

BABY'S FACE IN TERRIBLE STATE

Awful Humor Was Eating Away Face and Ears—Body Mass of Sores—Three Doctors Tried to Help Little Sufferer But She Grew Worse—After Spending Many Dollars On Doctors and Medicine

CUTICURA CURES IN TWO WEEKS AT COST OF 75c.

"I feel it my duty to parents of other poor suffering babies to tell you what Cuticura has done for my little daughter. She broke out all over her body with a humor, and her face was being eaten away. Three doctors, they all claimed they could help her, but she continued to grow worse. Her body was a mass of sores, and her face was being eaten away. I would not be without it again if it cost five dollars, instead of seventy-five cents, which is all it cost us to cure our baby, after spending many dollars on doctors and medicines without any benefit whatever. Mrs. George J. Steese, 701 Coburn St., Akron, Ohio, Aug. 30, 1905."

ITCHING TORTURES Speedily Cured by Cuticura

A warm bath with Cuticura Soap and a single application of Cuticura Ointment, the great Skin Cure, will afford immediate relief, permit rest and sleep, and point to a speedy cure of the most distressing forms of itching, disfiguring humors, eczema, tetter, rash, itching, and irritations of infants, children, and adults when all other remedies and even physicians fail.

Complete External and Internal Treatment for Every Humor of Infants, Children, and Adults consists of Cuticura Soap (2c.) to cleanse the skin, Cuticura Ointment (10c.) to treat the skin, and Cuticura Pills (25c.) to purify the blood. Sold throughout the world. Cuticura Drug & Chemical Co., Sole Proprietors, Boston, Mass.

Mail Free, How to Treat Skin Diseases.

What the ticker says is keeping spectators guessing. What we say is, stop guessing when it comes to your tobacco taste. If you are looking for a really good cigar, one that has the sweet flavor that every lover of the week longs for, you will find it in the MOUNT HOOD CIGAR.

SYSTEM..

System in all things is one of the secrets of success. System in the handling of the money which reaches one's hand is vital. Do not pay your bills in cash for you will run the risk of paying some of them twice. Start a bank account with us and pay your obligations by check. Then you will have for every payment made, a receipt, and all of them will be of uniform size, convenient to file away for easy reference. That is one of the advantages of having a checking account. There are many others. Come in or write us and we will tell you about them.

Real Estate Agents

COBURG, OREGON.

MILITIA COMPANY FOR COTTAGE GROVE

Application has been made to Adjutant General Finzer for the establishment of a company of the Oregon National Guardsmen by seventy young business men of Cottage Grove. It is understood that there are to be four new companies formed. There are seven applications. Cottage Grove stands a good show. Bert Lawson deserves much credit for the work he has done in getting the matter in shape and ready to present to the state officials.—Nogget.

COTTAGE GROVE WOMAN ATTEMPTS SUICIDE

Portland, Feb. 27.—After a terrific struggle last night a woman prevented Mrs. Bessie E. Palmer from drinking carbolic acid at a lodging house here. Mrs. Palmer came to Portland from Cottage Grove some time ago with her husband. They had some trouble shortly after their arrival. He was said to be employed in the north end. She made the acquaintance of L. E. Obye, an electrician. He failed to call Sunday and said he wanted nothing more to do with her. Her mother is Mrs. Lydia Paxton and she is a sister of Dora Paxton, of Eugene. A brother is employed by a mining company at Ashland.

MARCOLA ITEMS.

(Special Correspondence.) Marcola, Feb. 28.—The S. P. Company lumber yards at Marcola were begun yesterday.

The Jap cook house on the section burnt down Sunday morning.

Charley Piquet, who was running the log haul at the S. P. mill No. 1, received a broken knee last week by being struck by the limb of a tree.

The railroad company has had to put on a coal burner, as they are unable to obtain wood between Coburg and Wendling.

Our ten-cent jewelry man left us last Saturday, as he had obtained most all the dimes that Marcola people were willing to give him.

POSITIVE PROOF.

Should Convince the Greatest Skeptic in Eugene

Because it's the evidence of a Eugene citizen.

Testimony easily investigated.

The strongest endorsement of merit.

