tising Agency in charge.

PHILIPPINE INFORMATION.

David P. Barrows of New York was a witness before the Senate committee on the Philippines the other day. We give extracts from the Associated Press report:

Mr. Barrows said that a majority of the adult Christianized element in the islands could read and write.

In the provinces he had visited the arable land that could be brought under rice and sugar cultivation is very generally occupied; he claimed his observation had been that the Filipino is the only agricultural element, the Chinese not working much in the sun.

He did not think that white men could be induced to do the manual and plantation labor of the islands. There was no danger to be feared from the importation of Filipino labor into this country.

"It would be surprising," said Mr. Barrows, answering a query of Senator Hale, "if men who had been struggling for years and been making sacrifices with the idea of independence could be able to dismiss the thought from their minds at once."

England keeps on raising prin- ciples for German princes in spite of the strained relations.

There were in Cuba in 1899 60,711 farms, with an average size of 143 acres and an average cultivation of thirteen acres.

Simon office-necking adherents cannot be found down at Portland nowadays. However, their boss is a hard man to keep on the bottom.

The University of Chicago has notified the girls that they will have to go way back and sit down at the convocation exercises, then they may keep their hats on if they want to.

Three hundred medical and dental students had a pitched battle in their Omaha college lecture-room yesterday. Although they broke up all the furniture the outcome was like that of a French duel—nobody hurt.

They have the making of some brutal men and women up about Pendleton if this from the East Oregonian may be believed:

Each Sunday near Pendleton is heard the creak of the ride in the hands of young men, and, strange to relate, in the hands of young women, too, and in their trail is to be found the dead bodies of many meadow larks and other songsters.

Now comes Dr. Carl Leitz, a chemist of Hamburg, Germany, and claims he has invented a process by which, at a trifling cost, water can be endowed with the combustible properties of petroleum. His invention is so far perfected that he has been granted a patent on it, and scientists who have examined it closely aver their unhesitating belief that the invention foreshadows an industrial revolution second only to the discovery of electricity.

President Roosevelt has but one hero of the Spanish American war in mind—Theodore Roosevelt. Hence the vote of the Republican majority if the House committee on naval affairs against the resolution giving the thanks of Congress to Admiral Schley and the officers and men who served with him in the battle of Santiago. It is surprising that partisanship should go so far as that. President McKinley would not have permitted, far less become responsible for such a vote.

Major Waller over in the Phil- ippines does not deserve anything better than being shot. The court-

martial developed the fact that the arrival of eleven Filipino prisoners with their escort was announced to Major Waller as he reclined in his hammock, also the fact that the prisoners refused to gather roots and herbs for their captors while on the march. Major Waller ordered the Filipinos shot forthwith. His trial began yesterday at Manila, the plea of "not guilty" being entered.

NO DATA FOR AN OPINION.

MRS. WHYTE—Do you know any- thing about the people who have moved in next door?

MRS. BROWN—No, it was dark when the furniture wagon brought their goods, and they haven't hung out a washing yet.

Night Was Her Terror.

"I would cough nearly all night long," writes Mrs. Chas. Applegate, of Alexandria, Ind., "and could hardly get any sleep. I had consumption so bad that if I walked a block I would cough frightfully and spit blood, but when all other medicines failed, three \$1.00 bottles of Dr. King's New Discovery wholly cured me and I gained 58 pounds." It's absolutely guaran- teed to cure coughs, colds, la grippe, bronchitis and throat and lung troubles. Price 50c and \$1.00. Trial bottles free at W. L. DeLano's drug store.

Pure Home Made Brandy.

For liver, kidney or stomach trou- bles, colds, lagrippe or biliousness there is nothing better than France's pure brandies. All orders promptly filled with pure, apple or pear brandy at 75 cents per quart, or \$2.50 per gallon. Orders by stage or express will be securely boxed. Made and sold to consumers only.

Building

Quires a foundation. This is just as true of the building up of the body as of the building of a house. The founda- tion of a strong body is a strong stomach. No man can be stronger than his stomach. A weak stomach means a weak man.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It enables the perfect digestion and assimila- tion of the food which is eaten. Thus it builds up the body and restores strength in the only way known to Nature or to science—by digested and assimilated food.

While living in Charlotte, N. C., your medi- cine cured use of asthma and nasal catarrh of ten years standing. I was cured by Dr. Pierce's Golden Medical Discovery. At that time I was a burden to me, and after spending hundreds of dollars under numerous doctors I was dying by inches. I weighed only 100 pounds. In twenty days after I commenced your treatment I was well in both troubles, and in six months I weighed 150 pounds, and was in perfect health. I have never felt the slightest weakness of either since. Am an active young man and in perfect health, and weigh 150 pounds. No money could repay you for what you did for me. I would not return to the condition I was in. In October, 1914, for Rochester, N. Y.

Dr. Pierce's Pleasant Pellets assist the action of the "Discovery," when a laxa- tive is required.

SENSITIVE TO SOUND

ACUTE POWERS OF HEARING WITH WHICH FISH ARE ENDOWED.

Some Interesting Experiments That Were Made to Determine Just What Manner of Notes or Motions Would Startle Trout.

