BRYAN GETS THREE AND LOSES ONE

Harrisburg, Pa., May 20.—After one of the hardest fights within the party for several years, the Democratic state convention here today decided not to instruct its delegates-at-large to the convention at Denver for Bryan. The Bryanites under the leadership of the executive committee of the Bryan Democratic League had a large following and they fought to the bitter end. The 44th district delegates were elected in April and the convention had nothing to do with them in the matter of issuing instructions.

he will set up at various places in these states, distilling the different woods to determine their value in the production of turpentine. In this manner an accurate idea of the yield of extracts from the various woods can be obtained, and samples of the material will be sent to Washington for analysis and estimation of its value for use in paints, varnishes and other naval stores. There are at the present time in the Northwest several wood-distilling plants which are producing various grades of turpentine, wood preserving oils and materials of a similar nature. It is believed that a careful study of the existing conditions in this section will yield results which will give an accurate idea of the possibility of utilizing the enormous quantity of sawmill refuse now going to waste.
