

You Will Need an Oil Stove

When warm days and the kitchen fire make cooking a burden—then is the time to try a New Perfection Wick Blue Flame Oil Cook-Stove.

Marvelous how this stove does away with kitchen discomforts—how cool it keeps the room in comparison with conditions when the coal

fire was burning. The quick concentrated heat of the

NEW PERFECTION

Wick Blue Flame Oil Cook-Stove

goes directly to boil the kettle or bake the bread, and none is diffused about the room to overheat it. Thus using the "New Perfection" is real kitchen comfort. Made in three sizes and fully warranted. If not with your dealer, write our nearest agency.

The **Rayo Lamp** Just such a lamp as everyone wants—handsome enough for the parlor; strong enough for the kitchen, camp or cottage; bright enough for every occasion. If not with your dealer, write our nearest agency.

STANDARD OIL COMPANY, (Incorporated)

MAKE YOUR OWN STOCK FOODS BY USING THE SKIDOO HORSE AND CATTLE TABLETS

Crush and mix in feed or salt. Proper dose in tablets. MAKES YOUR STOCK LOOK LIKE THE TOP PRICE

Contain no Sawdust, Ashes, Chop Feed or Bran. Ask for and try once—SKIDOO Condition Tablets, Worm, Kidney, Chicken Cholera, Blister, Heave, Fever, Hog Cholera tablets, Louse Powder, Spavin Cure, Barb Wire Lintment, Pink Eye, Distemper, Colic or Bone Stiffener Tablets.

TAKE THE BLUE BELL LINE TO HEALTH THEY MAKE YOU FEEL LIKE A BLACKSMITH

Ask for and try once BLUE BELL Cough Syrup, Pile Remedy, Man's Pain Lintment, or BLUE BELL Stomach Tablets, Diarrhoea, Croup, Nerve, Cough, Hay Fever and Catarrh, Blood, General Tonic, Bright Sunshine, Heart, Worm, Kidney, Headache, Summer Complaint, Soothing Tablets for Children, Liver, Female Regulator or Quinsy Tablets.

COUNCILMEN INSPECT CREEKS UP THE M'KENZIE

RITCHIE, JOHNSON AND FOREST CREEKS EXAMINED BY EUGENE PARTY

RITCHIE SEEMED TO CARRY MORE AND BETTER WATER THAN OTHERS—COUNCILMEN ARE ACCOMPANIED BY SEVERAL ENGINEERS, NEWSPAPER MEN AND OTHERS

(From Saturday's Daily Guard.) Seven members of the city council, accompanied by fourteen other individuals, went to Leaburg yesterday and investigated the creeks in that vicinity, looking into the advisability of installing a gravity water system with one or more of the streams as the source of supply. The creeks investigated were Johnson creek, a quarter of a mile above Leaburg, Ritchie creek, about the same distance above the little McKenzie village, but across the river, and Forrest creek, on the same side as Ritchie creek, but a mile and one-half below. Water was found aggregating in the neighborhood of 5,000,000 gallons a day at the present time and of the best quality.

Johnson creek first came under the eyes of the councilmen. There was a good supply of pure and cold water. The flow, from estimates made in the past, and in comparison with other streams, must be at this season slightly under 2,000,000 gallons a day. From estimates made last October, at the lowest stage, there flowed down its bed something like 1,300,000 gallons per day. The method used was by the most accurate known to hydraulic engineers. Earlier in the season a meter estimate showed several hundred thousand gallons additional, but this method is generally inaccurate for final conclusions. The stream, according to the statement of a resident, is about three miles in length, heading on Mount Nebo. The source springs are protected by a heavy growth of timber, but it seems that through the middle of the watershed of the creek there is a comparative open country. The land near the mouth of the creek is timbered, though logging operations are now being conducted there.

Forrest Creek. In the case of a further demand the waters of the other creeks could be run into the pipe line. In low water it is estimated that Forrest creek, on the old Major Forrest place, now owned by N. L. Fitzhugh

The character of the bottom of the creek at the mouth is gravelly and slightly muddy, but it was said, that further up it became very rocky. Another resident said that in summer this creek is warm, and becomes slightly tainted from vegetation.

