MORE FOREST RANGERS TO BE PUT ON

Special to Guard.

Washington, March 23.—The United States civil service commission has just announced that examinations will be held for the position of ranger at the supervisor's headquarters at every national forest on April 23 and 24. It is estimated that 300 more rangers will be required during the present fiscal year than were on duty last year, and eligibles to fill these vacancies will be furnished the forest service by the coming examination. The examinations will be held in seventeen states and territories, at the following places in Oregon: Eugene, Grants Pass, Heppner, John Day, Lakeview, Medford, Prineville, Roseburg, Sumpter, Walla Walla.

Applicants can secure information on the examination from the United States civil service commission, Washington, D. C., or from the forest supervisor at any of the places mentioned for holding the examination. Those who wish to take the examination should ask for application form 1093, a copy of the "Use Book" and a copy of "Information Regarding Employment in the National Forests." The papers in the examination will all be forwarded to the civil service commission and the results announced in due time.

Experience, a thorough knowledge of forest conditions and a sound body, rather than book education, are the qualities sought in examining applicants who desire to become forest rangers. The man must have the ability, however, to make simple maps and write intelligent reports upon forest business connected with the position. A ranger must be able to take care of himself and his horses in regions remote from settlement and supplies. Necessary qualifications of applicants include the knowledge of trail building, construction of cabins, and the ability to ride, pack, and deal, especially with all classes of people. They must also know something of the land laws, surveying, estimating and scaling timber, leveling, mining and the live stock business.

Only those men who are at least 21 years of age, and not more than 40, of good character, temperate, and in good physical condition, are eligible to take the examination. The salary paid to beginners is \$75 a month. Compensation runs as high as \$1400 per year for rangers who have had some experience and demonstrate their capability. Still better places are open to these men, for it is the policy of the forest service to fill vacancies in higher positions by the promotion of rangers who have proved their capacity.

NEW ANTI-TOXIN FOUND.

The Germans have found an anti-toxin for the "laziness germ." They claim that it will transform any man of sluggish and slothful habits into an energetic person to whom that "tired feeling" is unknown. This is the reduction of the germ theory to its logical absurdity. Germs are not the only cause of disease. Germs simply multiply in depleted or diseased tissue.—Saturday Evening Post.

Osteopathy seals the fate of germs by restoring the proper circulation of the bodily fluids that are alone capable of imparting the diseased tissue. Does it not seem like the correct and rational method?