The best proof. Read it:

Charles Beadle of 333 West Eighth street, Eugene, Or., says: "I am fully as ready to recommend Doan's Kidney Pills today as I was in 1903. Just after using the remedy. As I said in my testimony at that time, I had suffered from kidney complaint nearly always since the war. I never knew when to expect another attack. A cold or any overstrain would bring it on. The last severe attack I had was about six months ago, when something like lumbago set in and brought on a heavy pain as if there was a weight over each kidney. I was bent over and could not straighten up to save me. There was a weakness in the action of the kidneys and I could not control the secretions, which caused much annoyance. Having used several remedies with little if any benefit I finally began taking Doan's Kidney Pills. From the start I could feel the benefit. The action of the kidneys and bladder were soon corrected and the pains and aches disappeared. I was benefited in every way, and what I told in my former testimony about the relief I obtained is true in every respect. Three years have now elapsed since I testified in favor of Doan's Kidney Pills, and I have been continually free from kidney complaint. I consider them a wonderful remedy and have recommended them again and again."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States.

Remember the name—Doan's—and take no other.

Pleasant and Most Effective.

T. J. Chambers, Ed. Vindicator, Liberty, Texas, writes Dec. 25, 1902: "With pleasure and unhesitatingly I bear testimony to the curative power of Ballard's Horehound Syrup. I have used it in my family and can cheerfully recommend it as the most effective and best remedy for coughs and colds I have ever used." Sold by Linn Drug Co.

EATON'S MESSENGER SERVICE.

Messages and small parcels delivered to all parts of the city by careful, courteous boys.

EATON'S BOOK STORE.

'Phone 1691.

Advice to mothers. Don't let your children waste away. They can be strong, healthy and vigorous with Hollister's Rocky Mountain Tea. It's a swift-winged messenger of health. 35 cents, tea or tablets. Linn Drug Co.

HARRISBURG ITEMS OF LOCAL INTEREST

Miss Mae Endicott visited friends in Eugene the latter part of last week.

Miss Angie Endicott is this week visiting with relatives and friends in Springfield.

Miss Hazel Wood will begin teaching a spring term of school near Coburg next Monday.

Mrs. I. A. Valentine accompanied her mother and sister to Eugene Monday afternoon.

Miss Belle Wilson went to Eugene Thursday last for a few days' visit with friends in that city.

Miss Lena Boggs, who has been visiting with her father, Leon Boggs, near this city, for the past few days, returned to Eugene Monday.

Miss Myrtle Green left the latter part of last week for Eugene, to visit with relatives and friends for a few days. She returned Sunday afternoon.

Ralph Shisler, who is attending school in Eugene, spent a few days the latter part of last week with his parents and many friends in this city.

Miss Martha Gibson, who closed a very successful term of school in the Lake Creek district a short time ago, has accepted a spring term in the Muddy district, and will commence there next week.

Miss Musette Baker, who is employed in the Pacific States Telephone office at Eugene, spent Sunday at her home in this city visiting with her parents, Mr. and Mrs. J. J. Baker, and many friends.

Mrs. M. Cunningham and daughter, Miss Ollie, stopped off here Friday last for an over-Sunday visit with relatives and friends. They were on their way from Albany to Eugene, where they will reside in the future.

The flour mill started up Monday for a few weeks' run. The mill has not been able to run very steadily during the past winter owing to the impossibility of getting cars in which to ship out the products of the mill. It is hoped that as soon as the new railroad commission law takes effect the car shortage proposition will be materially changed.

G. B. Needles paid Eugene a visit the latter part of last week. His visit was made for the purpose of attending a meeting of the K. of P. lodge of that city, of which he is a member. While there he called on R. A. Ramps, who is at the hospital in Eugene, and found the old gentleman in very poor health. Mr. Ramps' many friends herabouts will be pained to learn that his health has failed so rapidly during the past few months.

An operation was performed Monday last upon Miss Emma Love, of this city, for tumor, and a tumor weighing thirty-eight pounds was removed. The operation was performed by Dr. Wm. H. Dale at his private hospital, and he was assisted by Dr. Mackey, of this city, Dr. Williams, of Junction, and Dr. Marks, of Halsey.

This growth had been troubling Miss Love for several years past, but it has been only during the past year that she has suffered very much with it, and a short time ago she decided to undergo an operation. She is at the hospital in charge of a trained nurse from Portland, and her many friends are wishing her a speedy recovery.—Bulletin.

LONG FELT WANT IN EUGENE.