Ritchie Creek. Ritchie creek was next visited, the members of the council ascending its bed for over a half a mile. This stream measured to be far the largest of the three, and the visitors expressed themselves in admiration of its crystal waters, which fell toward the river with great rapidity. The bed is deeply shaded by trees, which promise to keep the water cool in any summer. One estimate by an engineer present gave the number of gallons running down per day as 2,000,000. Councilman Garrett visited the stream during its lowest stage last year and expressed the belief that it was not then one-third less than at present. The estimates of engineers, the opinions of residents in that section, and the purity of the water seemed to point to this creek as the best of the three.

Logging has been conducted in the past near the creek, but it is not now being done. From views of the watershed obtained, it has been partly burned over a long time ago. Opinions of several people seemed to indicate that very few cattle ranged upon the Ritchie watershed, but that quite a number stayed in the vicinity of the Johnson creek and Forrest creek head waters. The stream is said to be about three miles long, but with water equal in quality to any in the country.

Last rain the stream was running during the low stage 1,300,000 gallons per day by the weir method. From figures obtained by meter, Eugene has used 1,000,000 gallons of water in a day through the present pumping system in the season of irrigation. Much of this undoubtedly is waste which may be avoided. Ordinarily including waste, City Engineer Waggoner thinks that 300,000 or 400,000 gallons a day are used. A great deal of this he classifies as needless waste, the present Eugene system being notorious for its extravagance of water. Some of the members of the party thought twice as much is wasted in Eugene as actually goes through the faucets. This, of course, is but opinion. The engineers of the party could give no accurate figures of the waste in a twenty-two mile pipe line, but seemed inclined to think that it would not be great, thus making it appear that Ritchie creek would amply supply the present needs of the city.

Dinner was served by the famous cook, Mrs. Kennedy, the meal being the best that had teased the finicky appetites of the city fathers for many a week. Chief of Police Farrington, accompanied by several self-appointed deputies, made a vigorous search for a Kentucky "moonshine" still, of which they had heard some reports, but failed to discover any law-breakers.

Those who made the trip were: Councilmen Berger, Garrett, Williams, Gilbert, Fisher, Moon and Rouse, Chief of Police Farrington, City Engineer Waggoner, Engineers C. A. McClain and Joe McArthur, of the engineering firm of McClain & McArthur, Engineer Simon Kivodahl, F. B. Davis, an engineer from Portland, Judge J. J. Walton, Geo. Rein, Sam Taylor, John Bovard, instructor in biology at the University, P. J. Kolker, a brother-in-law of Mr. Berger, Otto Gilstrap, of the Register, and Earl F. Strong, of The Guard. The party was transported in two big stage hacks under the care of veteran drivers.

ENGINE BLOWN UP IN BUTTE, WITH LOSS OF LIFE

Butte, May 2.—The remains of Engineer Charles Bussy, killed by the blast when the Burlington eastbound express was dynamited last night, was found under the engine this morning. Daylight found a large force of deputy sheriffs, railway detectives, police and ranchers on hand but no clue to the perpetrators or motive was secured.

Carl Ming, a hobo, who carried a carpenter's union card issued at Sheridan, Wyo., died of his injuries today. Fireman Ehle is progressing satisfactorily at the hospital. The first tangible clue was secured when the detectives traced the powder used to a mine about a mile from the scene of the explosion. Forty-five sticks of giant powder had been stolen from this mine after 10 o'clock last night. It is believed now that the entire charge was used, as the engine, one of the largest used in the mountains, was demolished.

It is learned this afternoon that Ming was a resident of Council Bluffs, Iowa. Ehle, the fireman, took a turn for the worse and will probably die. Both he and Ming were burned internally by steam. The Northern Pacific will offer a reward of \$5000.

Butte, Mont., May 1.—Eastbound Burlington train No. 6, due in Butte at 11:30 o'clock tonight, was dynamited about a mile west of the Northern Pacific station at 11:37 last night. The explosion caused the first or helper engine to leave the rails but it moved along for a few hundred feet without turning over. The second engine crashed into the bank south of the track a few car lengths from where the explosion occurred.

