AN INDEPENDENT PAPER.

THURSDAY, JUNE 7

That Electric Road

The electric railway franchise that will be submitted to the city council next Monday night ought to meet all reasonable objections that have been advanced heretofore. This is a vital matter so far as the growth of Eugene is concerned and those who are in favor of progression along approved business lines should make their position known to the members of the council so that they may know the real wish of their constituents.

More than likely, the company asking for the franchise, if not met in the proper spirit when the revised ordinance is submitted, will withdraw it and retire from the field. Such an event, it seems to us, would be in the nature of a public calamity, which would mean a stagnation of growth and investment that would be felt in every branch of business. Eugene has been built up largely on a hope of the development and growth of the surrounding country that will not materialize unless such enterprises as that in question are secured. Electric roads bring population and create additional business and are the greatest factors in building up trade centers. Without them there is little hope for any change in present conditions, which, it must be admitted, are not especially favorable to any marked growth of the city.

Earth Broke and Caused Earthquake
The California state earthquake investigating committee in its preliminary report says: "One of the remarkable features of the Coast ranges of California is a line of peculiar geomorphic construction which extends obliquely across the entire width of the mountainous belt from Mendocino county to Riverside county. The surface feature along their line has been formed by a dislocation of the earth's crust or a series of dislocations in times past, with a differential movement of the parts on either side of the plane of rupture."
The evidence of the rupture and the differential movement, that is, a slipping evidence along the line of fracture, is clearly defined in a continuous furrow or breaking up of the surface several feet wide for a distance of 185 miles. At places along this line of breakage one side is higher than the other, as much as four feet being noted. The latitude and longitude points along the Coast range there have probably been changed a few feet by this shifting.

The automobile, all things considered, investment, repairs, deterioration and cost of running, is a very expensive luxury. In a test at New York the other day on smooth pavement and with machines in the pink of condition and operated by experts, the gasoline fuel cost five cents a mile run for the one-seated machine that took first prize, weighing 300 pounds, and nine cents for a two-seated machine weighing 370 pounds. At those figures a forty-mile run would cost not less than \$2 to \$3.50, according to the machine, and on wagon roads much more, of course. The horse is cheaper, but he does not go so quick. Still there are times when the automobile does not go at all—has to be towed home.

The latitude and longitude points along the Coast range there have probably been changed a few feet by this shifting.

When our soldiers went to Cuba and the Philippines health was the most important consideration. Willis T. Morgan, retired Commissary Sergeant U. S. A., of Rural Route 1, Concord, N. H., says: "I was two years in Cuba and two years in the Philippines, and being subject to colds I took Dr. King's New Discovery for Consumption, which kept me in perfect health. And now, in New Hampshire, we find it the best medicine in the world for coughs, colds, bronchial troubles and all lung diseases. Guaranteed at W. L. DeLano's, druggist. Price, 50c and \$1. Trial bottle free."

Now is the time to start a new campaign in Oregon, one in which all parties may join—a campaign for the development of the state's resources, for more business and increased population. Let us invite capital that is looking for investment in new land, new enterprises and new opportunities to make their home among us. The

Willamette valley has made slower progress than any other section of the Northwest, although possessed of greater natural resources and blessed with a more healthful and pleasant climate. There ought to be no reason why a wonderful growth in population and business should not mark the next five years if all will pull together for a greater Oregon.

Even a giant has to submit to physical force on occasion. The Russian, Machinow, 9 feet 3 inches tall, engaged for exhibition in New York, talked at Dover, England, when it came to going aboard a steamer, his aversion to the sea being unconquerable. He was unmoved by the tears and entreaties of his wife, the latter reinforced by his agent, and refused to leave the railroad coach at the quay. Then twenty men from the liner Pretoria took him in hand and dragged and shouldered him aboard. A man of that size ought to be able to whip a barnyard full of ordinary men if willing to fight.

Up in British Columbia they do business with criminals. The second trial of the bandits who held up and robbed a Canadian Pacific train at Kamloops resulted in a verdict of guilty. Edward Miner and William Dunn were sentenced to life imprisonment, and Lewis Colquhoun, an accomplice, to twenty-five years. In regard to the latter it was about as well to have been a principal.

Burlington railroad conductors are not allowed to smoke or chew tobacco, drink whiskey or swear, and, most important of all, they are now compelled to keep their trousers creased and wear immaculate linen. They are apparently serving an apprenticeship for service later on the trolley lines of the New Jerusalem.

On June 1 there were 13,038 persons in permanent camps at San Francisco and 29,533 in temporary camps, altogether over 42,000. The earthquake came April 30. These figures more eloquently than any words give at least a faint idea of the woe entailed in the partial destruction of the big city.

Democrats ought to take up a collection and pay T. T. Geer for the good he did their ticket. Every time he opened his capacious mouth in behalf of Withycombe he made votes for Chamberlain.

What fun will there be going over to Newport this year? Lincoln county went dry—because they took a mean advantage and voted when the summer residents were all away.

Billy Hearst will run for governor of New York on a municipal ownership platform. That means a lively campaign in the Empire State next fall.

Woman suffrage has been defeated. The men decided by a large majority that they have made politics too dirty for the gentler sex to mix up in.

It is pretty hard to see the real difference between local option and prohibition with big counties like Lane and Linn going dry.

Following the Flag
When our soldiers went to Cuba and the Philippines health was the most important consideration. Willis T. Morgan, retired Commissary Sergeant U. S. A., of Rural Route 1, Concord, N. H., says: "I was two years in Cuba and two years in the Philippines, and being subject to colds I took Dr. King's New Discovery for Consumption, which kept me in perfect health. And now, in New Hampshire, we find it the best medicine in the world for coughs, colds, bronchial troubles and all lung diseases. Guaranteed at W. L. DeLano's, druggist. Price, 50c and \$1. Trial bottle free."

Bargains in Property
35 acres of rich bottom land suitable for garden, hops or fruit. Good house and lot, Thirteenth street, fine location. A snap. Choice residence lots in Haddleton's addition. The best in the city. M. M. DAVIS, 35 West Eighth street. Phone Black 4292.

There's little room in this great world of ours for the "fat woman." She's a hindrance to herself in street cars, flats, elevators; but what can she do, poor thing—take Hollister's Rocky Mountain Tea, 35 cents. Tea or tablets. Linn Drug Co.

Replace your old matting with new, bought at C. Amberg's Hardware. We guarantee our work. Eugene Steam Dye Works.

Office—1st alleyway south of Loan and Savings Bank
Office Phone-Red 1211. S. M. Phone-Black 1211.

Slightly Building Locations

If you want a home building place where you have plenty of room—are not crowded by neighbors yet within ten minutes walk of the business part of town, see J. R. Campbell about those two slightly lots where you first will strike the raise of College hill, turning west by Chapman's planing mill, then south to get there. Good sidewalk to property and streets on both sides of lots graded and gravelled. The grading on both sides leaves the lots one to two feet above the grade with a gentle slope on both streets. Splendid view of the valley, mountains and town from the location.

An ordinary gait in walking will take you there from the business part of town in ten minutes. At end of lengthwise board walk on left.

Woodworking
Have your wood sawed by a gasoline wood saw. It furnishes its own fuel and does not burn yours—see the point? Saws by a gauge. For prompt service ring up Red 1771 or call at 775 Perry street. W. E. BODDY
