QUICKSILVER SIMPLY POURED OUT OF FURNACE

BLACK BUTTE PLANT OF NEW MODEL PROVES SUCCESS FROM START, BUT A BREAK WAS DISCOVERED IN WALLS OF FURNACE AND SEVERAL WEEKS WILL ELAPSE BEFORE IT CAN BE REPAIRED

Black Butte quicksilver mine has been developed to be a producer. Fire was lighted in the furnace of the new retort a month or more ago and after a warming up lasting three weeks ore began to be introduced. First a pile of rubbish that was encumbering the furnace ground was thrown in to get it out of the way, as not much was expected, but that it would serve somewhat for a test of the untried process. After a bit Manager Dennis, anxious to know what was coming over opened the outlet when lo, out flowed a stream of pure mercury. There was a lively jumping around to get a vessel to catch the tickle metal. Where he had expected only a trace, pounds were obtained. Ore was then introduced and a regular stream of metal flowed. The full capacity of the retort had not been reached when a break down in the fire box was discovered. Just what caused the fire brick lining to give way is not known and will not be until the furnace cools sufficiently to allow workmen to examine. Such accidents often occur with furnaces, and has no connection with the vaporizing and condensing departments of the plant. At no time is the ore in the fire box. The quicksilver as it comes from the retort is chemically pure. There is no lead or zinc. So now the chemical problems are solved, leaving the only mechanical adjustments. The furnace is cooling, which will require from ten to fourteen days from the time the fire was drawn, then the repairs will be made and the fire again lighted. To cool and reheat the plant requires a month or more. The fuel used is fir wood and it is proving to be well adapted to retorting. It makes a hot fire and leaves but few ashes, and of course no slag.

The men employed at the mine and about the retort number about 35. This force will probably be increased. The capacity of the retort is about about 50 tons per day of 24 hours. A shift of six men are underground. Last week, it is reported, a very rich vein of ore was encountered, richer than anything heretofore discovered.

At this time where there is enforced idleness about the retort a clean up will be made by the manager, when it will be known just what to expect of the mine.—Cottage Grove Western Oregon. —Hytynotahyucareoggaun

MARTIN'S MEETING COMES TO CLOSE

TOTAL NUMBER OF ACCESSIONS TO CHRISTIAN CHURCH 208 AS A RESULT OF EVANGELIST'S WORK.

Yesterday, with 208 additions, closed the greatest meeting in the history of the Christian church in Eugene. Dr. S. M. Martin proved to be a loyal and competent evangelist. His converts will doubtless prove lasting, as his converts in the past always have done, while the rest of the members have been built up in the knowledge and power of the Word of God.

In the Bible School yesterday, there were 315 present. This department of the work is meeting with much favor and benefit, and will quite surely continue to increase in numbers and interest as it has done ever since the revival began.

The church was crowded to its utmost last night, while the evangelist ably delivered that splendid sermon on "Christian Bicycling."

The grand total of accessions to the church during the meeting is 208. Splendid encouragement for a noble future prevail.

Everybody is cordially invited to attend all Sunday and mid-week services at the Christian church. J. S. McCallum is the excellent minister.

SOLONS DELUGED WITH POSTCARDS

Washington, Feb. 15.—Every member of congress received a postcard today from Baker City showing a view of Main street, and containing these words:

"We are a federal building, but don't want that one."

The supervising architect says the Main street site was bought four years ago on the recommendation of Congressman Williamson and practically every business man in Baker City. No change can now be made except through congressional legislation.

JOS. ANDERSON CONVICTED OF MURDER OF HARRY LOGAN

Portland, Feb. 15.—Jacob Anderson, the highwayman, was tonight convicted of the murder of Harry Logan, the engineer, whom he killed while on his profession of highway robbery.

An appeal will be taken.

PORTLAND ROYAL BAKERY

Bread, the best and healthiest bread made. For sale at Otto's.

HARRIMAN ROAD MUST ANSWER FOR REBATING

Washington, Feb. 15.—Prosecutions are to be instituted by the government against the Southern Pacific Company and certain officials of that railway organization on the allegation that they paid rebates to shippers. Evidence in the case was obtained by Interstate Commerce Commissioner Franklin T. Lane, in a recent visit to the Pacific coast. His report of the conditions was made public today, having been approved and referred to the department of justice for "such prosecutions under the law as may be warranted."

At the request of the railroad commission of California, the transcript report and the evidence will be sent to the commission, which indicated its purpose to prosecute the alleged violations of the California laws, that may be shown by the report.

Commissioner Lane's report finds the existence of an extensive system of preferential rates granted certain shippers on interstate business by the Southern Pacific Company. The record discloses a list of 198 firms, corporations and individuals who enjoy the "special inside rates."

FRANKLIN K. LANE.

The refund claims amounted in various months of the years 1906 and 1907 from \$30,000 to \$50,000 per month; that one firm, during the period of April, 1906 (the date of the San Francisco fire, when all previous records were destroyed) to September 23, 1907, took down \$23,994, and that the refunds of the same period to other shippers ranged from \$13,650 to \$22,251; that one shipper admitted that the allowance of rebates influenced the traffic over the rails of the Union Pacific; that there existed for years an understanding between the Southern Pacific and the Santa Fe and certain shippers of dried fruits were to receive a refund of one-half of the local rate charged at the time of the original movement, and that the voucher books show these transactions.

