The first thing we know the infant will be bicycling. Read this from the Corvallis Gazette: A feat worthy of publication was performed by T W Dilley's little boy last Sunday. The little fellow is only five years of age, and mounted on his bicycle he attracts much attention. Sunday, in company with his father, he rode his wheel to Albany in a trifle over two hours. This is good time considering the gear of his wheel, the distance being over ten miles.

The Fourth Regiment band held its first rehearsal last night. The boys are playing with any old instrument they can scrape up at present awaiting the arrival of the new Bessons. As they are all old band men, however, they are dropping into the work in fine shape. The band expects to furnish the major part of the music for the Fourth of July celebration in this city and entertain the encampment on July 7 in fit condition to inspire the regiment. A new lot of music ordered will probably arrive by the time of next practice, which will be Monday night, June 25.

"Dr Daly is commencing the construction of five brick buildings on grounds recently vacated—by fire."

DIFFICULT UNDERTAKING.—Corvallis Times: "Professor John D Letcher is now engaged at Lexington, Va., where he has recently been offered a responsible position, but which he declined on account of its onerous duties. He has recently brought to a successful termination a very difficult engineering feat. It consisted of the extension of the foundation of a large stone church to the bedrock, several feet below the present foundations. The walls which were from three to five thick, and from 25 to 50 feet high, were undermined, and for the earth removed, there was substituted solid masonry. The work was accomplished without making a single crack in the walls, or in anyway disturbing the old foundations of the structure."

A little boy 8 years old, son of Henry Hagadorn, of the Snowden section, north of Montague, had his arm severly bitten and chewed by a hog at at the ranch, last Thursday, and would have been killed had not his screams brought his mother to the rescue. Boy like, he went into the hog pen to catch one of the 5-week's old pigs, and succeeded, but the old sow made a vicious attack in defense of her young, throwing the boy doww and chewing the right arm in a frightful manner, besides biting the left arm seriously. It is probable that the right will have to be amputated.

W E Howe, ex-treasurer of Klamath county, who was sentenced to serve nine years in the penitentiary, in 1894, was discharged on June 15th, his sentence having been commuted by Gov. Geer. The commutation carried with it the restoration of Howe to citizenship.

Railroad Rumors.

The Burns News of the 12th inst says: General Manager Bancroft, General Freight Agent Eccles, Chief Surgeon Pinkerton and Livestock Agent Tuttle, all of the Oregon Short Line Railroad Company, spent yesterday in Burns, having come out from Ontario by private conveyance. They are making a hurried trip through this section, presumably to gain an idea of the prospective railway traffic it contains. It is generally thought, but not absolutely verified, that the surveyors now at work in Malheur canyon are in the employ of the Short Line, and this, with the fact of the visit of the above-named officials, leads to the belief that that road has construction operations in view which are not given out publicly. The party left Burns this morning for Shaniko, via Prineville, and at the railroad town will meet the manager's private car and return to Salt Lake next Monday. The party was favorably impressed and indeed surprised, with the conditions they found in Harney county and in the thriving town of Burns. In the event a line is built westward from Snake river it will find the town of Burns in its path Mr Bancroft will return here next fall, when he will be able to make more thorough investigation of the country's resources.

Life Gradually Lengthening.

Recent statistics prove that the average health and length of life of human beings have grown stronger and longer with the years. In the fifteenth century, there was not to be found a man or woman over sixty years of age. It is clearly demonstrated that the change for the better has been brought about by modern ideas and methods. One of the agents which hes been most instrumental in preserving life is Hostetter's Stomach Bitters. Thousands have died from stamach and digestive disorders, who might have survived had they resorted to the Bitters. It is the greatest of known tonics for stomach and digestive organs. It cures dyspepsia, indigestion and constipation, and has done so for the past fifty years. There is nothing to equal it.
