WOOLEN MILL PROPOSITION.

Committee Interviewed Business Men This Morning.

ENCOURAGEMENT GIVEN.

At the public meeting in the courthouse last evening for the purpose of hearing more of the woolen mill proposition from Mr Wagon, who is in the city offering to build a \$45,000 mill in Eugene if the citizens will put \$15,000, a committee, consisting of T G Hendricks, J H McClung and J M Shelleys, was appointed by the chairman of the meeting, F M Wilkins, to interview the business men and capitalists of the city to see what encouragement is given the proposition. The committee, accompanied by Mr Wagon, worked awhile this morning, but owing to the fact that Saturday is the busiest day in the week for the merchants, further work was postponed until Monday.

Mr Hendricks, chairman of the committee, informs us that they met with much encouragement from most of those visited. Mr Wagon says that he is satisfied with the progress made so far and thinks that the \$15,000 will be readily raised.

Boise City, Idaho, is also after this mill. Mr Wagon has just received letters from that city asking him to go there and look over the field with a view of building the mill there. If Eugene wants the mill immediate action should be taken.

A New Invention in Fog Signals.

A new method of signaling during fog has been invented that will lessen the danger of collisions among ocean vessels. If it proves a success many serious disasters will be averted. It is well to heed signals of danger whenever they may appear, especially those that show there is something wrong with the stomach. Hostetter's Stomach Bitters should at once be brought to the rescue, as it will absolutely cure stomach, liver and kidney troubles. There is nothing to equal this medicine for dyspepsia, indigestion, constipation, flatulency, biliousness, insomnia or nervousness. It has been before the public 50 years and its superiority is firmly established. If you are a sufferer from any of these complaints do not fail to give it a fair trial.

We wish to make the change of books without any fiction if possible. Pupils should come the first day be assigned, get the list and then the new books. W M SUTTON, Principal.

20 PER CENT SHORT.—Harrisburg Bulletin: Hon-picking in this section is about complete. Cartwright, Davis & May, Davidson and Ayers have finished. Dr Mendenhall and Riley & Perkins will finish this week. The several reports to yield go to show that the average is better than was expected when in the midst of harvesting. It is now thought by elce observers that the output will be 20 per cent short of the usual average. But all agree that the quality is better than any year heretofore.

MILLINERY OPENING.—Miss E Saltzman's millinery opening was held today. Despite the showers of rain, her Ninth street store was crowded all afternoon with scores of ladies who critically examined the truely made fall and winter hats, which seem prettier this year than ever before. The interior of the store was beautifully decorated with palms, ferns and potted plants and together with the elaborate hat trimmings presented a delightful appearance.

RAIN AND WIND.—Heavy rain last night and showers today. The rain has stopped and the wind is blowing from the present. The high wind today knocked off thousands of bushels of pines and apples. At this writing the barometer is slowly rising.