Trainmen Suffer Worst. Every person on the train has been accounted for excepting Engineer Bussy, of the second engine, who is supposed to be buried under in locomotive. Charles Ming, who was riding on the blind baggage, had to be taken from the mass of timbers under which he was buried. His arm and leg were broken. Fireman George Ehle, of the second engine, was badly scalded.

PLEASANT TRIP. The party of twenty-two men left Eugene at 5:45 o'clock in the morning, arriving back at 7:30 last evening, thoroughly tired. Mayor Matlock did not accompany the party on account of his absence in Southern Oregon, and I. N. Harbaugh, a member of the council, was also unable to go. The members of the council were well pleased with the trip and now have a more thorough knowledge of the situation. The allurements of fishing did not tempt them seriously, one giving in to his lusty love of the rod for an hour, during which he caught one insignificant brook trout, and another member of the party landed three brook trout after a couple of hours' exertion in Ritchie creek.

NATURE AND A WOMAN'S WORK

LYDIA E. PINKHAM

Nature and a woman's work combined have produced the grandest remedy for woman's ills that the world has ever known.

In the good old-fashioned days of our grandmothers they relied upon the roots and herbs of the field to cure disease and mitigate suffering.

The Indians on our Western Plains to-day can produce roots and herbs for every ailment, and cure diseases that baffle the most skilled physicians who have spent years in the study of drugs.

From the roots and herbs of the field Lydia E. Pinkham more than thirty years ago gave to the women of the world a remedy for their peculiar ills, more potent and efficacious than any combination of drugs.

Lydia E. Pinkham's Vegetable Compound is now recognized as the standard remedy for woman's ills.

Mrs. Bertha Muff, of 515 N.C. St., Louisiana, Mo., writes:

"Complete restoration to health means so much to me that for the sake of other suffering women I am willing to make my troubles public. For twelve years I had been suffering with the worst forms of female ills. During that time I had been different physicians without help. No tongue can tell what I suffered, and at times I could hardly walk. About two years ago I wrote Mrs. Pinkham for advice. I followed it, and can truly say that Lydia E. Pinkham's Vegetable Compound and Mrs. Pinkham's advice restored health and strength. It is worth mountains of gold to suffering women."

What Lydia E. Pinkham's Vegetable Compound did for Mrs. Muff, it will do for other suffering women.

Dr. T. Felix Gouraud's ORIENTAL TOILET POWDER

A pure, antiseptic Toilet Powder for infants and adults. Exquisitely perfumed. Renders an excellent complexion and keeps the skin clear, soft and velvety. Relieves skin irritations and should be used freely after bathing and shaving, giving a delightful and refreshing effect. At dealers or by mail, 25 cents per box. Prepared by FERD. T. HOPKINS, N.Y. CITY, Proprietor of GOURAUD'S ORIENTAL TOILET POWDER FOR SALE AND RECOMMENDED BY

STANLEY'S, 612 Willamette St., Eugene

UARDAS LIQUID FACE POWDER

A DELIGHTFUL LIQUID FACE POWDER. Imparts a pleasing softness and delicacy to the skin and restrains the ravages of sun, wind and time. Its continued application eliminates sunburn, tan and freckles and renders imperceptible annoying minor blemishes and sallowness. It possesses a dainty, clinging odor exclusively its own and is in every way a perfect toilet luxury. Price 50 cents. Ask your druggist for it. HOYT CHEMICAL CO. SALT LAKE CITY

STONE'S HEAVE DROPS

Greatest known remedy for heaves. Highland, Cr., Oct. 31, 1902—This is to certify that I gave my mare one bottle of "Stone's Heave Drops" and cured her of heaves. This was last winter and she has not been affected since.—G. Wallace. DR. S. C. STONE, Salem, Or. For sale by all druggists. \$1.00

Bargain Day For NEWSPAPER READERS

The Eugene Daily and Weekly Guard will have the SECOND ANNUAL BARGAIN DAY this year on

Monday, May 11

Anyone who will pay in advance for the paper on or before that date, whether an old or new subscriber, will receive the Guard at the following prices:

Daily Guard, by mail, \$2.75 per year
Weekly Guard, by mail, \$1.00 per year

These prices apply only to mail subscriptions, and will positively be withdrawn after May 11th, 1908.

