COLONS' REPORT ON UNIVERSITY IS FLATTERING

Legislative Committee, Upon
Investigation, Finds Total
Attendance Is 1100

The committee of the legislature, which visited the University on February 12, 13 and 14, has made the following report:

Salem, Ore., Feb. 18, 1909.

The Senate and House of Representatives:

We, your joint committee, appointed

under Senate Concurrent Resolution, No. 19, to visit the University of Oregon, at Eugene, Oregon, beg leave to report as follows:

The committee went to Eugene on Friday evening, February 12, 1909, and remained there until the morning of February 14, and devoted their attention to visiting and inspecting the various departments of the University.

The University buildings are located in the suburbs of the city of Eugene, near the head of the Willamette valley, also near the head of navigation on the Willamette river.

The location of the city, and of these buildings, is one of great scenic beauty, and the topography of the land is such as to render it susceptible for good drainage, thus insuring excellent sanitary conditions. Many of the distracting influences which frequently prevail around a large city, do not exist at Eugene. Students attending the institution are there for the school advantage alone, with nothing to attract attention from the work before them.

The state has recently acquired title to the thirty-six acres of land, in addition to that already owned, making a total of sixty-three acres occupied as a University site.

We found the buildings of the University to be as follows: Deady Hall, which contains the biological and physical laboratories, and departments of Latin, Greek, French, German and English literature; Villard Hall, which contains the offices of the president, the registrar and steward, the Assembly hall of the University, the Condor geological collection, the departments of geology and mathematics; McClure Hall, devoted to the departments of chemistry and mining, psychology and psychological laboratory; Mechanical Hall, containing the central lighting and heating plant of the University, and the departments of civil and electrical engineering; testing the strength of timber, stone and metals; the gymnasium; the men's dormitory; the girl's dormitory, erected in 1907, and

which accommodates about 20 girls; the library building which contains, besides the library, the departments of Rhetoric and American Literature, Philosophy and Education, Economics and History. The new engineering building, just completed at a cost of about \$7,000, which will be occupied immediately to relieve the crowded condition previously existing in this department. The grounds of the University are being put in good conditions as rapidly as possible.

The library is especially an attractive building, and its appointments are such as to merit the admiration of anyone who is familiar with libraries and their conveniences. The details, the lighting, arrangement of books, its location on the grounds being near the main entrance, are all especially desirable features.

We might also make special mention of the civil engineering building of this department of the work. It is comparatively new, and the marked increase in attendance over that of last year shows, in a gratifying manner, the close relationship existing between the mechanical and the higher literary work.

The present attendance at the University shows an increase of 35 per cent over that of last year, attributable, in a great measure, to the permanent appropriation made by the last legislative assembly, and, later, ratified by the people.

The present actual attendance at the institution is 540, to which, if we add the attendance in the law and medical departments, gives an attendance of over 800, and adding, still further, the correspondence school, which is now becoming a very important feature of the work of the state University, makes a total enrollment, in all the departments of the institution, of something over 1100.

We might mention, in connection with this, that a loan fund has been created, by contribution, which now amounts to \$2400, the principal of which provides an annual interest to be used in aiding students who are especially needy and deserving, they

to pay a low rate of interest, the same to be returned after they have completed their courses; and, so far, money so loaned, has been returned.

The steward of the institution, L. H. Johnson, has charge of the janitors of all buildings on the grounds. These men are selected with reference to their fitness to perform the work required. One is a carpenter, another a painter, and another a brickmason. So, in addition to their other duties, they are also able to make repairs and improvements around the buildings, which is a great saving of expenses to the institution.

The purpose of the regents, is, during the coming year, or soon, to erect a new gymnasium, and a new dormitory for girls.

The system of keeping accounts of all financial transactions for the institution is especially worthy of mention. Every item of purchase is passed upon, in advance, by the President of the University and by the board of regents. Orders are then made for the purchase, and warrants are drawn on the secretary of state, so that the funds of the institution are not in the hands of the board of regents, but warrants are drawn by the secretary of state upon the state treasurer. No money is handled at the University, except a small contingent fund required for immediate expenditure. And a bill has passed the house requiring that this fund be paid to the state treasurer and is disbursed in the same manner as other funds.

