## ..It Is Prudent to Insure..

your life or your property. Why is it not as important to insure against adversity in the future by keeping your funds in a bank account? Allow it to accumulate until a time comes when you need it badly—that is when you will appreciate its true worth. Just as the value of your life insurance increases as you grow older, so will your bank account grow as you add to it weekly or monthly. In fact, the possibilities of your bank account are limited only by your earning and saving capacity. An account with this bank is good insurance.
