AN ELUSIVE BONANZA

THE STORY OF THE LOST LORE OF
GORE RANGE.

How a Tenderfoot Accidentally Discovered This Wonderful Bank of Gold and Why He Didn't Enjoy the Riches Thereof.

They were telling mining stories in the courthouse, and Dee Reese, the lawyer, asked:

"Did you ever hear of the lost lore of the Gore range?"

The other lawyers sitting around him said they had never heard of it. He then waited for him to begin. Mr. Reese borrowed a fresh chew of tobacco and told this story:

"Hundreds of experienced and inexperienced miners as well have spent a great deal of time and money looking for the lost lore of the Gore range, and they are searching for it yet. This famous mine was found and lost in the fall of 1896. A party of men from Iowa visited Routt county, Colo., in the fall of 1896 on a hunting and fishing trip. The party made its headquarters at Steamboat Springs. In the latter part of October the party moved up and went into camp on Rock creek, in the Gore range of mountains, which runs through northern Colorado. One of the party was a druggist, who had gone on the trip for his health. He knew nothing of mining. He had been warned by an old miner before he left Iowa not to be fooled, as many a tenderfoot had been, by what is known as 'fool's gold,' or iron pyrites. So this druggist paid no attention to the rocks, but attended strictly to his hunting and fishing.

"One afternoon while hunting for deer he started a fine buck and fired at him and wounded him. The buck fell, but got up and ran before the druggist could get to him. Where he fell was a pool of blood, which showed that he was badly wounded. The hunter trailed him by the blood spots on the dead leaves and grass for a mile and there found where the buck had lain down and then rising had gone on again. In this way the chase continued until sundown, and then the hunter, who was exhausted, sat down on an outcropping ledge of rocks to rest.

"In the enthusiasm of the chase he had not noted which way he traveled, and he realized that he was lost in the heavily timbered mountains, with nothing coming on. He knew it would be useless to try and find the camp that night, so he gathered a pile of dead limbs and kindled a fire against the ledge of rocks and laid down with his feet to the blaze and prepared to sleep. While lying there he noticed the rocks sparkled in the firelight. He got up and examined it, supposing it was the 'fool's gold' he had been warned against. But the rock looked so pretty that he broke off several pieces and put them in the pocket of his hunting coat, intending to carry them back to Iowa with him as curiosities.

"The next day he wandered all the forenoon, and then found the Gore range road and followed it to the camp. That very afternoon a regular mountain snowstorm began, and the party broke camp, returned to Steamboat Springs and from there went east.

"The druggist, whose name I have forgotten, staid in Denver for a few days on his way to his home in Iowa. In the lobby of a hotel in Denver the talk drifted to mining, and the druggist mentioned the specimens of stone he had found and was taking home. An old miner never misses a chance to examine a specimen and in this group in the hotel lobby was an old prospector. He asked to be shown the specimens. The druggist went to his room, fished up the old hunting coat from the bottom of his trunk and took out the piece of stone. The miner examined it closely and exclaimed:

"Man, that's the richest specimen of gold bearing quartz I have ever seen!"

"The druggist thought at first that he was being joked with, but at last the old miner induced him to take the specimens to Burlington, the best assayer in Denver. Burlington assayed a piece of the quartz and reported that it yielded gold at the rate of \$17,000 to the ton. The druggist was not satisfied. He submitted another piece of the quartz to another expert assayer and got a report that it yielded gold at the rate of \$15,000 to the ton.

"The druggist returned at once to Steamboat Springs, but there was snow in the mountains. He went back to Iowa and returned to the Gore range the next spring and has spent every summer since then looking for the lost lore, and others have searched for it, too, but no trace of it has been found."

—Kansas City Star.

Weighting the Baby.

The weighing of infants, a part of the routine in children's hospitals and of the greatest value as an indicator of health or disease, is unfortunately not so common as it should be in private families. Dr. Graham, discussing a paper by Dr. Griffith at the Philadelphia Pediatric society, says, "The rule that a child has double its birth weight at the fifth month and triple at from the twelfth to the fourteenth month makes a very good and useful working record."

Don't Be Selfish.

