AN INDEPENDENT PAPER.

TUESDAY, NOVEMBER 28

Young Gould has been blackballed by a Columbia College society. It is not to his discredit in the least. Last Christmas time twelve sophomores tried to haze him but he beat off his would-be tormentors with a revolver, hence the blackbailing.

There is little danger of Rockefeller getting into the poorhouse, whatever number of his oil patrons get there. Standard Oil has just declared another dividend, bringing his share of aggregate dividends for 1905 up to twenty million. And he only owns half the stock. Standard Oil pays 40 per cent on a capitalization watered half a dozen times. No wonder with the Standard Oil and so many kindred associations constantly in sight of the consumer there is not a little socialist sentiment in the land, a feeling that it would be but justice to the masses to take back common property and rights that have been appropriated by individuals.

Cashier Adams, of the Seattle government assay office, did some neat work stealing gold dust, but he worked the matter too long and got caught. Now the penitentiary. It was a very simple scheme. Say fifty ounces of gold dust were deposited for assay. Adams would take an ounce or two out before handing to the assayer and replace it with enough heavy black sand to bring the weight up to the figure he reported for. The assayer would make his certificate accordingly and the owner had no recourse against his loss. There was no way by which the apparent leak could be located. The miners were certain that they were the victims of robbery, but how and where they could not tell. As in many other instances, getting rid of the plunder was not so easy. It looks as if he took the worst possible way, depositing it in banks, so his rapidly increasing wealth could not but become a matter of public notoriety. It is easy to steal, but in hiding the theft the most studied plans to escape detection usually fail.

SORES-ULCERS THE BLOOD DISEASED -SYSTEM DISORDERED

When a Sore or Ulcer is slow in healing it is the best evidence of a diseased condition of the blood and a disordered system. They show that the bodily impurities, which should pass off through the natural channels of nature, are being retained in the system from some cause. The blood absorbing the waste matters becomes steeped in poison which finds an outlet through the Sore or Ulcer, keeping it inflamed, painful and festering. As the blood constantly discharges its poison into these places, they eat deeper into the surrounding flesh and tissues, growing larger and more offensive in spite of all the sufferer can do, until the entire health is affected. Washes, salves, powders and such treatment are desirable for the reason that they are cleansing and also help to relieve the pain, but they are in no way curative. The blood is filled with poison, and until it is removed the sore cannot heal. S. S. S. is the only cure for these evidences of impure blood. It goes down to the root of the trouble and cleanses the circulation of all poisons and impurities. S. S. S. enriches the blood and reinvigorates the different members of the body so that the impurities and waste matters can pass off as nature intended. Then the discharge ceases, the sore scabs over, new flesh is formed, and the place heals permanently. Ask on Sores and Ulcers and buy medical advice you need without charge.

False Rumor

The report Saturday on the streets that Will Muthersbaugh was dead was found to be untrue. Upon inquiry at the Eugene Dye Works, the place where they do first-class dyeing, cleaning and repairing clothes, it was found that he was only dying old clothes. 459 Willamette street is the place where they dye to live and live to dye.

Free Booklet. On Bright's Disease And Diabetes

We desire to place in the hands of those afflicted with Bright's Disease or Diabetes a 36-page pamphlet that is saving human lives. It is not an ordinary pamphlet, but is principally made up of reports of scientifically conducted tests in a large variety of cases showing 87 per cent of recoveries in these hitherto incurable diseases.

This booklet is for thoughtful people—people who can discriminate between common patent medicine literature and a carefully prepared report of the patient's serious and profoundly important investigation.

The specimens employed in these tests are known as the Fulton Compounds and the results obtained prove conclusively that these dreaded diseases so long feared have at last yielded to medical science. The pamphlet is free. Lion Drug Co., Local Agent.

When to suspect Bright's Disease—weakness of one or weighty puffing ankles, hands or eyelids; kidney trouble after the third month's urine may show sediment; failing vision; dizziness; or more of these.

In Diabetes the distinguishing feature is, weakness with great thirst at times voracious appetite.
