Fairview Notes.

HALE, Feb. 20.

More rain, more rest. While the Crow people are in the midst of smallpox, Fairview and adjoining neighborhoods are enjoying the best of health, with no signs of any contagious disease. We sympathize deeply with the quarantined district.

Mr. Walters, of Elmira sawmill, sent a man in this neighborhood yesterday to buy timber of A. Jones, Mrs. Evans and Mr. Fountain. If the propositions are satisfactory, Hays creek will soon present a scene of business activity.

WOOLEN MILL

A Proposition Is Made to Eugene.

A MATTER OF VITAL INTEREST.

Eugene has a proposition before it for the establishment of a woolen mill. The proposal comes through Geo. M. Miller, who was in correspondence with the gentleman several years ago, when in the real estate business here. At that time Mr. Lever resided in Fremont, Nebraska, and was ready to make propositions for the establishment of the industry. He now writes Mr. Miller from Union, Oregon, again making a proposal for a mill here, and it is the duty of the progressive people of Eugene to fully investigate the matter, for a woolen mill is badly needed. Mr. Lever stands ready to give any references necessary, from banks, regarding his reliability.

Mr. Lever further states that the mill would employ about 25 hands, and consume about 800,000 pounds of wool annually.

The letter in which the proposal is made to Eugene citizens is as follows: UNION, Ore., Feb. 17, 1900.

DEAR SIR:—I herewith submit to the citizens of Eugene the following proposition to start a first-class woolen mill at Eugene and bear in mind most all new machinery and in good running condition, one automatic engine, one boiler, all in fine condition, patent improved spinning machine, seven looms, warping, beaming and spooling complete; one set of cards, card grinder, one twister, one fan, one wool drier, together with dye tube, dye tank, one French rotary falling mill patented improved, one patented improved 4-string cloth washer, one gig and many other improvements, consisting of new pulleys, belting, bobbins, spools, reeds, etc., also piping, hangers and hating to operate all machinery supplies. Fixtures and many other articles too numerous to mention. My stock in machinery is \$5000 and I ask Eugene people to subscribe in cash stock \$5000 and also to have a building subscribed in stock. Size of building, 50x64, 23 stories high, wood. From the \$5000 stock there will be \$3,000 paid out on additional machinery.

The machinery is clear of all incumbrance of any kind and I can furnish references from banks as to same. This is a first-class one set mill and most all new machinery. This is an extra good opportunity to start a woolen mill with everything in good running condition ready to manufacture woolen goods. There should be no delay in taking hold of this woolen mill project and pushing it to a successful termination. I am,

Yours truly,

J. F. LEVER, Union, Ore.

An active Board of Trade is essential for the continued growth of Eugene. A mass meeting should be called at once to consider this matter.

W. Sanders will go to Portland on tomorrow morning's early train to attend his daughter's wedding in Portland, which occurs next Sunday. On the train he will meet his daughters, Mrs. Mark Goldstone, of Hollister, Cal., and Mrs. M. Constine, of San Francisco, who are also enroute to Portland. Mrs. Sanders and Miss Mae are already in the metropolis.

U. O. SCIENCE HALL.—Contractors Pugh & Gray have notified the regents that the U. O. Science Hall will be ready to formally turn over to them Saturday, and it will be received by Regents R. S. Bean, S. H. Friendly and C. A. Dolph, who have been notified to be in Eugene at that time, together with Architect R. H. Miller, when the building will be examined and received for its new uses. It will be a valuable working adjunct to the school.

Another Big Ocean Liner.

It is rumored that another big ocean liner is to be built which will rival even the famous Oregon in size. As usual, American enterprises are at the head of the project. America seems determined to have the greatest, whether it be steamship, art, inventions or medicine. Take Hostetter's Stomach Bitters as an example of what has been accomplished in medicine. It has proved its worth by over fifty years of cures of stomach diseases. There is nothing like this famous remedy for indigestion, biliousness, constipation and nervousness. It also cures liver and kidney trouble, and prevents malaria, fever and ague. Be sure you get the genuine, with Private Revenue Stamp over neck of bottle, or you will not be benefited.

Joaquin Miller.

Friday evening, February 23, at the First Christian church, the "Poet of the Sierras," Joaquin Miller, will lecture under the auspices of the Eugene High School. His subject is "Our Arctic Empire," with a prelude on "Lessons not Found in Books."

This lecture has been secured at great expense, and the following charges for admission are made necessary: Children and students of the public schools, 25 cents; adults, 35 cents; reserved seats, 50 cents. Seats may be reserved at the store of E. Schwarzschild.