One matter we consider a subject of importance in the report to this legislature, is with reference to the Condor collection, which is a museum of geological and fossil collections, the result of the life work of the late Professor Thomas Condor, of that institution, a man who has perhaps done more than any other on the Pacific coast to develop the science of geology, especially as it relates to the state of Oregon. This collection is left to his estate as the property of his heirs.

Since his decease the state has been paying a small rental for the use of this large museum. Other states are willing and anxious to secure this collection, and it would be an irreparable loss to Oregon to allow it to leave the state. Its value is estimated from fifteen to thirty thousand dollars, and those who are capable of judging say this is a low estimate.

The heirs have signified a willingness to sell the same to the state of Oregon for fifteen thousand dollars, and the regents of the University are desirous of buying the collection. No appropriation will be asked from the state for this purchase, as the funds of the institution are now available for this use. The regents simply want authority from this legislative body to make the purchase, so that it may become a permanent asset of our state, and we recommend that this body authorize the regents to buy the same.

In conclusion we would state that the standard of admission to the University of Oregon is the same as that adopted by the best American Universities, and the range of the course of study compares favorably with the universities of other states. With the means at hand, the University will be able to make the most needed improvements, and to carry on the university, with the present standing appropriation, therefore we would not make any recommendation for any further appropriation by the present session of the legislature.

Geo. M. Miller has sold three lots in the City View Park to P. J. White, recently from Helena, Mont., and one lot in Campbell's addition to John Carille of Crow.

to pay a low rate of interest, the same to be returned after they have completed their courses; and, so far, money so loaned, has been returned.

DRY FARMING CONGRESS MEETS AT CHEYENNE

Cheyenne, Wyo., Feb. 23.—With more than six hundred delegates present and hundreds more to arrive on belated or snowbound trains, the third trans-Missouri Dry Farming Congress opened sessions here today. It will continue three days and it is confidently expected that during that time work of the utmost importance and benefit to the semi-arid regions of the country will be accomplished.

A blanket of snow a foot deep in Cheyenne greeted the delegates. Today's programme included an address of welcome by Governor Brooks, president of the congress, and reading of papers by delegates.

President Roosevelt sent the following letter, which was read to the convention:

"My dear Governor Brooks: I wish to extend to you greeting and congratulations upon your third annual meeting. I am deeply interested in the progress of your work. Any organization having for its purpose the development of the agricultural resources of the great semi-arid section of the United States should have the hearty support of all good citizens. I am in full sympathy with the efforts and appreciate the hardships, privations and difficulties with which the pioneers among the mountains and on the great plains have had to contend. Rest assured that so far as lies within my power everything that can be done to aid you will be done. The reclamation of our arid lands through irrigation and the conservation of our forests and other natural resources and the development of our semi-arid land by such methods as you are now advocating all tend to insure the well being and growth of this country. I trust that your meeting will be a great success and will result in action that will command the confidence and support of the home builder, the man for whom we are all working.

"Sincerely yours,
"THEODORE ROOSEVELT."

MR. AND MRS. OSBURN BANQUET BUSINESS MEN

Mr. and Mrs. W. F. Osburn of the Hoffman House, entertained 24 business men of the city at a banquet at the hotel last night at which time the matter of a new hotel to be managed by Mr. and Mrs. Osburn and to be built at the corner of East Eighth and Pearl streets at a cost of about \$100,000 was thoroughly discussed. Articles of incorporation of the Osburn Hotel Co., will at once be prepared and filed with the county clerk and secretary of state. S. B. Eakin, D. A. Paine and W. F. Osburn were named as a committee last night to prepare the articles and M. Starnved, C. S. Frank, W. J. Warnock, Melvin Hansen and F. J. Berger were named as a committee to raise the necessary \$30,000 to make the \$100,000 fund required, \$70,000 having already been subscribed. If it is impossible to raise the additional \$30,000 it is proposed to issue bonds for that sum.