While working in the largest dyeing and cleaning works on the coast and while there seeing lots of garments shipped from Eugene to be dry-cleaned, or dyed, and after investigating and going over the ground thoroughly we saw at once that there was a good opening for a first-class cleaning and dyeing works in Eugene. So we have decided to put in a first-class plant and are doing well from the start. We are the only experts in this line north of San Francisco, and have had over 12 years' experience and guarantee all work. All articles dyed and cleaned by us are treated separately for sanitary purposes and done by hand. In this way we obtain good results and as no machinery is used in our work that will tear or injure the fabric.

Everything possible in cleaning or dyeing. Eugene Dye Works, 659 Willamette street. 'Phone Red 2861. C. Marx, Jr., manager.

THE TEXAS WONDER

Cures all kidney, bladder and rheumatic troubles; sold by all druggists or two months' treatment by mail for \$1. Dr. E. W. Hall, 2526 Olive street, St. Louis, Mo. Send for testimonials. Sold by Hull's Drug Store, d w m

PAZO'S OINTMENT IS GUARANTEED

to cure all cases of itching, blind, bleeding or protruding piles in 6 to 10 days or money refunded. 50c.

The Kind You Have Always Bought

Bears the Signature

of Dr. J. C. Fletcher

The Latest Is the Wireless Auto

THE very latest in wireless devices is the wireless automobile. The phrase is perhaps somewhat misleading to the average reader. Of course the ordinary automobile is not run by an electric current obtained from a trolley wire, and the term "wireless" does not have reference to the absence of such a means of conveying motive power. This particular form of motor vehicle is used for sending messages through the air by the use of electricity and without recourse to wires. To send a wireless message there must be a wireless station, and the wireless automobile is simply such a station on wheels, with jointed poles which may be extended upward to a lofty height just as are the masts of an ordinary wireless station. The principle of the extension ladder of the fire department is applied to the realm of wireless communication, and the result is the portable or movable wireless station, which may be used either for traction purposes or for sending messages.

Though this is rapidly becoming a wireless age, the streets of many American cities are still unnumbered with trolley, telephone, telegraph and electric lighting wires, so it would not be possible to drive the so-called wireless automobile or motor bus through them with the poles extended high in the air amid the Hertzian waves. The device is not intended as a substitute for either the trolley car or the car operated by use of the third rail system. It is intended primarily for use in warfare in communication between officers of an army. The new machine is the invention of the wizard of wireless communication, Guglielmo Marconi, and his secretary, the Marquis Solari, and has been patented in the name of the latter. With the pole folded up and resting flat upon the top of the machine the car looks not unlike many of the armed automobiles which have been invented since the military ex-

GUGLIELMO MARCONI AND THE WIRELESS AUTOMOBILE.

periments began the study of the application of motor vehicles to purposes of warfare. By means of the special apparatus of the machine the electricity generated may be utilized either for raising the pole, or mast, in the air, for radio graphic transmission or for moving the machine. The vehicle carries the pole, the alternator, the complete wireless apparatus and the operating staff. In ten minutes the station can be made ready for action to its utmost distance, a little over ninety miles. For short distances it can act while in motion at half speed. This means that it is in use in the field it can be run from point to point while messages are being exchanged between officers who desire to communicate.

Marconi expects that the wireless automobile will be first used in the service of the Italian army, but the prediction is made that the device will be found useful on commercial lines where there is a breakdown of traffic or in similar emergencies.

Though Marconi has already accomplished such wonderful achievements he keeps right on studying and experimenting and making new inventions and improved apparatus just as if his name and fame were still to be made. His birth in Bologna, Italy, occurred thirty-three years ago next April, and it was seventeen years ago that he began experiments to test the theory that the electric current is capable of passing through any substance and if started in any given direction will follow an undeviating course without need for a wire or other conductor. It was in 1896 that he made his first successful experiment in telegraphing without wires, and it was in the latter part of 1901 that he sent the first wireless message across the ocean.

With a Slight Correction.

Miss Peachley (dining at a restaurant)—Auntie, do you see that handsome young man over at the other table drumming on his plate with a fork? Do you suppose he is making those tickles to attract our attention?

Chaperon—Yes, dear, but such tactics are rude and boorish. Don't notice him.—Chicago Tribune.

