufferers. We give a logical reason for the cause of disease and we do not treat effect. We adjust the cause.

Marvelous results follow our system of body adjustments, and we stand ready to give you abundant testimony of cures—permanent cures—wonderful cures.

If you have any of the following ailments, stop taking drugs go to Dr. Briggs and have him take off the pressure:

Apoplexy	Eczema	Meningitis
Asthma	Emissions	Neuralgia
Appendicitis	Erysipelas	Nervous debility
Abscess	Female diseases	Ovarian diseases
Bladder trouble	Goitre	Palsy
Bright's disease	Gall stones	Paralysis
Blood diseases	Hay fever	Pleurisy
Brain fever	Heart disease	Pneumonia
Cholera morbus	Hysteria	Piles
Childbed fever	Insomnia	Rupture
Cancer	Indigestion	Rheumatism
Catarrh	Jaundice	Scorlet fever
Constipation	Kidney disease	Sciatica
Diabetes	Liver disease	St. Vitus' dance
Diarrhoea	Locomotor ataxia	Spleen disease
Dropsy	Lumbago	Spinal disease
Dyspepsia	Mumps	Tumors
Deafness	Malarial fever	Urinary disorders
Epilepsy	Measles	
	Consumption in first stages	

If your ailment is not on this list, please bear in mind that this space is not as large as a medical dictionary. We make it possible for nature to cure all diseases without drugs or knives. This means your disease. With interrupted nerve force, health is impossible. Without nerve force the blood can not circulate properly. A lack of circulation means strangulation and strangulation causes many diseases, such as dropsy, tumors, running sores and the various so called skin diseases. Chiropractic (nature's cure) frees the circulation, thereby permitting the refuse to be thrown out of the body through the natural channels. Pressure upon the nerves causes such diseases as paralysis, rheumatism, neuralgia, asthma, female diseases and the various diseases of the stomach, liver and kidneys. As all the motor and sensory powers are derived through the nerves, it is plain to be seen that the nerves should be free from all abnormal pressure. Strange, but true, all the nerves of the body may be acted upon by the hands, and we have demonstrated that fact by the many marvelous cures effected by us through this wonderful science of Chiropractic. If you have been unable to get any relief, come to us and we will cure you. Offices, 516-511 Stearns Building, Portland, Oregon. Office hours, 9 to 12 a. m., 1:30 to 5:30 and 7 to 8 p. m. Phones, Home A1799 and Pacific States, Main 6799. Reference and testimonials furnished at the office.

Specialist on all Nervous and Chronic Diseases.

DR. BRIGGS, Chiropractor
PORTLAND, OREGON

County Clerk Lee today received copies of the general laws of Oregon for distribution to all the county officers, also copies of the statutes relating to bridges, roads, highways, and

ferries, which will be sent to all the road supervisors in the county.
