The Finest Toilet Talcum Powder.

We desire all of our customers to try a little By-ls Violet Borated Talcum Powder and see if they do not think—just as we do—that it is the finest Toilet Talcum Powder they have ever examined. The odor is exquisite. The powder is smooth as velvet. The anti-septic and astringent products—in addition to its thorough borating—make it remarkably soothing and healing—surpassing other Toilet and Talcum Powders undoubtedly. Price 25c.

EUGENE'S BIG BAKING CONCERN

Shipping Bread and Pastry to Many Outside Points—Big Wholesale Business

The Eugene Baking Company which has just commenced business in Eugene, is the largest concern of its kind in Oregon outside of Portland. The owners of this institution believe in cleanliness and purity, and recognize all sanitary conditions as being the principal need in the art of making bread and pastry.

This concern elected Eugene as distributing point and are now shipping their pastry south as far as Drain and north to Woodburn.

The plant has had an especially fine oven built for its use that will hold the steam in the oven, thereby retaining the fine delicate softness and moisture so necessary to bread and bread manufacture. The owners inform the Guard that they will install all up-to-date machinery, such as a moulder, mixer and weigher. The baskets for shipping goods are made sanitary so that neither dust nor water can effect the contents. All

pans are round-cornered, so that sanitary conditions exist throughout the establishment, no little detail being overlooked.

The proprietors of this establishment have their baking quarters open to the public and are glad to have them inspect and observe the cleanliness and sanitary conditions which prevail.

Call and see for yourself at the Eugene Baking Company, corner of Seventh and Oak streets.

SNOW VERY DEEP IN THE MOUNTAINS

J. P. Anderson, foreman at the Great Northern mine, arrived down from Blue River this morning and left on the afternoon train for Woodburn for a few days' stay.

Mr. Anderson states that when he left the mines yesterday the snow at the Great Northern was eight feet deep and coming across the divide he attempted to measure the depth with a pole he had but it was too short to reach to the bottom of the snow. It appeared to be about fifteen feet deep.

The heavy snowfall has interfered with the operation of the mill at the Great Northern, but it is thought everything will be running as before within a few days.