This Bargain Day offer is made solely for the purpose of putting our subscription list on a cash basis, the postoffice having ruled that no paper can be sent through the mails at second class rates upon which there is due one or more years' subscription.

The Weekly Guard is a big 12-page paper containing a full local and general news report, court proceedings, real estate transfers, neighborhood correspondence and a serial story full of interest.

The Daily Guard prints eight pages daily, with complete Associated Press Report.

At these bargain prices the Daily and Weekly Guard are the cheapest papers printed in Oregon. Send in your subscription on or before

Monday, May 11, 1908.

BARGAIN DAY COMES BUT ONCE A YEAR

If you want the TWICE-A-WEEK JOURNAL send 75c extra

QUIET MAY DAY IN NEW ENGLAND

Boston, May 1.—May day in New England, which is usually a day of industrial disturbance, was this year one of the most peaceful on record. About one hundred thousand textile operatives are idle or working on short time, and about forty per cent of the machinery is idle. Business has improved about fifteen per cent since January, but the cotton cloth business continues poor. About forty per cent of the spindles are stopped.

PRESIDENT SIGNS FULTON RESOLUTION

Washington, April 30.—The president today signed the Fulton land grant resolution. The house public lands committee today discussed Mondell's latest land grant resolution, which was intended to follow the Fulton resolution. In view of the bad faith of the lumbermen, the committee was overwhelmingly opposed to reporting the measure, especially if the same can be accomplished without legislation. The committee instructed Chairman Mondell to confer with the attorney-general as to the advisability of issuing an official statement proclaiming it to be the purpose of the government to allow the present holders of granted lands to continue in possession of them and use them pending the determination of legislation, and also as to the advisability of warning all intending settlers that the land is not open to settlement, for filing, while suit is pending.

SMITH'S SUIT AGAINST FULTON DISMISSED

Salem, May 1.—The damage suit for \$5000, brought against United States Senator Charles W. Fulton by J. S. Smith, was dismissed by Judge Bennett today because of the failure of Smith to file an amended complaint after a demurrer had been sustained. Fulton was also adjudged costs amounting to \$30.

THOMAS J. HEFLIN, Alabama congressman who is under bond for having shot a negro in a street car in Washington.

REPUBLICAN STAFF CENTRAL COMMITTEE YESTERDAY

That the state central committee is hostile to Senator Bourne and will not accept his nomination in the selection of delegates to the Chicago convention is apparent from the fact that a resolution was adopted unanimously and without discussion endorsing Secretary Taft for president and recommending that the Republican state convention send to Chicago a delegation pledged to his support. The record of Senator Fulton was approved, and recent attacks on the senator were denounced as "vicious, untrue and unmanly." The same resolutions warmly endorsed H. M. Calk for senator, and pledged the Republican nominee to the loyal support of the committee in its candidacy. The committee effected organization by electing W. M. Calk as chairman and Otis Patterson, of Grant county, secretary. Both officers were selected unanimously.

ATELL OUTCLASSED TOMMY SULLIVAN

Coliseum, San Francisco, April 30. Hopelessly outclassed, "Brooklyn Tommy" Sullivan, of St. Louis, made a sorry showing tonight against the American featherweight champion, Abe Attell. Sullivan succumbed in the fourth round, when he was floored three times, and the police jumped into the ring and stopped the fight. Sullivan was completely knocked out. Attell took the lead at the very start, and after the first round, in whenever he pleased, it was easy to see that the contest was of short duration.

Mrs. P. Pennington had one of her legs amputated yesterday at the Eugene hospital. She has been troubled a great deal with the limb and finally her physicians advised amputation. Dr. Scaife was the surgeon in the case.
