

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the nature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

ANNUAL MEETING OF EUGENE'S CITY COUNCIL

(Continued from Page One.)

average in the city. Matthews, Mr. Kilbuck sets the other contracts for grading and graveling in East Eugene. The fire and water committee reported the condition of water in the reservoirs during the month and other matters.

Health Committee's Report

The health committee made its annual report, showing 3390 feet of new sewer constructed during the year, making 66,655 feet all told in the city. It reported 62 deaths, 62 births, 62 cases of contagious diseases, but no deaths resulting therefrom. The number of deaths reported eight of these were not chargeable to the city, but were deaths at the hospitals of persons brought from other places. At the city had a population of 8000 people 40 deaths per year, or 5 per 1000, will compare with any city in the valley.

Street Commissioner's Report

The street commissioner made his annual report, showing 10,366 feet of sidewalk built, and 10,880 feet of cement walk built, 3495 feet of gutter, 3495 feet of gutter and gravel, and an alley between Sixth and Seventh streets, from Blair west three blocks, was referred to the street committee, also to grade and gravel Alder street from Eleventh street to the mill race.

New Members Take Seats

The report of the canvassing board showed J. E. Roach elected councilman from the First ward, W. S. Moon from the Second ward, A. W. Gilbert from the third ward and J. M. Williams from the Fourth ward. Their certificates of election and oath of office were duly presented and the new members were inducted into office. Councilmen Henderson, McCrady and Calkins retiring.

Opens With Prayer

The new council was then called to order, and Mayor Matlock called upon Rev. D. H. Trimble, pastor of the Methodist church, for prayer. This custom was inaugurated by the mayor a year ago when he took his seat. The mayor then read his annual message, which is found elsewhere in this issue.

Recorder's Annual Report

The report of City Recorder B. F. Dorris was read at the meeting. It is as follows:

City Engineer's Report

Eugene, Or., March 28, 1908. To the Hon. Mayor and the Common Council of the City of Eugene:

Gentlemen—Pursuant to request I submit the following statement of the present water works system of the city of Eugene.

An up-to-date water works system such as the people of the city demand, should have pipes large enough to furnish adequate fire protection, with a pressure economical in the consumption of power, and cost of repairs. If a gravity system is employed, also an abundant supply of pure water for domestic and commercial purposes. The present plant is supplied with filters, which if provided with coagulation tanks and the proper settling basins, should deliver water to the consumer that is practically free from bacteria and sedimentation. It is stated for good authority that in order for filters of any type to be effective it is necessary for 2 per cent of the water forced through them to be used as a back flow in cleaning or washing the filters, when the water is free from sediment as are the waters of the Willamette river during the summer months. In time of freshets, when the water is muddy or very turbid, a back flow of 30 per cent is required to keep the filters clean and allow them to do effective work. Filtering without coagulation and settling is not effective and does not remove the impurities from the water. The filters, under the present construction, could not be expected to do effective work, and frequently sedimentation is found in the water drawn from the service cocks, and in time of freshets the water is so badly discolored as to indicate that the filters have not been used at all, and under present construction could not be used.

The ground or rather the situation of the present plant is unfavorable to the construction of settling and coagulation basins, if these were constructed it would cost \$15,000 and necessitate the relocation of the plant.

The cost of filtering water by the use of mechanical filters is variously estimated in the different cities of the United States at from \$2.50 to \$7 per million gallons. Seeking an average of say \$5 per million gallons, and estimating the city to use 1,000,000 gallons per day, the cost of filtering alone amounts to \$162 per year. It is not probable that a pipe across the river can be made to remain uninjured in the bed of the stream during the winter season, the gravelly bed of the river being constantly shifted by the current and will undermine any construction of pipe line across the river; hence the only available source of supply is the city, and the present well is unavailable. It seems to have been the design of the engineer in placing the new reservoir on the highest point of Skinner's butte to get adequate fire protection with the smallest diameter of pipes now in use in the present system. This can only be accomplished by an enormous increase of friction in the pipes to get the increased velocity of flow necessary to give the city good fire protection. When such high pressure is used at the expense of pumps and the increased cost of power or the greater expense of high pressure pipe, in a gravity system, the expense is too great to be squandered on friction in the pipes, and such frictional loss entails a daily expense as long as the system is in use, the extra expense will in a comparatively short time pay for larger pipes and the cost of a low or reservoir. It is poor economy to continue the use of so high a pressure system, not to reckon the cost for repairs. If the present intentions of the city are carried out and a gravity system put in, the extra cost of pipe for so high a pressure would exceed the cost of the present reservoirs and the cost of repairs would be correspondingly greater. With a pressure such as could be maintained economically in a gravity system the

city could put in a new and up-to-date gravity system. Not mentioning the value of the real estate belonging to the company and estimating the total replacement cost to be \$112,505, and deducting \$20,000 depreciation of material and machinery by reason of age and use, and making a further deduction of \$27,000, the estimated present value of the pumping plant, reservoirs and well, would leave \$65,505, value of material which the city could use, thus at a great disadvantage in the construction of a gravity system.

Street Committee's Report

Eugene, Or., April 13, 1908. To the Honorable Mayor and Common Council of the City of Eugene:

We, the undersigned, street committee and street commissioner, hereby submit the following annual report of street work for the past year:

New lumber used for constructing street crossings, alley crossings, culverts and repair work amounts to \$2,045 feet.

Old lumber used for repair work, 20,597 feet.