DAIRYING INTERESTS

Farming Population Is Being Awakened.

C. H. MARKHAM INTERVIEWED.

A feature of the recent meeting of the Oregon Dairymen's Association at Albany was the address by C. H. Markham, general freight and passenger agent of the Southern Pacific railroad, in which the support of that company was pledged to the up-building of the dairying industry. Mr. Markham said that the company would provide facilities for the prompt handling of milk and for the marketing of butter and cheese. The Southern Pacific is doing valuable missionary work in behalf of the Willamette valley, and is taking advantage of every opportunity to attract new comers. Just now it is seeking to interest the present population of the valley in dairying. The company takes the view that if this industry is taken up and intelligently managed the entire state will be benefited.

Mr. Markham was in Eugene today on business for his company, and is creating enthusiasm for the dairying industry here, as he has at all prominent points down the valley. Speaking on this subject to a GUARD representative, Mr. Markham said:

"There is no use of talking about the past. What we ought to do, and what I believe we will do, is to take on new life. Every interest in the state, be it farming, railway, banking, mercantile or professional, should take up this question of dairying and encourage the industry until 10 years hence there will not be a farm in Western Oregon which is not within easy reach of a creamery. What has been done in other states can be done here. The railroads will do their share of the work, and if the farmers, bankers, merchants and professional men will fall into line, there will be no question as to the results.

"Every town in Western Oregon should have its commercial organization, all of the energies of which should, for the present, be devoted to this one idea. We ought to have enough surplus energy stored up to accomplish anything we undertake. Look at the work done by the farmers of Minnesota in the past 10 years. The first co-operative creamery in that state was built in 1891; now there are nearly 600 creameries; in 1893 there were 253 creameries of both classes; now there are 700. These 700 creameries, with a capital of \$2,800,000, handle 1,350,000,000 pounds of milk per annum, and after expending \$1,100,000 in the cost of manufacture, make a product from which they realize \$10,450,000, of which \$8,400,000 net is returned to the 54,000 patrons in payments of butter and fat taken from the milk. Portland should take hold of this matter. Western Oregon is and always will be, commercially tributary to Portland, and she will not have to divide any new business which may be developed with Puget sound. Much of the progress which has been made in the great dairying states of Minnesota, Wisconsin and Iowa, has been due to the work of their agricultural colleges, which are given loyal support by the people of those states. We should, therefore, strengthen our Corvallis college in every way possible. As in the other states named, the farm department should be equipped with a practical commercial creamery, so that the farmers may derive the benefit of object lessons conducted by skilled professors. Every paper of any importance in the state should have a column or more devoted to intelligent discussion of dairy interests."

Real Estate Sales on Paper.

The following article appears in this morning's Register: "W. W. Green is in Eugene from California, closing the deal on his property sold by E. J. Fraser."

The above, like many other deals appearing in the Register and credited to E. J. Fraser, is not accompanied with any further significance than the printing of it in the Morning Register, and cannot be backed by any legal transfers recorded in our county records. The sale as above referred to has not yet been fully consummated, and if completed has been negotiated through the Eugene Real Estate & Investment Company, who are not in the habit of transacting real estate transfers on the pages of the Morning Register, but lets our genial county clerk show what transactions are done in that line.

Register: The credit for McDonnell's capture is largely due to the effective work done by officers along McDonnell's leisurely trip of 60 days duration from Junction to Tacoma.

The credit of this robber's arrest is due to Sheriff Withers, and the writer of the above is very small to print the above falsehood. The robbery of Mr. Crain's store was on the evening of January 26, while McDonnell was arrested at Tacoma Feb. 17—ONLY 22 DAYS. How do you figure Mr. Register, to make it 60 days. You convict yourself. If any one doubts the credit belonging to Mr. Withers, let him ask District Attorney Harris about the matter.

His Life Was Saved.

Mr. J. F. Lilly, a prominent citizen of Hannibal, Mo., lately had a wonderful deliverance from a frightful death. In telling of it he says: "I was taken with typhoid fever that ran into pneumonia. My lungs became hardened. I was so weak I couldn't even sit up in bed. Nothing helped me. I expected to soon die of consumption, when I heard of Dr. King's New Discovery. One bottle gave me great relief. I continued to use it, and now am well and strong. I can't say too much in its praise." This marvelous medicine is the surest and quickest cure in the world for all throat and lung trouble. Regular size 50 cents and \$1.00. Trial bottles free at Linn's drug store, every bottle guaranteed.
