## THE DOCTOR OF OSTEOPATHY

**What His Title Means—How He Gets It and the Peculiar Abilities Acquired in His Long Course of Training**

The graduate of a recognized college of osteopathy, after a long and exhaustive study of the highest authorities in anatomy, physiology, pathology, diagnosis, therapeutics and all kindred branches, is awarded a diploma that gives him a legal right to the title of Doctor of Osteopathy. That is the only title that he wishes, for he makes no pretense of practicing medicine, the word medicine being generally accepted as meaning drugs.

The abbreviation of the title of Doctor of Osteopathy is D. O., and the province of the D. O. is to help nature, in the human body, to right herself. He believes that drugs are not only unnecessary, but distinctly damaging, and that the body is a very perfect machine that will run along smoothly if supplied with the proper fuel (food), and if none of its parts get out of position.

**Repairing the Structure.**

But, while the most perfect of machines, it is also the most delicate, and derangement of its parts can be brought about in scores of ways. Falls, jars, strains, undue exertions, and local contractions or relaxations due to changes in temperature, are only a few of the things that may cause trouble in this delicate mechanism. Sometimes the effects are immediately apparent, sometimes long delayed.

It is for the especial work of finding the derangement and rectifying it that the osteopathic physician is trained. He is a master mechanician, and when anything is wrong with the machine it is the master mechanician whose services should be called in. If some little part has slipped out of place, the resulting trouble may be at a distant part of the mechanism, and and but the trained expert would be likely to attempt repairs in the wrong place and work further damage. But the skilled workman does nothing until he has made thorough examination and found that little part that has slipped out of place: Then his training enables him to replace it. That is the work of the osteopathic physician.

If you want an opinion as to the value of osteopathic treatment do not make the mistake of consulting any one whose whole training has been along other lines. Ask some one who has had experience with the system and knows; or, better yet, go to a good osteopath and give him the opportunity to demonstrate the thing to you.

Dr. H. L. Studley, osteopath, office over Chambers Hardware store. Phone Black 1326. Residence, 734 Perry street. Phone Red 2197.