Don't live for yourself, and do not be afraid of diminishing your own happiness by promoting that of others. He who labors wholly for the benefit of others, and, as it were, forgets himself, is far happier than the man who makes himself the sole object of all his affections and exertions.

The original word translated apothecary in the Bible is believed by some authorities to be better translated by perfumer.

PLAYED OUT.

Dull headache, pains in various parts of the body, sinking at the pit of the stomach, loss of appetite, feverishness, pimples or sores, are all positive evidence of impure blood. No matter how it became so, it must be purified in order to obtain good health. Aker's Blood Purifier has never failed to cure Scrofulous or Syphilitic poisons, or any other blood diseases. It is certainly a wonderful remedy and we sell every bottle on a positive guarantee. For sale by W. L. DeLano.

SINGULAR DREAMING

TWO PECULIAR CASES OF BRAIN ACTIVITY 'N SLEEP.

A Lawyer Who Solved a Knotty Problem He Could Not Master While Awake—An Exciting and Almost Tragic Railway Journey.

An Edinburgh lawyer, a confirmed somnambulist, went through a peculiar experience some little time ago. One evening, after dinner, he told his wife that he had a most difficult law case which would occupy him half the night to study out. For hours thereafter he grappled with its intricacies, but finally desisted, saying it would be impossible to make his brief until morning, since the case presented some difficulties that he had been unable to master.

He fell asleep from exhaustion almost as soon as he went to bed, but in a few minutes rose, and, seating himself at his desk, wrote furiously for an hour or more. Then, carefully folding and indorsing the sheets he had written upon, he put them away in a pigeonhole of his desk, after which, without speaking, he returned to his bed and slept soundly till late in the morning.

At breakfast he expressed some uncertainty as to his "finding a solution." His wife told him to look through his desk, which he had done, discovering the paper he had written in the pigeonhole where he had hidden it. As he read it joy mingled with amazement showed plainly in his face, for the paper was a clearly reasoned, correctly phrased brief on the intricate case, with all the obscure points smoothed out. He had not the slightest recollection of having written the document.

Another extraordinary case is that of a young man who, an hour or so before starting on a railway journey, paid a visit to a steamer in which his parents were financially interested. In the course of the inspection he entered the little chamber in the bow of the vessel where the anchor chain is coiled and was impressed by the chamber's smallness and the cramped quarters it would afford a man sent down there to superintend the paying out of the chain. In due course the traveler went to the railway station and engaged a snug seat in the corner of a first class carriage and sleeping compartment. He had the compartment to himself. The train had not been long on its journey before the young man was sound asleep. But he imagined that he was awake and, moreover, that he was imprisoned in the little anchor chain compartment of the steamer. The vessel was under way, he thought, and moving more rapidly than he had ever known a steamer to move before.

His first idea was to go on deck at once, but he could not get out of the cell-like chamber. He could not stand erect even, the compartment was so little, as he found out at the cost of an imaginary bumped head when he attempted to rise. Then, to his surprise, he found that the room had a window, evidently a dead light, but square and unusually large. This he tried to raise, but, failing, determined to break it, thinking that he could seize the anchor chain and by its aid reach the deck.

There was only one way to smash the glass, and that was by striking it with his clinched fist. He knew that this would result in a cut hand probably, but he risked it all the same, for he felt certain now that the vessel was in a storm and likely to go down any moment, in which case he would be drowned like a rat in a trap.

Having smashed the glass, he found that the window was double, and he distinctly remembers breaking the outside pane, after which, with profusely bleeding hands, he carefully picked out the bits of glass remaining in the sashes, so that he could climb out.

After removing the last remaining fragment of glass from the sash he carefully thrust his head and arms out and began to feel for the chain. It was nowhere to be found. Then he pulled himself half way out of the window and reached upward.

To his great joy, he found he could reach over the edge of the deck; but, to his dismay, it was curved and smooth, offering no projection whatever by which he might pull himself up. That being the case, and not wishing to fall into the water and be drowned, he painfully drew back into the little chamber. However, he must certainly escape or be drowned, and after getting his breath he would make another attempt to reach the deck.

