Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

The "GLOVE FITTING" CORSET is so simple in design and construction that it requires but a word of description.

"The secret of it all" lies in substituting for gores, "transverse" seams in graceful curves, which adapt themselves to "all" figures, thus securing the most perfect and comfortable fit. It is made in three or more pieces, and being cut on correct geometrical principles, with transverse seams running round the body instead of up and down, evade all strain, thus avoiding the objections urged against every other corset. The fit is perfect, for it is automatic, or self-adjusting, yielding so easily to every movement that the wearer is unconscious of any feeling of constraint.

"It makes the stiff, the stubborn, flexible, With magic circle, wrought in graceful lines."

We have said enough, perhaps, to account for the fact that the "GLOVE FITTING" Corset has become the favorite of the ladies of America. In the whole realm of costume, no one perfected article of dress ever gained so wide a popularity so quick, nor was destined, we think, to hold it so long as The "Glove Fitting" Corset.

Ask to see our CYCLIST CORSET.

Anti-Grasshopper Potion.

Grasshoppers are said to be more numerous in certain portions of the Rogue river valley this season than for many years, and in some places have been more or less destructive. Recently at the former Roper place, on the east side of Bear creek, now tenanted by Harry Green, the hoppers threatened to ruin a young peach orchard, attacking the foliage viciously. Mr. Green undertook a plan to kill the hoppers that is said to have worked most successfully. Taking a quantity of bran, molasses and arsenic, he mixed these ingredients up into a tempting potion, and scattered it in small piles on the ground over the orchard. The hoppers gathered around the medicine in myriads and partook with the result that they were soon heaped up over the ground three or four deep, but fortunately dead. Enough of the hoppers were not left to do further damage. The cost for covering the 27 acre orchard was about \$10. This remedy is worthy the attention of those who are bothered by grasshoppers.

RAILROAD FIGURING.—Mr. Hammond, according to the Astorian, said he would have the Burlington railroad into Astoria if it could be accomplished. That paper says: "It is certain that other trunk lines are figuring on the same proposition, and intelligent co-operation now, on the part of Astorians, with Mr. Hammond, will secure not only one transcontinental road, but probably several. The field is broad and only the lack of proper effort can fail to secure one or more new trunk lines. Some time ago these columns pointed out the feasible connection, that is talked of, with the Chicago and Northwestern at Boise via the O. P. and Albany."

It Makes Us Snadder

To think of chills and fever. But when we really have it—so posing us to be so unfortunate—our frames undergo a series of shocks which bear a close analogy to those produced by an earthquake. Roused next, we are drenched by perspiration afterward. Truly a delectable condition of things. But how easy to remedy and how speedy! The certain means of relief is Hostetter's Stomach Bitters. Tested as well where malaria is prevalent in its most violent form, as where it takes on a milder guise, it has proven itself to possess both a remedial and preventative efficacy of the highest order. In South America, Guatemala, Mexico and the Isthmus of Panama, no less than throughout the North American continent its success as a means of forestalling and relieving malarial diseases has been unparalleled. (Use the Bitters for dyspepsia, constipation, biliousness and kidney trouble, nervousness and debility.)

A FAREWELL LUNCH.

The ladies aid society of the Christian church last evening invited their pastor, Elder Bonnell, and family to attend the meeting of the Sunday school teachers and afterwards to partake of a farewell lunch. At the close of the teachers meeting, a table was spread with a bountiful lunch, and just before partaking of the same, Mayor J D Matlock, on behalf of the ladies of the society, presented Mrs. Bonnell with a beautiful table cloth, as a memento of their lasting friendship. In response, Elder and Mrs. Bonnell replied that it was with many regrets that they parted with so many dear friends. The elder and family were invited by Mrs Hattie Cowling, on behalf of the society, to eat a farewell lunch with its members and friends.