Total number of feet used, 182,612. Lumber now on hand, 6722 feet.

There are now twenty-five (25) new street crossings which have not existed a year ago, also eleven (11) alley crossings.

There has been built during the past year sidewalk 10,880 feet or a fraction over two miles.

Cement sidewalk where none existed a year ago, in the residence district there are 7918 feet of cement sidewalk. On Willamette street, or

the business part of town, there are 1956, or nearly two miles.

New improved streets graded and graveled, fourteen (14) blocks, or a little over one mile. Alleys graded and graveled the past year, eight hundred (800) feet.

There have been eight hundred and fourteen (814) loads of river gravel hauled and used to repair the streets with, also about one thousand (1000) loads of gravel that was excavated on Willamette street hauled on outside streets to repair with; also there has been 3495 feet of sewer built the past year.

There has been one hydrant placed on the street the past year.

There have been thirteen (13) cement alley crossings built in the past year.

Respectfully submitted,
A. W. GILBERT,
GEORGE FISHER,
J. P. TURNER,
Street Commissioners.

FOR YOUR SUNDAY DINNER

Try the following delightful dessert:
1-2 cup English Walnut meats,
1-2 dozen figs, cut up fine,
1 1/2 package JELL-O, any flavor.
Dissolve the JELL-O in a pint of boiling water. When cool and just commencing to thicken stir in figs and nuts. Serve with whipped cream, delicious. The walnuts, figs and JELL-O can be bought at any good grocery. This makes enough dessert for a large family and is very economical.

MERRY WIDOW SAILORS

A new line of Merry-Widow sailors just received at Galvin & Russell's, 84 East Ninth Street.

DeWitt's Little Blue Pills, the famous Little Blue Pills. For sale by all druggists.

SHALL LANE COUNTY HAVE A REPUBLICAN SHERIFF?

Eugene, Ore., April 29th, 1908.

To the Republican Voters: There is no reason why Lane County should not have a Republican sheriff, and if the Republican party will stand together at the June election, we will easily elect our man.

On the 17th day of this month the Republicans will nominate at the primaries the one they wish to run for this important office. As one of the aspirants for nomination I wish to impress upon you the necessity of selecting the man that will command the greatest number of votes at the June election. This is a matter of great importance to the Republican party, and I urge you to exercise care in your selection as to who shall be nominated for sheriff.

The Republican party is entitled to this office, and in order to be victorious it behooves us to select the very best man we can make the candidate.

I firmly believe that I can command a larger number of votes for this office than any of the aspirants in the field, having been closely identified with the business interests of Lane County for the past fifteen years. I naturally have a large number of friends and acquaintances who will work for my nomination and election, and I am perfectly capable of doing the office through business administration. I am anxious to be elected in this community, and I am sure that the Republican party can give you the information if desired.

If you are not sure of election, I would appreciate your casting your vote for me at the June election.

We must elect a Republican Sheriff this year.

Very truly yours,
E. T. NICKLIN.

COOPER AROUSES INTEREST OF QUEEN CITY RESIDENTS

An adequate idea of the interest which has been aroused by young Mr. Cooper during the past year with his theories and medicines is given in the following article which appeared in the Cincinnati Post while Cooper was introducing his ideas to the people of that city. The article says: "The beginning of Mr. Cooper's second week in Cincinnati gives every indication that he is to enjoy the same astonishing success here as in other cities."

"The first day of his visit the crowds that call to see him have steadily increased, until now it has reached a point where several thousand talk with him each day. The entire city seems to have become interested in his theory that the human stomach is degenerate, and he already has an army of followers in Cincinnati who seem positive that his claims are correct."

"A number of Cincinnatians were interviewed at Cooper's headquarters on Friday, and several interesting statements, showing their intense faith in Cooper's preparations, were secured. The following are selected from these statements and are characteristic of them all: Mrs. M. E. Emerson of 630 West Court Street, said: 'I have suffered with stomach and constipation for a year or so. When I ate I would have bloated spells, sour stomach, fermentation, bad taste in my mouth. In the morn-

ing I was as tired as when I went to bed. I had a dull pain in the lower part of my back. I have taken almost one bottle of the New Discovery and am so wonderfully improved that I have come down here to thank Mr. Cooper in person and obtain more of the medicine.'

"Another individual interviewed was Mr. J. H. Brooks, living at 527 Walnut street, who had the following to say: 'For the past eighteen months I have been a constant sufferer from catarrh of the head and stomach. My nasal passages would become inflamed and sore. I would have severe headaches which effected my eyes, and great crusts of matter would run into the throat, causing an irritation of the bronchial passages, until the stomach finally became poisoned. When I would lay down at night a phlegm would gather in my throat until it almost choked me, and would cause an annoying cough. Half a bottle of Cooper's New Discovery gave me relief and when the first bottle was finished, I felt like a new man. I am now completely cured and consider Cooper's New Discovery the greatest catarrh, blood and stomach remedy in the world.'

"The Cooper preparations have been wonderfully successful throughout the United States. We consider them remarkable medicines and would be pleased to explain the nature of them.—Hall's Red Cross Drug store.

NOTICE TO STOCKHOLDERS OF LLEWELLYN TELEPHONE CO.

The stockholders of said company voted at the annual meeting to call a special meeting May 9, 1908, at 1 o'clock p. m., at Central schoolhouse.

School District No. 44, Lane county, Oregon, for the purpose of increasing the capital stock of said company.

All stockholders are requested to be present.

J. H. PERKINS, Pres.