EUGENE ELKS MAY ALSO ERECT FINE HOME FOR LODGE

The Eugene Elks are determined not to be outdone by their brothers at Albany, and are talking of erecting the finest Elks' temple in the state outside of Portland. They own the property which they now occupy, but the hall is becoming too small for the rapid increase in members and they will soon need a larger meeting place. It is said that the lodge contemplates selling the property and will erect either this year or early next a splendid block four or five stories high in the business section of the city. Prominent members are now quietly working to secure a suitable location. While the matter has not yet come before the lodge in an official way, it is said that there is little doubt of the consummation of the project.

HUNZICKER'S PLANS ACCEPTED FOR NEW SCHOOL BUILDINGS

The Eugene school board had a meeting last night at which time the plans for the two new grade school buildings, one to be erected in Fairmount and the other in the Fair Grounds addition, were accepted from Architect Hunzicker. Bids for the construction of the buildings will be advertised for at once.

Each building will contain eight rooms and will be 71x65½ feet in dimensions. It is planned to finish at present, only the four lower rooms in the building to be erected in Fairmount and finish up the others as fast as the increase in population of that portion of the city demands.

Each building will have a full basement which will contain the heating plant, play rooms, etc. The buildings will be heated by steam. The recitation rooms will be of uniform size, 25x32 feet in dimensions. The rooms will be lighted only from one side, which will be almost of solid glass.

Lizzie M. Miller today began suit in the circuit court against Emily Hovey and Idaho F. Campbell, administratrix of the estate of Ira L. Campbell, deceased, for the partition of certain real property at Eugene. F. H. Greenman is attorney for the plaintiff.

Kodol for Dyspepsia and Indigestion does the ordinary work of the stomach, so that by taking a little Kodol every now and then you can not possibly have indigestion or any form of stomach trouble. Sold by all druggists.

Traveling Passenger Agent W. H. Jenkins of the S. P. Co., was at Creswell today looking over the prospects for business to be created by the company which has recently been organized there to sell off a large acreage of fruit land to new settlers, invited to attend.

DeWitt's Carbollized Witch Hazel Salve, the original, is good for anything when a salve is needed, and is especially good for piles. Sold by all druggists.

EQUAL SUFFRAGE BILL ENACTED AT OLYMPIA

Olympia, Wash., Feb. 23.—The legislature has passed the woman suffrage bill, the senate adopting the measure today without debate. The bill provides for the submission of a constitutional amendment at the next general election.

In the house today bills were introduced providing for a bank deposit guarantee act, no seat no fare street car bill, a bill repealing the present law prohibiting the sale of cigarettes.

A bill passed the senate today repealing the Sunday closing law, except in places.

RURAL CARRIERS WILL WORK FOR STATE MEETING

(From Tuesday's Daily Guard)
The American County Rural Mail Carriers' Association held its annual meeting in the Fairmount hall yesterday afternoon and elected the following officers for the ensuing year:

President, W. H. Boyd, of Eugene; vice president, Frank Lacey, of Creswell; secretary, Charles Towne, of Junction; treasurer, J. W. Smith, of Springfield.

The meeting was opened by an address of welcome by Councilman T. H. Garrett, John H. Hartog, manager of the Commercial Club, also spoke, and urged that the association put for the state convention of mail carriers for Eugene next year. The following carriers were in attendance:

Mr. and Mrs. Frank Lacey, Creswell; M. C. Davis and J. W. Smith, Springfield; Mr. Inwall, Irving; L. Tower, A. E. Tower and Chas. Tower, Junction City; Mr. and Mrs. J. H. Maxwell, W. H. Boyd and J. C. L. Woolley, Eugene.

BIG FINE ON RAILROAD OFFICIAL

Washington, Feb. 23.—The verdict of the United States circuit court for the southern district of New York, imposing a fine of \$108,000 upon the New York Central Railway for granting rebates to the American Sugar Co., was today affirmed by the United States supreme court.