There are three phases of sense in fish—particularly interesting to the angler—their exquisite powers of hearing, of seeing and their subtle, abnormal sensitiveness to atmospheric influence. With all our experience and study it is doubtful if we have arrived at anything like a full estimate of the acute sensitiveness with which fish are endowed. I devote this article to hear- ing. By hearing I must obviously be understood to mean their power of appre- ciating the vibration caused by sound, the conductor being either solid, aerial or liquid.

In man sound detonates the eardrum, and in that way when we are under water we discover little intelligible meaning from sounds. But the same vibrations are undoubtedly received by the exquisitely sensitive hearing intelli- gence of a fish, if I may use the term, in a different and far more im- pressive way. By intelligence I mean an instinctive recognition by their bodies of some disturbance, just as man recognizes a passing breath of air. It takes the form of feeling.

I came to the conclusion that I would make a few experiments. Here are one or two facts: A friend entered into it with me, and we bethought ourselves of certain well known trout in our preserve which were "always there." Then we placed tattered hur- dles a day or two beforehand so that the fish might get accustomed to them in such a way that we could approach close to their haunts without being seen and watch the unsuspecting trout through a small hole cut in the straw.

When one was not at home, the other generally was. My friend undertook the noise making. I the observation.

From the sound of a gunshot 500 yards away, which made our trout dis- tinctly start, to the breaking of a twig three yards from the fish, which did the same, we tried all kinds of sounds, shrill and dull and at varying dis- tances, and the sum of our experiments convinced us of this: That our sensi- tively organized friends felt the dis- placements of molecules through ether, which we call sound, and the further vibrating disturbance through what we call water, which I verily believe con- ducts sensation to the fish as readily as glass permits the penetration of light to this paper, in proportion to the distances and the character of the sound, but that they did hear, or feel rather, and with incredible quickness, too, was conclusively demonstrated.

What they heard and were not alarm- ed at I cannot tell, but when they were alarmed it was evident enough by the same kind of start they give when their chief enemy suddenly peeps over the bank. In only two cases could I dis- cover actual fright, the fright that sends them down—a gunshot behind the hurdle and a heavy stamp of the foot near by. It is noteworthy that the shrill sounds seemed to startle them most. For instance, a policeman's whistle at ten yards sent one into the stream as if looking about for some source of danger, whereas a shout at the same distance caused no detected movement. Their way of shifting a little farther from the bank when they have an inkling of danger is a very pretty side movement, well known no doubt. It seems for the purpose of watching the bank at a better angle.

The common manner of showing their alarm was by a sudden quiver, sometimes followed by a sinking down an inch or two, as much as to say, "What's up?" I very much doubt if I ever crept up to my peepholes without being detected, and yet I was careful, for, if you notice, a trout once on the qui vive gives no sign of alarm at a second movement or noise. Once pre- pared he is immovable till he suddenly darts off. You may throw your great- est bait at him, and he either braves it stolidly or bolts cleanly away. Five minutes' perfect stillness and they settle back to confidence, and then they were again easily startled. I fancy the laws of re- fraction had something to do with it and that even from the sky they some- times perceived my movements. I had often suspected this before.

Another conclusion: I believe they heard much they appeared not to. A sudden smack of the hands together, and there was a decided quiver, but a bird rattle, begun very softly and grad- ually brought up to its very loudest, and no notice seemed to be taken. But doubtless, like ourselves, however loud the noise, the gradient robs it of its startle. However, faithful it may sound, of this I am thoroughly con- vinced—that water is such an immedi- ate transmitter of vibration to fish that they recognize sound from the air nearly as quickly as man. It is no argu- ment to say we do not when in it. We have no need. Fish have. And be- cause they have they are providentially endowed with supersensitiveness to that particular nervous influence among others.—London Field.

Two Crops.

"Funny about young Spenditt, wasn't it?" said the observing man.

"Was it?" asked the man of an in- quiring mind.

"Yes, he lost his money raising Cain in Europe and then made another for- tune raising cane in Louisiana."—Bal- timore American.

Useless.

Mr. D. Speitte—"My dear, I wish you would prepare something occasionally to tempt my appetite."

His Wife—"The idea! Why, you have not any appetite to tempt.—Catholic Standard and Times.

Democratic County Convention.

Notice is hereby given that the Lane county democratic county convention will meet on Saturday, the 5th day of April, 1912, at 10 o'clock a. m. at the courthouse in Eugene, Oregon, for the purpose of nominating one state senator, three representatives, one county commissioner, one county clerk, sheriff, treasurer, assessor, surveyor, coroner and delegates to the state and con- gressional conventions, respectively.

The primaries to be held on March 29th, 1912.

All citizens who are opposed to the republican imperialistic and plutocratic tendencies, and all who favor a far- d for revenue only, and so adjusted as to fall heaviest on luxuries and lightest on necessities, and who favor the con- stitution following the flag, and all who denounce the enormous extrava- gance of the last Oregon legislature, and who favor strict economy in fed- eral, state and county administration, are earnestly requested to participate with us in the primaries, convention and election.

The precincts are entitled to the fol- lowing number of delegates:
