OUR NEW POSSESSIONS.

A correspondent of the 'North-west Herald' who soldered for Uncle Sam in the Philippines has no love for that country. This is the picture he draws of that far off tropical country for which we are waging war with the native inhabitants:

"As a soldier who has had experience in the Philippine Islands, I can say that the newly-acquired possessions of Uncle Sam do not pan out the full expectation of the men who went to defend the flag. The flag there is nothing there worth fighting for, unless jungles, alive with venomous reptiles, miasmatic swamps where stalk the deadly bubonic plague, the yellow fever, the smallpox and other fatal diseases are worth fighting for. The hospitals so called, are filled with suffering, dying soldiers, thousands of miles from their native land, who stare death in the face in a hundred different shapes, and to whom the deadly epidemics are more fatal than the 'half child, half savage' Filipinos."

THE FUTURE OF THE AUTOMOBILE

There was a time when bicycles cost \$150 each. Then every manufacturer whose plant was divertible to the manufacture of bicycles made bicycles. Now, after six or seven years of very active bicycle-building, anyone can buy a first-rate bicycle anywhere for \$40, and superior buyers can probably supply themselves for about half that sum.

What automobiles cost at present is best known to persons affluent enough to purchase and play with those machines, but, reasoning by analogy, they will soon cost very much less, for every factory that can seem to be making them. Carriage factories and bicycle factories especially, all over the country, are taking orders for them. This year they are the toys of the well-to-do. By another season they will be so spread abroad that their value as playthings may have lessened; but that is of small consequence compared with the immense field that seems to be opening for them as vehicles for cheap and rapid transportation. That they will ever be brought "within the means of all" is not to be expected, but there seems to be a good prospect that they will soon be brought within the means of most persons

who can afford at present to keep horses—E. S. Martin, in Harper's Weekly.

The entertainment of the National Press Association was a good investment even though no account be made of the hospitality due guests and visitors. The flattering notices of our state and people come to the editorial headquarters in Portland in such profusion that they are counted by the feet. Over four thousand feet, running measure, of such notices have been received. Oregon will reap no uncertain reward through the welcome extended our guests. Immigration will follow in reasonable time and it will be of the best material as the intelligent mass of our citizens largely depend upon the press for information.

Robert Jackson cuts away in the Salem Statesman in the following indiscriminate manner:

"Sam Jones, when in his Chauchian speech he expressed fear for the outcome if the society ladies keep on cutting off the tops of their dresses for the ball room and the bottoms for the bicycle, forgot to mention the cutting movement at the seaside bathing resorts. But many who heard him thought Sam's remarks were often too cutting, anyway."

That iron pipe fence along the railroad at the State University is a most insignificant piece of work. Inclosing large grounds and buildings with such a fence can only be compared to putting a number six hat on a three hundred pound man. The regents should replace this ridiculous piece of fence with solid substantial ironwork if their means will allow it; if not with wood.

The campaign in the Philippines will probably result in the introduction of the mule into the islands as a beast of burden. The long eared animal should be able to out the water buffalo from the position he has long held among the Filipinos as a drawer and carrier.

The United States government will expend \$640,000 on a refrigerating plant at Manila. It will be of mammoth proportions.

The Ghost Doctor.
One of the most horrible things about the various diseases which women are peculiarly subject to is the sense of overwhelming despair which they bring upon the mind. A woman's mental condition is directly and powerfully affected by the ailment of the delicate, special organs of her sex. Such a difficulty not only racks her body with pain and suffering but burdens her with mental anguish which words can hardly describe. Thousands of women have had a similar experience to that of Mrs. Harsh A. Williams, of Westport, Oldham Co., Ky., in which the use of Dr. Pierce's wonderful "Favorite Prescription," by imparting health and strength to the feminine organism, has not only restored complete vigor and capacity to the bodily powers but has also given renewed brightness and buoyancy of spirit.

McKenzie Logs.

The Corvallis Times of August 6, has this about the large drive of logs out on the McKenzie river for Salem and Oregon City mills:
"The big drive is still in process of passing Corvallis. The first logs appeared along the river front nearly two months ago, and the stream has been more or less full of them ever since. The loggers with the main portion of the drive was two miles up the Willamette at noon yesterday, and was expected to appear almost within sight of town last night. They will pass along the river front sometime today. Among their conveniences is a floating house and barn, both of which are mounted on convenient scows or rafts. The stream has been so full of logs the past few days that the ferry has been operated only under great difficulty, the ferryman having to wait sometimes for fifteen or twenty minutes for the logs to pass."

A special election is to be held in Grant's Pass on Aug. 14, 1899, to decide the question of bonding the city to an extent not exceeding \$50,000, for the purpose of constructing a water, light and sewer system to be owned and controlled by the city.