THE DOCTOR OF OSTEOPATHY

What His Title Means—How He Gets It and the Peculiar Abilities Acquired in His Long Course of Training

The graduate of a recognized college of osteopathy, after a long and exhaustive study of the highest authorities in anatomy, physiology, pathology, diagnosis, therapeutics and all kindred branches, is awarded a diploma that gives him a legal right to the title of Doctor of Osteopathy. That is the only title that he wishes, for he makes no pretense of practicing medicine, the word medicine being generally accepted as meaning drugs.

The abbreviation of the title of Doctor of Osteopathy is D. O., and the province of the D. O. is to help nature, in the human body, to right itself. He believes that drugs are not only unnecessary, but distinctly damaging, and that the body is a very perfect machine that will run along smoothly if supplied with the proper fuel (food), and if none of its parts get out of position.

Repairing the Structure. But, while the most perfect of machines, it is also the most delicate, and derangement of its parts can be brought about in scores of ways. Falls, jars, strains, undue exertions, and local contractions or relaxations due to changes in temperature, are only a few of the things that may cause trouble in this delicate mechanism. Sometimes the effects are immediately apparent, sometimes long delayed.

It is for the especial work of finding the derangement and rectifying it that the osteopathic physician is trained. He is a master mechanic, and when anything is wrong with the machine it is the master mechanic whose services should be called in. If some little part has slipped out of place, the resulting trouble may be at a distant part of the mechanism, and and but the trained expert would be likely to attempt repairs in the wrong place and work further damage. But the skilled workman does nothing until he has made thorough examination and found that little part that has slipped out of place. Then his training enables him to replace it. That is the work of the osteopathic physician.

If you want an opinion as to the value of osteopathic treatment do not make the mistake of consulting any one whose whole training has been along other lines. Ask some one who has had experience with the system and knows, or better yet, go to a good osteopath and give him the opportunity to demonstrate the thing to you.

Dr. H. L. Studley, osteopath, office over Chas. W. Hayward's store, Phone Black 1124, Res. 1000, 774 Perry street. Phone Red 3197.

CHAMBERS HARDWARE CO.

SPECIAL ELECTION WILL BE HELD ON APRIL 18

WATERWORKS BONDS AND CEMETERY AMENDMENT WILL BE VOTED UPON ON THAT DATE—COUNCIL MET THIS FORENOON AND PASSED ORDINANCE CALLING ELECTION.

A special meeting of the city council was held this forenoon at which time it was first proposed to call a special election for the submission to the voters of the city the proposed charter amendments for the issuance of water bonds and for the restriction of burials and cemetery additions within the city limits, was passed. On these questions at the regular city election April 6, but it was found that not enough time for the proper procedure would be had and it was decided to call a special election on April 18.

The ordinance passed this morning reads as follows: An ordinance calling a special election in the City of Eugene for the submission to the voters of the city certain proposed charter amendments filed with the city recorder January 4th, 1908.

The City of Eugene does ordain as follows:

Section 1. Initiative petitions having been filed with the city recorder January 4th, 1908, the one proposing the amendment of sections 108 and 112 of the city charter, and the other proposing the addition to said charter of a new section in reference to cemeteries and burials within the city limits, and it appearing that said amendments so proposed can not be legally submitted to the voters of the city at the regular April, 1908, city election, a special election is hereby called to be held in said city on the 18th day of April, 1908, for the submission of said proposed amendments to the voters of said city. That said election be held at the usual polling places in each ward, viz:

First ward—At the city hose house on East Eleventh street. Second ward—At the hook and ladder room in the city hall. Third ward—At Heller's blacksmith shop, 41 West-Seventh street. Fourth ward—At Wilkins building, 68 West Eighth street. That the judges and clerks of election to be appointed for the regular April election act as judges and clerks for the special election hereby called.

Section 2. That two certain resolutions of the common council passed January 13, 1908, looking to the submission of said amendments at the annual city election to be held April 6th, 1908, be and the same are in so far as they direct the submission of said amendments at said annual election, hereby repealed, rescinded and annulled.

Mr. Allen Explains. In reference to the re-submission of the water amendments at a special election rather than at the general April election, City Attorney Allen today made the following statement:

"I am satisfied that I misapprehended a requirement of the law relative to the time which must elapse after amendments are filed before they can be voted upon. The new election makes some additional expense. That additional expense I will bear, as it was entirely due to my misapprehension that the amendments were not so brought before the council that they could be voted upon at the regular city election. To summarize the situation: These water amendments were submitted to the people last October, carefully and in exact accordance with provisions of law prescribed by the legislature for so doing. In a Portland case, on their charter amendments, Judge Giland held that the legislature had erred in prescribing the procedure it did, and that such amendments must originate in a petition signed by the voters. Though believing our first submission legal, it seems more expeditious to submit the amendments again in the method the judge declares to be the proper one rather than submit to the delay that would be required to test in court the legality of the former proceeding."
