TUESDAY, AUGUST 28

Increase in Money Supply

An increase of more than \$150,000,000 in the money circulation in the United States in a single year would seem a remarkable addition to the money stock employed by the people in their ordinary business transactions. The tables of money circulation prepared by the division of laws and currency of the treasury for July and the first day of the present month show that the total value of money out among the people on August 1, 1905, was \$2,604,900,230, while on August 1, 1906, the total amount reached \$2,757,349,438. The per capita circulation, according to the estimate of the actuary of the department, who estimates the population at this time to be nearly 85,000,000, amounts to \$32.52.

Some idea of the marvelous changes in the money employed by the people in general circulation may be gained from a comparison of the money stock at present compared with what it was in 1879, when the act for the resumption of specie payment went into effect. The total money in circulation at that time was about \$816,000,000. The per capita circulation at that time was almost exactly one-half what it is now, being then \$16.75. At that time the total amount of gold recorded in circulation was only \$60,000,000, against \$675,000,000 at this time. There was then outstanding \$61,000,000 in gold certificates and at this time more than \$250,000,000. The standard silver dollars in circulation in 1879 amounted to less than \$0,000,000, against more than \$77,000,000 at this time, and the silver certificates then amounted to only \$413,000,000 against \$470,000,000 at this time. The national bank notes outstanding in 1879 amounted to \$314,000,000, and at this time the circulation of these notes is quoted at \$548,000,000.

During the month of July the general stock of money in the country increased almost exactly \$20,000,000. B. A. Street's New York report, which is sound commercial authority, said Saturday: "The fall trade has further expanded; buyers are in all leading markets in large numbers and are operating freely, despite temporary checks caused by hot or rainy weather. The same is largely true of industrial operations, which go forward with a steadily increasing volume of output and with available capacity in leading lines booked far ahead. A heavy spring wheat outturn and a cotton crop next to the largest ever gathered are in sight. Railway tonnage is of enormous volume, the record for August being the best ever attained in that period."

This review ought to satisfy most people.

Paul O. Stensland, the Chicago bank wrecker, will receive the glad hand from any sleuth that meets him, there being a reward of \$5000 for his arrest. Being party to a robbery of about \$1,000,000 he will rank among the master thieves.

The list of the fire insurance concerns that are not paying at San Francisco is much longer than that of the dollar-for-dollar companies.

London papers do not take kindly to President Roosevelt's orders concerning the Carnegie orthography as it is called. The London Globe says "Roosevelt will find like William the Conqueror that it is easier to subdue a people than a language."

President Roosevelt has really no serious designs on the English language. Political preferment is not an honor much sought after in Russia since the terrorists began blowing office holders into atoms whenever they appear in public. The dispatches state that a big batch of resignations resulted from the attempt on Premier Stolypin's life.

There are still plenty of unoccupied railroad passes through the Cascade mountains for roads that do not exist solely on paper.

If the Stars and Stripes were flying over Havana's capital that Cuban revolution would end pretty quick.

Are you pulling for a Greater Eugene?

Advance in Price of Stock

The Spencer Butte Coal & Petroleum Company wishes to announce that the price of their stock will be advanced on Sept. 1st. to 50c a share. They wish further to say to those who have bought stock, as also to those who are contemplating the buying of their stock, that sufficient funds have now been secured to insure the full opening of their mines. Many of the experts who have been to these mines have volunteered to us that the present price of stock is far below what it should sell for.

The boiler and engine is now being put in place and work will progress much faster when started next week. We feel now to assure you that nowhere can a more safe investment be found in a mining proposition and believe that we have a property now that justifies us in urging the people of Eugene to invest in this stock while it is cheap, as every indication points to \$1 stock in the very near future.