A Meteorological Paradox

I once knew a quartet composed of the funniest people you ever saw in your life. They weren't four men or four women nor two men and two women, but three men and a woman. Each of the three men was funnier than the other two, and the woman was funnier than the three men together. You should have seen her. One eye was turned up at an angle of twenty-five degrees, the other down at an angle of thirty. She could look serious and sympathetic out of the one eye and hysterically diabolical out of the other. She had a ravenish cackle and a sweet melody in her voice, so that no one could tell whether she meant to be pleasant or disagreeable. Sometimes she would say pleasant things to you looking at you with her sympathetic eye and sometimes say diabolical things looking at you with her sympathetic eye. So nobody ever knew what she was driving at.

The first of the three men was Mr. Bantam, husband of the above described lady. Everybody said the name was very appropriate, for Mr. Bantam's face wore the perpetual grin of a bantam rooster. Next came Mr. Guyer, a theoretical mathematical prodigy. Like Sir Isaac Newton, who made a large and small hole in his door for his big and little cat to come through, Guyer didn't stoop to consider petty contrivances. He once had an alarm clock which failed to wake him up in the morning. Somebody finally called his attention to the fact that it hadn't any bell. The third man was Mr. Merryweather, a "real noble, good man," as one of his women friends expressed it. Indeed, he was so good and noble that he couldn't conceive of any one being wicked. And thereby hangs this tale.

One Sunday morning Merryweather and Guyer went to see Mr. and Mrs. Bantam, who were at church. The two men sat on the veranda waiting till the services should be over and the couple, recharged, like an electric automobile, with goodness, should return. The weather was betwixt and between, and when Merryweather said it was warm Guyer, who was a great disputant, declared it was cold. Presently Mr. and Mrs. Bantam returned. Mrs. Bantam welcoming Guyer with her sympathetic eye and Merryweather with her diabolical eye, then passing into the house. The dispute about the weather was referred to Bantam, who concluded to refer it to the thermometer, which he brought from the house. He showed it to Merryweather, who was surprised to see a record of 90 degrees. He was much pleased to be vindicated, but hadn't expected so triumphant a vindication.

Then Mrs. Bantam came out and, regarding her husband and Guyer with her sympathetic eye and the good Mr. Merryweather with her diabolical eye, made some modest remarks on the weather herself, in which she maintained that it was growing colder.

After having established her point, at least with Bantam and Guyer—Mrs. Bantam always established her point; people were afraid that if they disagreed with her she would bring her diabolical eye on them—she went back into the house with the thermometer.

Presently Bantam went inside to get the thermometer again, and when he brought it out it had fallen 20 degrees. Merryweather couldn't understand how so decided a change should have occurred in so short a time without his feeling it. Guyer suggested that there was something the matter with him. Merryweather was frightened. He thought he had better go home.

Mrs. Bantam came out again, bringing the thermometer with her and suggesting that something must be the matter with it. It had gone up again. This reassured Merryweather, who was of too sweet a disposition to speak his thoughts, which were that Mrs. Bantam had probably read the scale first with her lower, then with her upper eye. But as there were 45 degrees between the two eyes this didn't explain the smaller difference. However, he decided to wait awhile before concluding that he had chills and fever. The consequences might have been averted had not Bantam handed round a thermometer. A few minutes after Merryweather had drafted his glass Mrs. Bantam came out with the thermometer again standing at 63 degrees. Then Merryweather was sure he had the fever of pneumonia. A sympathetic cure appeared on the left hand corner of Mrs. Bantam's mouth as she remarked that it came on that way.

Merryweather was helped into the house and placed on a lounge. Occasionally he would resume a normal bodily temperature, but whenever he did so one of his three friends would show him a thermometer antipodal to his condition. If the mercury stood low when he was hot he thought he was in fever. If it stood high when he was cool he assumed that he had a chill. In this way his loving friends kept working on his imagination and through his imagination on his body till he got up and went home to die. Once out of the way of the malign influence that had tormented him, he was surprised at a sudden recovery.

Now, the explanation of this meteorological paradox is this: Bantam before bringing the thermometer out on to the veranda to settle the dispute between Merryweather and Guyer had held the bulb in his fist. When he took it inside he gave it to Mrs. Bantam with instructions to put it in the ice chest. And so the thermometer was kept oscillating between hot and cold while Merryweather was oscillating between cold and heat till he was thrown into a condition of imaginary pneumonia.
