who does not possess a bank account is an exception. To no one is a checking account more of a luxury. It solves the problem of always having funds in convenient form, of making exact change and receiving a receipt for the amount when the check is returned after being paid at the bank. Some men even now persist in carrying money on their persons—they are the ones we read of in papers as having been "held up" and robbed. A bank account is the best burglary insurance and it costs you nothing to take out a policy. We will appreciate your patronage and treat you right.