As he lay panting and frightened he accidentally reached in the direction away from the deadlight. To his surprise, he touched a swaying window blind, and the next moment he found himself lying on the floor of the corridor of the onrushing train, with a window down, through which he had evidently been trying to reach the deck of the imaginary steamer. The wonder was he did not lose his grip and fall on the line. It was his fear of being drowned that prevented him from being killed on the railway. The young fellow had a long and serious illness after his experience, and, strange to say, when he recovered his somnambulist habit left him—Washington Star.

An Odd Coincidence.

In one of the historical volumes of John E. Margness is recounted a most remarkable coincidence. On the very day that the Declaration of Independence was promulgated and old Liberty bell proclaimed the joyful news in Philadelphia a little band of Scotch-Irish settlers, without any knowledge, of course, of what was occurring elsewhere, assembled at a certain place on the banks of Pine creek, about 14 miles above where now stands the city of Williamsport, and declared themselves free from the yoke of British rule.

Peoples Party Central Committee.

The peoples party central committee of Lane county, are hereby called to meet at the court house, in Eugene Oregon, on Saturday March 10, 1900, at 1 p. m.

A full meeting of the committee is earnestly requested, important business. By order,

A. J. ZUMWALT,
L. H. PATTERSON, Chairman.

Secretary.

ZION ITEMS.

Wm. Preston Hard at Work On His Farm.

March 6.

Wm. Kloezer's little boy cut his hand quite severely while playing with a hatchet, almost severing one of his fingers.

Wm. Preston, of Eugene, came up here yesterday. He has taken a contract to prune his orchard, and may be seen in the tops of some of the largest trees clipping away for dear life.

School election passed off quietly yesterday. Wm. H. Good was elected director and Leander Cruzan clerk.

Mrs. Minnie Vogel, of Applegate, has been visiting with her parents, Mr. and Mrs. Thos. Barbre, for the past week, returning home today.

E. R. Parker, notary public, spent Saturday afternoon here at Zion making out applications for registration of voters living in this side of the precinct.

James M. Griffith has a homestead claim on the southwest 1/4 of Sec 22 and says he intends stocking it with a choice band of Jersey cows on his return from Cape Nome.

Schooner Danielson Off.

J. A. McCleod, of Florence, who arrived in on the stage last night states that the schooner Danielson was taken off the bar Sunday afternoon without any damage having resulted to the boat.

The log jam reported about two miles below the mouth of Lake Creek, Mr. McCleod states, contains about 400 logs, and he thinks it can be broken without very great difficulty. There is a small channel around the log jam, and the river will not be impeded by the hold up.

An Editor's Life Saved By Chamberlain's Cough Remedy.

During the early part of October, 1896, I contracted a bad cold which settled on my lungs and was neglected until I feared that consumption had appeared in an incipient state. I was constantly coughing and trying to expel something which I could not. I became alarmed and after giving the local doctor a trial bought a bottle of Chamberlain's Cough Remedy and the result was immediate improvement, and after I had used three bottles my lungs were restored to their healthy state.—R. S. EDWARDS, Publisher of The Review, Wyant, Ill. For sale by W. L. DeLano.

"After doctors failed to cure me a pneumonia I used One Minute Cough Cure, and three bottles of it cured me. It is also the best remedy on earth for whooping cough. It cured my grandchildren of the worst cases," writes Jno. Berry, Loganton, Pa. It is the only harmless remedy that gives immediate results. Cures coughs, colds, croup and throat and lung troubles. It prevents consumption. Children always like it. Mothers endorse it. Vincent & Co., Corner Drug Store.

French Tansy Waters, the world's famous remedy for irregular and painful periods of ladies; are never failing and safe. Married ladies' friend.

French Tansy Waters are the only reliable female remedy in the world; imported from Paris; take nothing else, but insist on genuine; in red wrappers with crown trade mark. La France Drug Company, Importers, 206 Turk St., San Francisco. For sale by all druggists, or sent in plain wrapper direct on receipt of \$2.

Wasting

Are you nervous, restless, pale and easily tired? Perhaps the scales can tell you why. If your weight is below your average, that explains it.

Scott's Emulsion is a fat-producing food. You soon begin to gain and you keep on gaining long after you stop taking it. For all wasting diseases, in both young and old, it is the one standard remedy.
