a very busy one, resulting in a dete-

The Facts About Pe-ru-na.

Is Peruna an alcoholic beverage in diaguise? Is it possible to use Peruna as a substitute for whiskey? Do people buy Peruna and use it as a toddy, or a bitters, or a bracer?

It would be the easiest thing in the world for any one to demonstrate the falsity of such statements. Let any one go to the drug store and purchase a bottle of Peruna. Let him undertake to use it as a beverage, or take this remedy in doses considerably larger than those prescribed on the bottle. Would the result be alcoholic intoxication? Nothing of the sort. Let any one try it and see.

Peruna is a medical compound quite heavily loaded with medicinal ingredients. If taken in doses larger than prescribed it would produce a positive drug effect. No one could take it as a beverage. If any one doubts these statementa, try it and see. We know that Peruna cannot be used as a beverage; that it will not intoxicate; that it cannot be used as a substitute for liquors. We guarantee that PERUNA CONTAINS NO CHEAP WHISKEY-OR ANY OTHER WHISKEY, for that matter.

It contains a small per cent. of cologne spirits, absolutely essential to dissolve and hold in solution medicinal ingredients, but the drugs contained in Peruna prohibit its use as a beverage. It would be the easiest thing in the world for any one to demonstrate this if they chose to do so.

Peruna is sold everywhere. THE INGREDIENTS ARE PLAINLY PRINTED ON EACH BOTTLE. It has been said over and over again that chemists have analyzed Peruna and found it to contain only cubebs and whiskey. Now we challenge any chemist to demonstrate any such statement. Let any one who has even a smattering knowledge of chemistry purchase a bottle of Peruna and see whether or not it contains whiskey, find out for himself whether or not it is composed of cheap whiskey and cubebs. Of course, cubebs is one of the ingredients of Peruna, but there are many other ingredients. It contains hydrastis canadensis, corydalis formosa, collinsonia, and at least four other medicinal ingredients. To be sure, no chemist could so analyze Peruna as to be able to identify the various medicinal ingredients. This is beyond the ability of any chemist. But any ordinary chemist would be able to say that Peruna is heavily loaded with medicinal ingredients of some kind in addition to cubebs.

Now why are these statements repeated when their falsity could be so easily demonstrated? Simply because there is continued hostility toward Peruna on the part of the medical profession. Very likely the magazines which took up the crusade against Peruna and denounced it as a cheap beverage were misled by statements of the medical profession. Probably they were sincere in their attitude towards it. But now, after all these things have been said and refuted, it would seem to be in order for such people to use a little fairness and common sense in the matter.

Every time any one says that Peruna is nothing but cheap whiskey and cubebs he is telling a lie, an absolute falsehood. Most people intend to speak the truth. But the prevalent habit of repeating other people's statements, without investigation as to their truth, has led many well-meaning people to say these false things about Peruna.

Used according to the directions on the bottle, PERUNA IS A SAFE AND RELIABLE CATARRH REMEDY, but, like any other good medicine, if taken in excess of those doses, it will produce drug effects very unpleasant to the person who takes it.

It is therefore up to every honest person to quit making such statements concerning Perun , or acknowledge that he is repeating slanders about which he knows nothing One might just as well say that Castor Cil is an intoxicant; that if taken in large enough doses it will operate as a "booze." If people never tried to see but simply repeated such statements about Castor Oil, the majority of people would come to believe them. It is no easier to demonstrate such a statement about Castor Oil than it would be about Peruna.

Any one who takes Peruna knows that such statements are false. To say that Peruna is cheap whiskey and cubebs may constitute good material for jokes on the vaude ville stage, but there is no excuse for any one who pretends to be truthful say ag over again this oft-repeated falsehood.

'PHONE MATTERS DISCUSSED BY

J. E. Heaton, commercial manager With a list of subscribers three times J. E. Heaton, commercial manager for the Pacific Telephone and Telegraph Company, when interviewed today on the rate question for residence phone service, stated the position of his company in the matter and set forth some facts worthy of consideration by all telephone users in this city. The trend of his statement was a telephone exchange grows, the rates charged for the service should be decreased. Mr. Heaton said:

"The telephone business is unlike the service is unlike the service as anticipated at the time the exchange was installed, and with the service much better and many times as extensive as was contemplated, and with a greatly added cost of operating and installation due to combat the idea held by many that as a telephone exchange grows, the rates charged for the service should be decreased. Mr. Heaton said:

"The telephone business is unlike the exchange was installed, and with the service much better and many times as extensive as was contemplated, and with a greatly added cost of operating and installation due to combit the company has no control, it is not unreasonable that our company should seek an adjust ment of rates that will permit them the exchange was installed.

be decreased. Mr. Heaton said:

"The telephone business is unlike all other kinds of business, and is very little understood by the public. Nearly every one is familiar with the which will cost approximately \$28. Nearly every one is familiar with the fact that telephone companies charge more for service in large cities than in smaller cities and towns, but do not understand why this is necessary, believing that the charges for service should be reduced rather than increased as the telephone grows in the number of subscribers. This erroneous impression is probably prevent. tion September 1st, 1910, and also expect to expend approximately \$50, and the charges for service thould be reduced rather than in-the number of subscribers. This erange as the telephone grows in the number of subscribers. This erange important cities in the state of Oregon, and the telephone rates are too low to earn a proper return upon the outlinessumes that the telephone furnities assumes that the telephone rates are companied by their band. Several subscriber is the unit of cost of the commodity the telephone date of the very subscriber is the unit of cost of the commodity the telephone date of the very subscriber is the unit of cost of the commodity the telephone and continue to exist.

"I am authorized to state for our company is selling, and naturally the number of telephone service in an exchange with a large number of telephone state of the continue to exist.

"I am authorized to state for our company that we will be glad of any opportunity to take up the subject many charge more for telephone service in an exchange with a large number of telephone shaning an exchange plant in Eugene, showing the actual that as there were others present does the meeting, he would no doubt like to address the meeting, he would yield the floor.
